These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as Indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Woman's Medical College

OF BALTIMORE,

S. E. Cor. Druid Hill Ave. and Hoffman Street.

THE NINTH REGULAR SESSION WILL BEGIN OCTOBER 1ST, 1890, and continue seven months. For further information or catalogue, apply to

RANDOLPH WINSLOW, M. D., Dean,

No. 1 Mount Royal Terrace, Baltimore, Md.

COLLEGE OF PHYSICIANS AND SURGEONS

OF BALTIMORE, Md.

The Preliminary Course will begin September 15, 1890.

The Regular Session will open October 1, 1890, and close April 1, 1891. For catalogue containing full information, write to

FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.

SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.

THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address

Practical individual instruction, Clinical and Demonstrative, to physicians only, during the entire year. Fee for any one branch for six weeks, **$15.00**; General Ticket for twelve Clinical branches, **$100.00**; Tickets good for one Clinic weekly for three months, issued on application. For Announcement, with full particulars of CLINICAL AND LABORATORY COURSES, address

S. SOLIS-COHEN, M. D., Secretary.

MEDICO-CHIRURGICAL COLLEGE
OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,
1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE
OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The Annual Announcement will be sent on application to **J. W. HOLLAND, M. D., Dean.**

Medical Department, State University of Iowa,
AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address
DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

Ask Grocers for our Patent Barley **CRYSTALS**, a new, unrivalled Cereal Food, for Breakfast Tea & Dessert. If not sold there, write us for free samples. **GLUTEN FLOUR** and **SPECIAL DIABETIC FOOD** are invaluable waste-repairing flours for **Dyspepsia, Diabetes, Debility & Children's Food.** No bran; mainly free from starch. ILLUSTRATED CATALOGUE ON APPLICATION.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:		Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.
Pure Cod Liver Oil.....80 m. (drops)	Soda.....1-3 Grains.	
Distilled Water.....25 "	Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.	Hyocholic Acid.....1-20 "	

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which HYDROLEINE is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

INDIGESTION

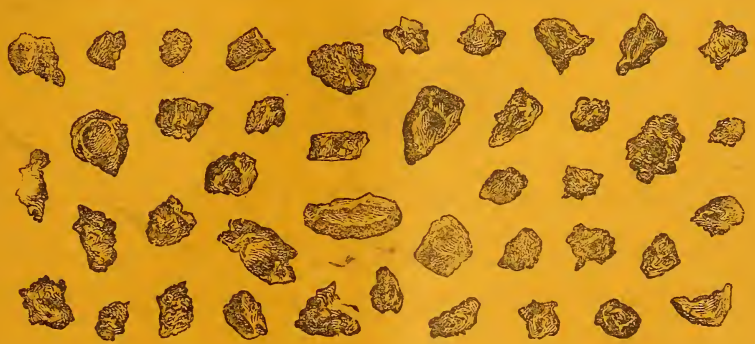
Buffalo Lithia Water.

DISSOLVES STONE IN THE BLADDER.

A case stated by Dr. C. H. S. Davis, of Meriden, Conn., in the "New England Medical Monthly," for July, 1890.

See Page 469 of that Journal.

Mr. R. L. Roys, of this city, consulted me about two years ago for stone in the bladder, from which he had been suffering for a number of years. On my suggestion he commenced the use of the Buffalo Lithia Water as he was very much opposed to operative interference. After using the water for a short time, disintegration to a certain extent took place and large quantities of stone were passed. For several days in succession, he passed as much as a teaspoonful of the debris, and at intervals for a considerable period he passed large quantities, and under the continued use of the Water, there was a constant passage of calculi until he was entirely relieved of his trouble.



The photograph sent herewith is a correct representation, and exact size, of some of the largest specimens of calculi discharged by Mr. Roys. A chemical and microscopical analysis showed that they are uric acid with a trace of the oxalate of lime.

Water in cases of one dozen half-gallon bottles, $5.00, f. o. b. here.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VA.

It is Important

for the Physician to watch the character and quality of the remedies used in his prescriptions. Responsibility *does not cease* when the patient leaves the office, for impure, stale, or inferior preparations may be used without his knowledge. Personal examination of remedies prescribed—is the best check upon substitution.

ESSENCE PEPSIN.

A concentrated solution of the Peptic Glands.

Essence of Pepsin.—(MERRELL.)

A direct solution of all the soluble constituents of the peptic glands of the pig's stomach, unchanged by chemical action or manipulation. Inasmuch as the pepsin herein contained has never been precipitated or acted upon by any re-agent, it is presented in as nearly as possible the condition in which it originally existed in the glands, and will be found entirely free from any decomposed odor or taste. Each fluid drachm is equivalent to 20 grains U. S. P. Saccharated Pepsin, and will digest 1,000 grains coagulated albumen in 6 hours, according to the pharmacopœal test.

DOSES:—1-2 to 1 fluid drachm.

Sufficient acid only is added to this preparation to properly preserve the pepsin, and if an acid dose is desired in connection with the pepsin, we recommend our Ess. Pepsin Lactated, or the following:

℞ Acid Lactic Dil., U. S. P., ... f℥ss to i.
Ess. Pepsin, ... q. s. ad f℥iv.
M. Sig. Teaspoonful before meals.

ALKALINE ELIXIR.

Rhubarb Co. with Pancreatin.

Alkaline Elixir Rhubarb Co. with Pancreatin.—(MERRELL.)

Each fluid ounce contains 20 grains each East India Rhubarb and Bicarb. Potass., 16 grains Pancreatin, and 10 grains Hydrastis Can. (without the Resin) with flavored brandy and aromatics.

This is, without doubt, the most valuable antacid, carminative-stomachic and digestive agent obtainable, and will be found extremely valuable in all abnormally acid conditions of the digestive tract, as in cholera morbus, cholera infantum, infantile or flatulent colics, acid dyspepsia—acute or chronic—etc.

DOSES:—1 to 4 fluid drachms every 1-2 to 4 hours, according to age and the severity of cases.

This preparation promptly allays the vomiting in cholera morbus, etc., and acts generally as a corrective in deranged conditions of the stomach and intestines.

Druggists may tell you that the "Merrell" preparations are not in stock—the reply is that Smith-Kline Co., Philadelphia; Gilpin, Langdon & Co., Baltimore, and The Richards Drug Co., San Francisco, can supply them. Physicians should specify "Wm. S. M. C. Co.," and insist upon the prompt recognition of their requests.

THE ABOVE PREPARATIONS ARE FROM THE LABORATORIES OF

THE WM. S. MERRELL CHEMICAL CO.,

Laboratories, CINCINNATI and 96 Maiden Lane, NEW YORK CITY.

Orders or inquiries to either address will have prompt attention.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

OTTO FLEMMING,

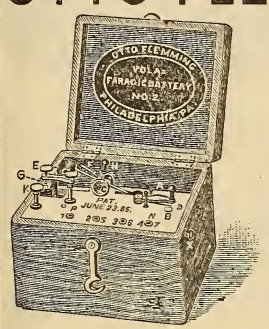
MANUFACTURER OF

Electric Specialties,

FOR USE IN

MEDICINE and SURGERY.

1009 Arch St., Phila., Pa.



I invite the closest scrutiny, analysis, and tests of the qualities of my new Vola-Batteries; my claim being, superior efficiency and regularity in their working capacity by perfect absence of annoyance, resulting from fluid in the cells. Complete apparatus for use in Electro-Gynæcology, with suitable Electrodes, Milliampere Meters, Current Controllers, Cautery Batteries, etc.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1	minim.
" Ignatia Amara,	1	"
" Cinchona,	4	"
" Matricaria,	1	"
" Gentian,	½	"
" Columbo,	½	"
" Phosphorus, C. P.,	1-300	gr.
Aromatics,	2	minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

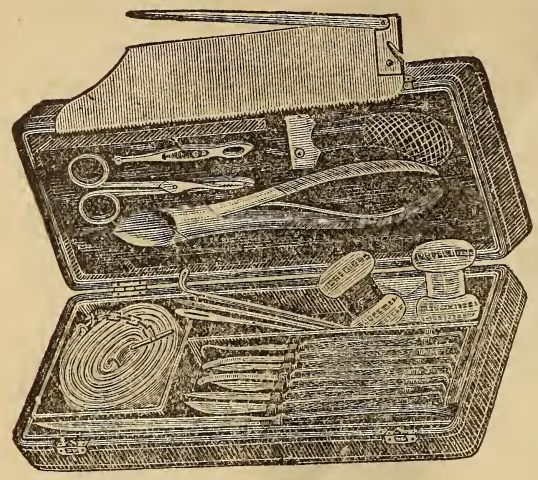
LENTZ'S ASEPTIC COMPACT OPERATING SET, No. 10.



We have from time to time made improvements to this set and are now making a perfect aseptic set, which offers especial facilities for aseptic precautions; the blades are soldered into hollow German-silver handles, nickel-plated, are light so as not to be unwieldy and admit of a firm grasp when operating.

The saw is adjusted to the handle on an entirely new principle, being made to separate easily and to facilitate thorough cleansing.

The handle is entirely of metal and fenestrated to overcome unnecessary weight.

Scissors and Forceps having French locks can be separated, and the slide can be easily removed from Artery and Needle Forceps.

Therefore, no opportunity is offered for the lodgment and development of germs.

The entire set is patterned with especial reference to facility in cleansing.

The instruments can be sterilized by placing them in boiling water, without fear of damaging them. Wood or rubber handles will not admit of this procedure. For price, see case A.

The following instruments are put up in either a fine Mahogany or Morocco case, with nickel trimmings, lined with velvet, and has an extra space for Trephine with handle, and Elevator if desired.

One Amputating Knife (6 in. blade); One Finger Knife; One Hernia Knife; One Sharp Curved Bistoury; Two Scalpels; One Tenotome; One Tenaculum; One Pair Scissors, curved or flat; One Saw (9 in. blade); One Liston's Bone Forceps, with Spring; One Artery and Needle Forceps, improved; One Esmarch's Flat Rubber Tourniquet, with Chain; One Hæmostatic Forceps; One Director, with Aneurism Needle; Two Silver Probes; Silk, Wire, Wax and Needles.

With the Sixteen Instruments Contained in this Case, any Ordinary Operation may be Performed.

SIZE, 11 INCHES LONG, 4 INCHES WIDE, 2 INCHES HIGH.

A.—German Silver aseptic Handles on Knives and Saw, ... **$34 00**
B.—Hard Rubber aseptic Handles on Knives and Saw, ... **29 00**
C.—Ebony Handles on Knives and Saw (as shown in illustration), ... **25 00**
Either Set, with Trephine and Elevator in addition, ... **4 65**

DISCOUNT 25 PER CENT. TO PHYSICIANS. Our Catalogue of 260 pages will be sent on receipt of 10 cts. for postage.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

EXTRACT FROM AN ARTICLE

IN THE

"Medical Press and Circular,"

BY

EDWARD WARREN-BEY, M. D., C. M., LL. D.,

Chevalier of the Legion of Honour.

To those familiar with the use of BROMIDIA, no argument is necessary, for it speaks for itself, by fulfilling the indications for which it is administered with a certainty, efficiency, and harmlessness which elicit at once the wonder of the patient and the delight of the prescriber, and give to the profession the assurance of possessing one remedy at least which approximates so near to infallibility of action as to justify the title of *specific.*

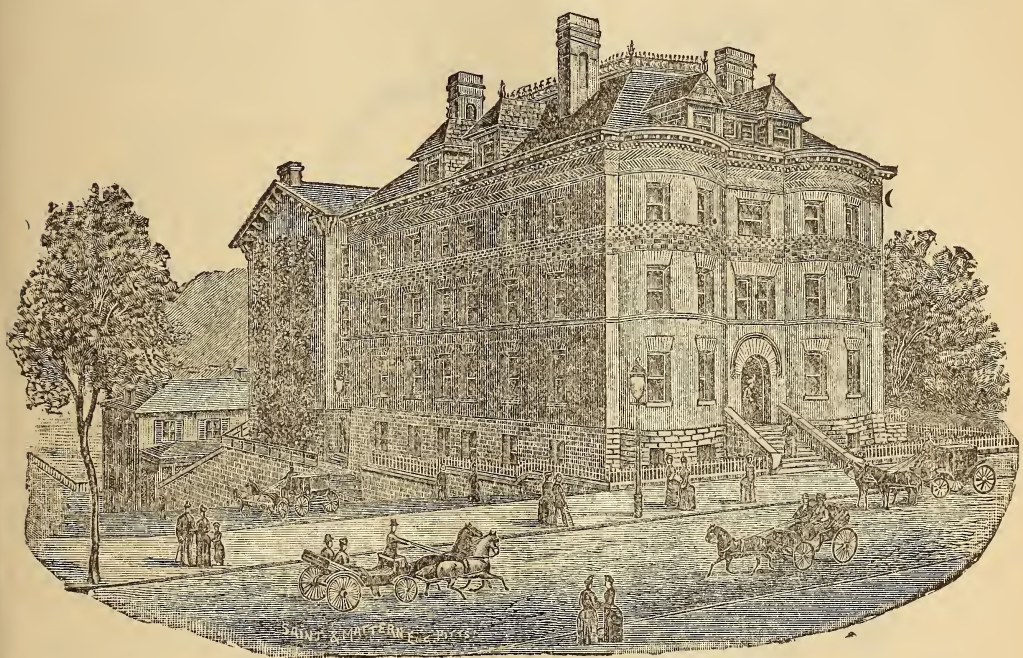
DR. R. S. SUTTON'S

Sanatorium for Diseases of Women.



Eighth Year Opens September 1, 1890.

ALLEGHENY CITY, PA.

This Institution is located on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers; it commands a view of the city of Pittsburgh, and its picturesque surroundings. The building is large and beautiful, it is provided with every modern convenience, the halls are heated by steam, the rooms are commodious, well lighted and ventilated, and heated by open grates. The house is provided with a private parlor and reading-room for patients. The dining-room is large, handsomely finished, and furnished with small tables, securing privacy at meals for those who do not care to have meals served in their own rooms. Patients can be as secluded, should they desire it, as in a well appointed hotel. Each patient is examined by Dr. Sutton, and receives his daily personal attention, while Dr. J. H. Williamson, a physician of ample hospital experience, resides in the Institution, and has, under Dr. Sutton, the immediate care of the patients. The Institution accommodates 25 patients, and is equal in comfort to the best hotels.

Electricity, baths, douches, massage, local treatment, general medication and surgical operations are resorted to according to the requirements of each patient.

For further information address the Matron

MISS KENNEDY,

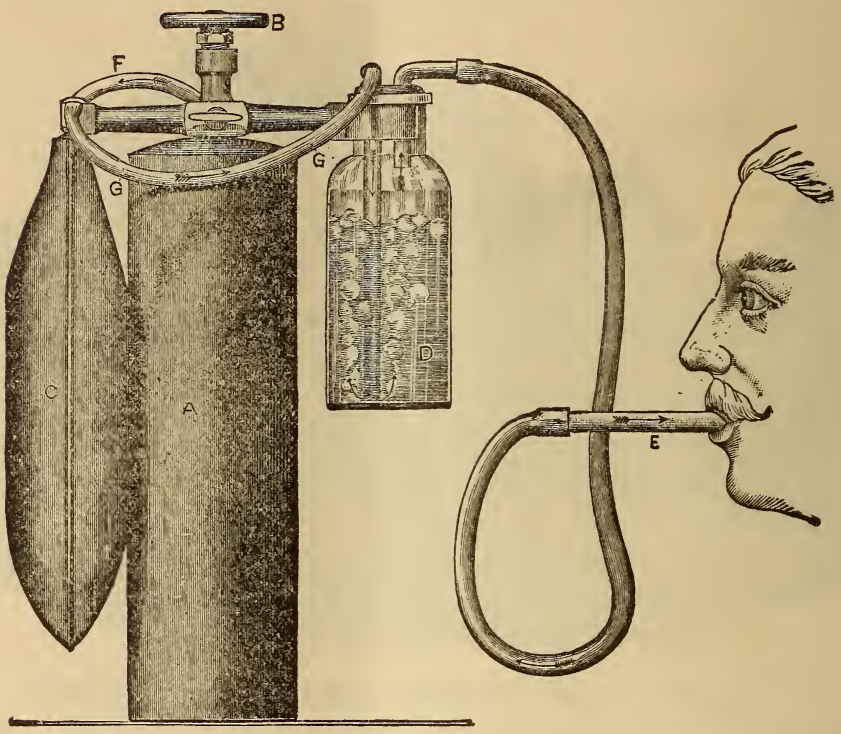
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

SPECIAL and RELIABLE FORMULÆ for PHYSICIANS' PRESCRIBING

The Coating will Dissolve in 4½ Minutes.

PIL. SUMBUL COMP.
(Wm. R. Warner & Co.)

(DR. GOODELL.)

℞—Ext. Sumbul.....1 gr. | Ferri Sulph. Ext.....1 gr.
Assafœtida.....2 gr. | Ac. Arsenious.....1-30 gr.

"I use this pill for nervous and hysterical women who need building up." This pill is used with advantage in neurasthenic conditions in connection with Warner & Co.'s Bromo-Soda, one or two pills taken three times a day.

PIL. LADY WEBSTER.
(Wm. R. Warner & Co.)

℞ Pulv. Aloes.....2 gr. | Pulv. Rose los.....½ gr.
" Mastic .... ½ gr. | M. ft. one pill.

Lady Webster Dinner Pills. This is an excellent combination officially designated as Aloes and Mastich, U. S. P. We take very great pleasure in asking physicians to prescribe them more liberally, as they are very excellent as an aperient for persons of full habit or gouty tendency when given in doses of one pill after dinner.

PIL. ALOIN, BELLADONNA, AND STRYCHNINE.
(Wm. R. Warner & Co.)

℞—Aloin, 1-5 gr. Strychnine, 1-60 gr. Ext. Belladonna, ⅛ gr.

Medical Properties—Tonic, Laxative. Dose, 1 to 2 Pills.

Try this Pill in habitual constipation.

PIL. ARTHROSIA.
(Wm. R. Warner & Co.)

FOR CURE OF RHEUMATISM AND RHEUMATIC GOUT.

Formula.—Acidum Salicylicum; Resina Podophyllum; Quinia; Ext. Colchicum; Ext. Phytolacca; Capsicum.

Almost a specific in Rheumatic and Gouty Affections.

PIL. CHALYBEATE COMP.
(Wm. R. Warner & Co.)

Same as Pil. Chalybeate, with 1-6 gr. Ext. Nux Vomica added to each Pill to increase the tonic effect. Dose, 1 to 3 Pills.

PIL. DIGESTIVA.
(Wm. R. Warner & Co.)

A VALUABLE AID TO DIGESTION.

℞—Pepsin Conc't.....1 gr. | Gingerine.....1-16 gr.
Pv. Nux Vom..... ¼ gr. | Sulphur.....⅛ gr.
IN EACH PILL.

This combination is very useful in relieving various forms of Dyspepsia and Indigestion, and will afford permanent benefit in cases of enfeebled digestion, where the gastric juices are not properly secreted.

As a dinner pill, Pil. Digestiva is unequalled, and may be taken in doses of a single pill either before or after eating.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

GOUDRON DE BLOUNT

PREPARED FROM THE GENUINE CAROLINA TAR.

DOSE.—One fluid drachm four or more times a day (as indicated), either full strength, diluted, or, in combination.

INDICATIONS.—Chronic and acute affections of the Air Passages, Coughs, Colds, Bronchitis, Asthma and Consumption.

WILLIAM MURRELL, M.D., F.R.C.P.,

Lecturer on Pharmacology and Therapeutics at the Westminster Hospital; Examiner in Materia Medica to the Royal College of Physicians of London; Fellow of the Medico-Chirurgical College of Philadelphia,

Says:—"I have used with success 'Goudron de Blount.' The results have been good, and the preparation is popular with patients."

REASONS FOR SPECIFYING FAIRCHILD'S PEPSIN.

It is the most active, gives the greatest value for the price asked.

One grain will digest more albumen than will a grain of any other pepsin made. We do not care by whose test, what the proportions of albumen, water, and acid, only let the conditions be the same for all.

It is positively guaranteed to be permanent. It will not get soft or sticky, or deteriorate in value, because it is not a peptone. It is free from all the well-known characteristics of peptone. It is not made by a patented or pirated process.

If you prescribe pepsin in scale or powder, and it becomes sticky, you may be sure that it is not Fairchild's. Investigate the matter, place the blame where it belongs.

There are pepsins "made to sell" under the title of scales—products which are inferior and dissimilar to Fairchild's pepsin in scales. They are peptones made by a patented process and sold under cover of a title first and properly used only by Fairchilds to describe their original, true pepsin in the form of scales.

The druggist is told "they are just as good as Fairchild's. If Fairchild's is not specified, put in mine." But claims and pretensions, however colossal, cannot make peptones permanent.

There is no soluble or peptone pepsin equal in activity to Fairchild's, none which will keep in all weathers and all conditions as Fairchild's will.

FAIRCHILD BROS. & FOSTER, NEW YORK.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month; thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

RIO CHEMICAL CO., ST. LOUIS, MO., U. S. A.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical Department, State University of Iowa,

AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address

DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

COLLEGE OF PHYSICIANS AND SURGEONS

OF BALTIMORE, Md.

The Preliminary Course will begin September 15, 1890.

The Regular Session will open October 1, 1890, and close April 1, 1891. For catalogue containing full information, write to

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

's the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges. Please mention this journal.

JOHN WYETH & BROTHER'S

Soluble Compressed Hypodermic Tablets.

Recent improvements in our Hypodermic Compressing Machines enable us now to manufacture these tablets entirely free from any foreign material, thus insuring immediate solution and

Freedom from all possibility of Local Irritation.

Put up in cases of 10 tubes, each tube containing 20 tablets. Also, in bottles of 100 each.

1 Morphinæ Sulphas 1-2 grain.
2 Morphinæ Sulphas 1-3 grain.
3 Morphinæ Sulphas 1-4 grain.

73 Trinitrin 1-150 grain.
74 Trinitrin 1-200 grain.

We claim for our Hypodermic Tablets:

Absolute Accuracy of Dose.
Ready and Entire Solubility.
Perfect Preservation of the Drug.

Their convenience and utility will at once be apparent on examination.

They are put up in Cylindrical Tubes, convenient for carrying in Hypodermic or Pocket case, ten tubes in a box, with twenty tablets in each tube.

NOTE.—It will only be necessary in ordering to specify the numbers, as above. Wyeth's Manufacture. These Tablets will be sent by mail, on receipt of the proper amount.

PHILADELPHIA, PA.

Doctor:

How is that case of scrofula getting along? About the same old way as it has for years, is it not?

You see by this time that the alteratives and general tonics give but temporary benefit. Sometimes, in fact, they irritate and aggravate the case.

Did you ever think what is the real pathology of scrofula?

It is deficiency or degeneration of the tissue walls. This allows extravasations of blood, and diapedesis of white corpuscles, forming eruptions and suppuration. It is not "bad blood," but bad tissues.

Notice that rickety building over there. It is crumbling while those near it, much older, are still strong. What is the matter? Bad bricks and mortar in its walls. It can be stayed awhile with props, but soon the radical change must come of tearing it down and building it over with good material.

Now, Doctor, your scrofulous patient is in the same condition, with this difference: Nature is constantly removing the old material in his tissue walls, and replacing it with new. In seven years, without any cessation in his existence, he will be composed of entirely new material. This gives you a golden opportunity to put in some extra good material.

What shall it be?

Shall it be iron, quinine, strychnine, arsenic and manganese? No. They only prove to be irritants. The only remedy is the hypophosphites of lime and soda—the true reconstructives of the tissues. By using them faithfully and constantly you will gain gradual improvement at once and permanent cure in a few years.

You see the philosophy of it, don't you?

The only chemically pure preparation of these tissue foods is McArthur's Compound Syrup of the Hypophosphites of Lime and Soda. All others contain, in addition, the irritant "tonics," so delusive in their results. Be sure that your patients are served with none other than McArthur's. You can add to it in the prescription any other remedy specially indicated at special times.

Other diseases particularly requiring this remedy are Tuberculosis (twin brother of Scrofula), Rachitis, Chronic Cough, Chronic Bronchitis and Throat Affections, Chronic Alcoholism, Impotence, Nervousness, General Debility, Brain Exhaustion, Loss of Memory, Chronic or Wasting Diarrhœa, Suppurating Discharges and Sores, Uterine Fibroids, and all diseases characterized by waste or faulty nutrition.

Write your prescription thus:

℞ Syr: Hypophos: Comp: McArthur: One Bottle.

As it is made *only for Physicians*, there are no printed wrappers or other advertisements on the bottle.

Our pamphlet on the "Curability and Treatment of Consumption" sent free to physicians upon application. We will send one bottle of McArthur's Syrup free to any physician who will pay the express charges.

McARTHUR HYPOPHOSPHITE CO.,
BOSTON, MASS.

The Model Ledger

enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

W. H. Schieffelin & Co.,

170 & 171 William Street,

NEW YORK.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

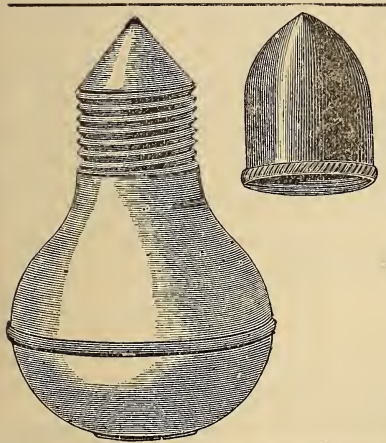
For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address,

DRS. S. S. & S. E. STRONG.



THE P.P.P. SYRINGE

Is universally considered the most perfect urethral Syringe in the market, because it combines within itself all desirable qualities. It measures but 1½ x 2¾ inches, has a capacity of fully half an ounce, and is made of one piece of soft rubber with conical point. To protect this soft point and to prevent pocket dust from getting into the Syringe, a Hard Rubber cap screws air-tight over it and enables the patient to carry it in his pocket filled with the injection ordered, ready for use when away from home.

For sale by all druggists.

THE GOODYEAR RUBBER CO.,

49 MAIDEN LANE, NEW YORK.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) **of**

Tinct. Nux Strychnos,	1 minim.
" Ignatia Amara,	1 "
" Cinchona,	4 "
" Matricaria,	1 "
" Gentian,	½ "
" Columbo,	½ "
" Phosphorus, C. P.,	1-300 gr.
Aromatics,	2 minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

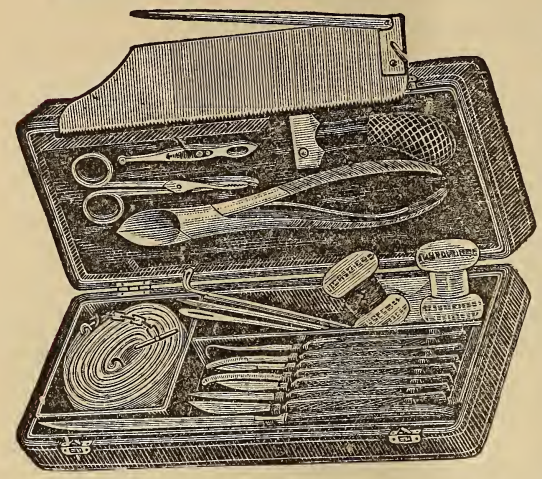
LENTZ'S ASEPTIC COMPACT OPERATING SET, No. 10.



We have from time to time made improvements to this set and are now making a perfect aseptic set, which offers especial facilities for aseptic precautions; the blades are soldered into hollow German-silver handles, nickel-plated, are light so as not to be unwieldy and admit of a firm grasp when operating.

The saw is adjusted to the handle on an entirely new principle, being made to separate easily and to facilitate thorough cleansing.

The handle is entirely of metal and fenestrated to overcome unnecessary weight.

Scissors and Forceps having French locks can be separated, and the slide can be easily removed from Artery and Needle Forceps.

Therefore, no opportunity is offered for the lodgment and development of germs.

The entire set is patterned with especial reference to facility in cleansing.

The instruments can be sterilized by placing them in boiling water, without fear of damaging them. Wood or rubber handles will not admit of this procedure. For price, see case A.

The following instruments are put up in either a fine Mahogany or Morocco case, with nickel trimmings, lined with velvet, and has an extra space for Trephine with handle, and Elevator if desired.

One Amputating Knife (6 in. blade); One Finger Knife; One Hernia Knife; One Sharp Curved Bistoury; Two Scalpels; One Tenotome; One Tenaculum; One Pair Scissors, curved or flat; One Saw (9 in. blade); One Liston's Bone Forceps, with Spring; One Artery and Needle Forceps, improved; One Esmarch's Flat Rubber Tourniquet, with Chain; One Hæmostatic Forceps; One Director, with Aneurism Needle; Two Silver Probes; Silk, Wire, Wax and Needles.

With the Sixteen Instruments Contained in this Case, any Ordinary Operation may be Performed.

SIZE, 11 INCHES LONG, 4 INCHES WIDE, 2 INCHES HIGH.

A.—German Silver aseptic Handles on Knives and Saw, ... **$34 00**
B.—Hard Rubber aseptic Handles on Knives and Saw, ... **29 00**
C.—Ebony Handles on Knives and Saw (as shown in illustration), ... **25 00**
Either Set, with Trephine and Elevator in addition, ... **4 65**

DISCOUNT 25 PER CENT. TO PHYSICIANS. Our Catalogue of 260 pages will be sent on receipt of 10 cts. for postage.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

EXTRACT FROM AN ARTICLE

IN THE

"Medical Press and Circular,"

BY

EDWARD WARREN-BEY, M. D., C. M., LL. D.,

Chevalier of the Legion of Honour.

To those familiar with the use of BROMIDIA, no argument is necessary, for it speaks for itself, by fulfilling the indications for which it is administered with a certainty, efficiency, and harmlessness which elicit at once the wonder of the patient and the delight of the prescriber, and give to the profession the assurance of possessing one remedy at least which approximates so near to infallibility of action as to justify the title of *specific.*

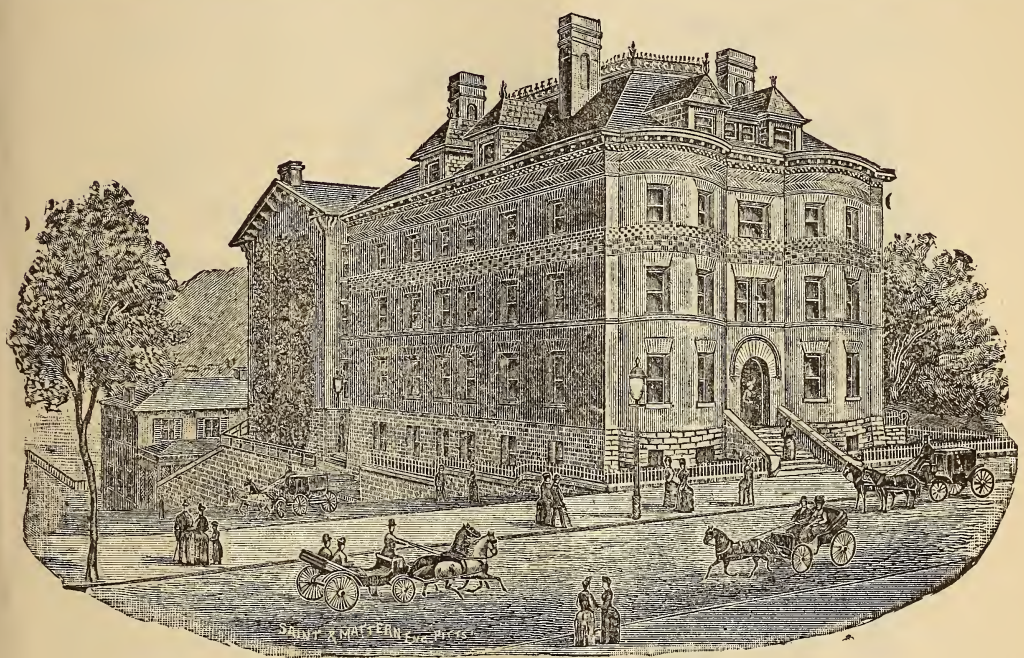
DR. R. S. SUTTON'S

Sanatorium for Diseases of Women.



Eighth Year Opens September 1, 1890.

ALLEGHENY CITY, PA.

This Institution is located on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers; it commands a view of the city of Pittsburgh, and its picturesque surroundings. The building is large and beautiful, it is provided with every modern convenience, the halls are heated by steam, the rooms are commodious, well lighted and ventilated, and heated by open grates. The house is provided with a private parlor and reading-room for patients. The dining-room is large, handsomely finished, and furnished with small tables, securing privacy at meals for those who do not care to have meals served in their own rooms. Patients can be as secluded, should they desire it, as in a well appointed hotel. Each patient is examined by Dr. Sutton, and receives his daily personal attention, while Dr. J. H. Williamson, a physician of ample hospital experience, resides in the Institution, and has, under Dr. Sutton, the immediate care of the patients. The Institution accommodates 25 patients, and is equal in comfort to the best hotels.

Electricity, baths, douches, massage, local treatment, general medication and surgical operations are resorted to according to the requirements of each patient.

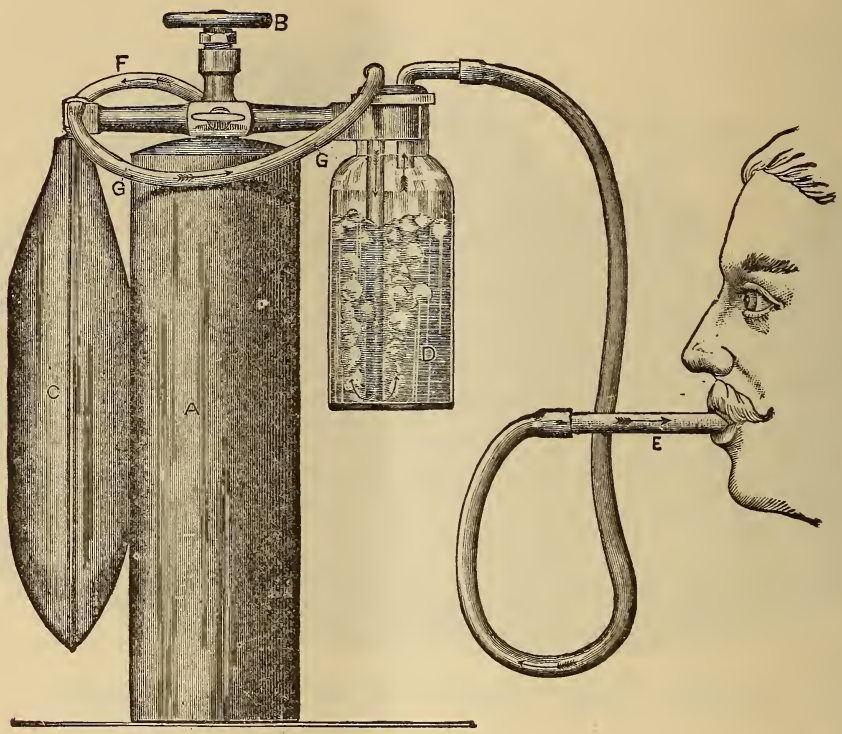
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S

COMPRESSED ANTISEPTIC PASTILLES.

(Dr. CARL SIELER'S FORMULÆ.)

FOR MAKING ANTISEPTIC SPRAYS, NASAL WASH, MOUTH WASH, Etc.

One tablet dissolved in four tablespoonfuls of warm water makes a solution which can be used as a spray or wash.

Supplied in bottles of 50, 100 and 1 lb.

COMPRESSED ANTISEPTIC TABLETS.

(FOR EXTERNAL USE.)

Each tablet contains:

7.3 grains . . . . . Hydrarg. Bichlor.
7.7 grains . . . . . Ammon. Clor.

One tablet dissolved in one pint of water will make a 1 to 1,000 solution, containing one part of Corrosive Sublimate in 1,000 parts of water.

Supplied in screw-cap bottles, containing 25 and 100 tablets each, and pounds.

FRENCH'S

COMPRESSED SULPHUR and CREAM OF TARTAR TABLETS.

An alterative and mild laxative for children and invalids. They are pleasantly flavored and sweetened, and form an agreeable method of medication.

FORMULA:

Sulphur Lotum, U. S. P. . . . . grs. v.
Potass. Bitart., pur. . . . . grs. xv in each tablet.

Put up in metal screw-cap glass jars, containing 35 tablets each. Also in 1 lb. bottles.

A sample of any of these preparations will be mailed to physicians free of charge, on application.

FOR SALE BY THE RETAIL DRUG TRADE GENERALLY.

FRENCH, RICHARDS & CO., Philadelphia, Pa.

To PHYSICIANS.

THE FOREMOST COCOA OF EUROPE
THE COMING ONE OF AMERICA.

VAN HOUTEN'S
"Best and Goes Farthest."

Physicians will do well in recommending, as their European colleagues do, VAN HOUTEN'S COCOA for daily family use. Now that the profession is deprecating the habitual use of alcoholic liquors, and as even tea and coffee are found too exciting for many temperaments—to say nothing of the growing number of cases of nervous disorder in this age of hot haste and feverish anxiety—the question of what beverage may be recommended, as at once refreshing and innocuous, is assuming the highest importance.

VAN HOUTEN'S
Most Appetizing. Easily Digested.

Cocoa has long been known as a useful article of diet, and its claims are steadily winning recognition. Unlike tea or coffee, it is not only a stimulant but a nourisher; and it has the great advantage of leaving none of their narcotic effects on the system. For this reason it is adapted to general use. The strong may take it with pleasure, and the weak with impunity.

VAN HOUTEN'S
The Original—Most Soluble.

"Pure soluble cocoa" is an invention of Mr. C. J. Van Houten, who patented this invention in Holland. Thus all other "pure soluble cocoas" are imitations. The process of manufacturing Van Houten's cocoa is still, to-day, a secret of C. J. Van Houten & Zoon. Chemists and medical men of the highest standing say, universally, that their observation shows that the Van Houtens do exactly what science would suggest for the conversion of raw cocoa into a satisfactory article of food. They simply remove some of the originally contained fat, which is apt to disagree with the system, and in some ingenious manner, increase the solubility of flesh-forming constituents.

VAN HOUTEN'S
"Once Tried, Always Used."

To remove excess of fat is always desirable. Some manufacturers do this by largely diluting the ground cocoa with starch. A cupful of thick beverage may thus be made, which no doubt contains a diminished amount of fat, but of course also contains a diminished amount of every other constituent of the cocoa. For persons who desire a thick, starch-like beverage, such a mixture, miscalled "soluble" cocoa, may be unobjectionable, though the cocoa in it is less easy of digestion than Van Houten's preparation. A far better method, however, is to extract, as the Van Houtens do, one part of the fat from four of cocoa, and, as a consequence, render each of the valuable constituents remaining, one-third more effective than before. Instead of being weakened by starch, Van Houten's cocoa is thus made one-third stronger in every one of its valuable properties.

VAN HOUTEN'S
"Largest Sale in the World."

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical Department, State University of Iowa,

AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address

DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

COLLEGE OF PHYSICIANS AND SURGEONS

OF BALTIMORE, Md.

The Preliminary Course will begin September 15, 1890.

The Regular Session will open October 1, 1890, and close April 1, 1891. For catalogue containing full information, write to

Professor of Chemistry and Toxicology.
JOHN NOLAND MACKENZIE, M. D.,
Clinical Professor of Diseases of the Throat and Nose.

Professor of Anatomy.

Demonstrator of Anatomy.

For catalogue and further information, address: **Dr. I. E. ATKINSON, Dean, 605 Cathedral Street.**

DENTAL DEPARTMENT.

Ninth Annual Announcement. Next regular session begins October 1st, 1890. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY:

FRED. J. S. GORGAS, M. D., D.D.S.,
Professor of Principles of Dental Science, Dental Surgery, and Dental Mechanism.
JAMES H. HARRIS, M. D., D.D.S.,
Professor of Operative and Clinical Dentistry.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.

Professor of Anatomy.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D.D.S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D.D.S.,
Demonstrator of Operative Dentistry.

Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For catalogue and other information, apply to **Dr. F. J. S. GORGAS, Dean, 845 Eutaw Street, Baltimore.**

Philadelphia Polyclinic and College for Graduates in Medicine.

THE POLYCLINIC HOSPITAL, NORTHWEST CORNER BROAD AND LOMBARD STS.

PROFESSORS:

Emeritus Professor of Surgery—R. J. LEVIS, M. D.
Emeritus Professor of Diseases of the Throat—J. SOLIS-COHEN, M. D.
Emeritus Professor of Diseases of the Ear—CHARLES H. BURNETT, M. D.
Emeritus Professor of General and Orthopædic Surgery, CHARLES B. NANCREDE, M. D.
Applied Anatomy and Operative Surgery—JOHN B. ROBERTS, M. D.
Diseases of the Mind and Nervous System—CHARLES K. MILLS, M. D.
Clinical Chemistry and Hygiene—HENRY LEFFMANN, M. D.
Diseases of the Skin—ARTHUR VAN HARLINGEN, M. D.
Diseases of the Eye—GEORGE C. HARLAN, M. D.
Genito-Urinary and Venereal Diseases—J. HENRY C. SIMES, M. D.
Gynæcology—B. F. BAER, M. D.
Operative Surgery—LEWIS W. STEINBACH, M. D.
Diseases of the Chest—THOMAS J. MAYS, M. D.
Diseases of Throat and Nose—ALEXANDER W. MACCOY, M. D.
Orthopædic Surgery—H. AUGUSTUS WILSON, M. D.
Diseases of the Eye—EDWARD JACKSON, M. D.
Clinical Medicine and Applied Therapeutics—SOLOMON SOLIS-COHEN, M. D.
Diseases of the Mind and Nervous System—S. WEIR MITCHELL, M. D., LL. D.
Diseases of the Ear—B. ALEX. RANDALL, M. D.
Obstetrics and Diseases of Children—EDW. P. DAVIS, M. D.
Orthopædic Surgery—THOMAS G. MORTON, M. D.
Clinical Surgery—THOMAS S. K. MORTON, M D.
Experimental Therapeutics and Physiology—THOMAS J. MAYS, M. D.

Practical individual instruction, Clinical and Demonstrative, to physicians only, during the entire year. Fee for any one branch for six weeks, **$15.00**; General Ticket for twelve Clinical branches, **$100.00**; Tickets good for one Clinic weekly for three months, issued on application. For Announcement, with full particulars of CLINICAL AND LABORATORY COURSES, address

S. SOLIS-COHEN, M. D., Secretary.

MEDICO-CHIRURGICAL COLLEGE
OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE
OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S
PRIVATE SANITARIUM
3607 Locust Street
PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY

1706 Walnut Street, Philadelphia

Detroit College of Medicine.

A FIRST-CLASS School of Medicine, with all modern facilities. Excellent corps of Instructors. Clinical advantages unsurpassed. Send for Catalogue.

ESTABLISHED 16 YEARS. BEWARE OF IMITATIONS.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE.

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, **"With Iron, No. 1;"** while the same preparation, **Without Iron,** is designated on the label as **"No. 2."**

In prescribing this preparation, physicians should be particular to mention *"COLDEN'S,"* viz., *"Ext. Carnis Fl. Comp. (Colden."* A Sample of **COLDEN'S BEEF TONIC** will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

C. N. CRITTENTON, General Agent, 115 Fulton St., New York.

GLENN'S SULPHUR SOAP.

BEWARE OF COUNTERFEITS.

Physicians know the great value of the local use of Sulphur in the **Treatment of Diseases of the Skin.**

Constantine's Pine-Tar Soap.

THE BEST SOAP MADE.

Has been on trial among physicians for very many years as a healing agent. **By far the Best Tar Soap made.**

Wholesale Depot, C. N. CRITTENTON, 115 Fulton St, New York.

Samples of above Soaps SENT FREE, on application, to any Physician enclosing card

THIRD EDITION.

ACCIDENTS AND EMERGENCIES

By CHARLES W. DULLES, M.D.

"A work that ought to be in every home, and every home that has a copy kept where it can be consulted at short notice is likely to find it worth many times its small cost."—*Philadelphia Evening Telegraph,* May 5, 1888.

"The methods of treatment recommended are trustworthy and reliable. The manual is one of the best of this class of books and should be in the library of every householder, ready for reference at a moment's notice."—*Science,* May 18, 1888.

Sent on receipt of 75 Cents.

ADDRESS:

Publisher **Medical and Surgical Reporter,**

P.O. Box 843. PHILADELPHIA, PA.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

MILK OF MAGNESIA.

A PURE HYDRATED OXIDE OF MAGNESIUM.—(MgH_2O_2.)

ANTACID AND CORRECTIVE.

Especially recommended in the Gastro-intestinal irritations of infant, child and adult life—Nausea—Vomiting in Pregnancy—Sour Stomach—Diarrhœa—Cholera Infantum—and the Rheumatic and Gouty conditions resulting from acid secretions.

This Hydrate presents Magnesia practically in solution without grittiness or precipitation—No danger from concretions as with the calcined—Free from Carbonic Acid—Miscible with other fluids—in a form easy of administration and absorption. Superior to lime water or chalk mixture for addition to milk. It is not a purge: but in antacid, corrective or mild laxative indications will be found reliable and safe. It combines well with Syrup Rhubarb—Soda—Opium—the various astringents, etc.

PHOSPHO-MURIATE OF QUININE,

COMPOUND,

A RELIABLE ALTERATO-CONSTRUCTIVE,

Particularly indicated in conditions of **disturbed nutrition** and **tissue retrograde.**

An easily appropriated general tonic, promoting digestion, and safe under prolonged use. A permanent combination of the soluble Wheat Phosphates, with Muriate of Quinine, Iron and Strychnia.

Of greater strength than the various Hypophosphite compounds.

The above are put up in Dispensing and Trade Containers.

DIGESTIBLE COCOA.
WHEAT PHOSPHATES.
COD LIVER OIL EMUL.

THE CHAS. H. PHILLIPS CHEMICAL CO.,
77 PINE STREET, NEW YORK.

CH. MARCHAND'S

Peroxide of Hydrogen,

MEDICINAL (ABSOLUTELY HARMLESS)

H_2O_2

is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a nostrum.

Experiments of Prof. Pasteur, Dr. Koch, and many other scientific authorities, prove beyond doubt that Germs, Bacteria, or Microbes cause and develop: **NOSE, THROAT, AND LUNG DISEASES—Diphtheria, Croup, Sore Throat, Catarrh of the Nose, Hay Fever, Bronchitis, Laryngitis, Pharyngitis, Whooping Cough, Consumption and other Chronic Affections, specific or not.**

GERMS, BACTERIA, OR MICROBES are instantaneously annihilated when brought into contact with **Ch. Marchand's Peroxide of Hydrogen.** This wonderful bactericide acts both chemically and mechanically upon all excretions and secretions, so as to thoroughly change their character and reactions instantly. By destroying the microbian element this remedy removes the cause of the disease.

CAUTION.—I would earnestly impress upon the profession the very great importance of prescribing only my Peroxide of Hydrogen (Medicinal), from which all hurtful chemicals have been eliminated.

By specifying in your prescriptions "**Ch. Marchand's Peroxide of Hydrogen (Medicinal)**," which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon.

Prepared only by

Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of **Ch. Marchand's Peroxide of Hydrogen (Medicinal)**, with opinions of the profession, will be mailed to physicians free of charge on application.

¼ lb. bottle, retail, 35 cents; ½ lb. bottle, retail, 50 cents; 1 lb. bottle, retail, 75 cents.

SOLD BY LEADING DRUGGISTS.

Laboratory, 10 West Fourth Street, New York.

☞ **Mention this Paper.**

THE P.P.P. SYRINGE

Is universally considered the most perfect urethral Syringe in the market, because it combines within itself all desirable qualities. It measures but 1½ x 2¾ inches, has a capacity of fully half an ounce, and is made of one piece of soft rubber with conical point. To protect this soft point and to prevent pocket dust from getting into the Syringe, a Hard Rubber cap screws air-tight over it and enables the patient to carry it in his pocket filled with the injection ordered, ready for use when away from home.

For sale by all druggists.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

170 and 172 William Street,

NEW YORK.

Glycones

Contain 95 per cent. Pure Glycerin.

Made in both Adult and Infant Sizes.

FOR THE IMMEDIATE RELIEF OF CONSTIPATION.

Glycones are incomparably superior to the glycerin suppositories on the market, inasmuch as the covering is impervious to moisture, unchangeable and easily removed, preserving the Glycones in all climates. The constitution of the Glycones is so modified as to cause no irritation of the rectum.

The value of Glycones in Constipation is well established, painless and copious stools being promptly produced. The Glycerin acts by lubrication and solution of the indurated feces and by stimulating the bowel, thus providing a certain and agreeable method of emptying the colon at pleasure.

After inserting, the Glycone should be retained as long as possible in order to obtain the best results.

Glycones. These invaluable "peristaltic persuaders" are prepared in a most excellent and improved manner by Messrs. Eli Lilly & Co., of Indianapolis. Their Glycones contain 95 per cent. of glycerin, and a beauty of their construction is the peculiar water-proof covering of each Glycone, which is readily and easily removed. By simply pressing upon or slightly squeezing the Glycone between the fingers it slips out with astonishing ease, leaving the covering between the fingers. A great improvement, as any one will readily recognize who has ever made the effort to divest one of the ordinary Suppositories from its lead foil and tissue-paper envelope.—*Medical Practitioner*, Oct., 1889.

FOR SALE BY ALL DRUGGISTS.

Price, 35c. per box (one doz. Glycones), sent by mail.

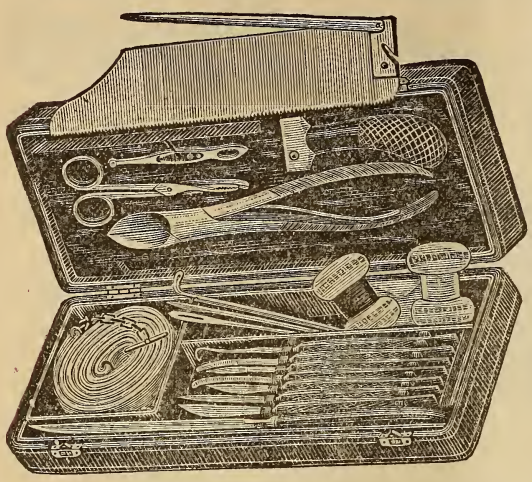
LENTZ'S ASEPTIC COMPACT OPERATING SET, No. 10.



We have from time to time made improvements to this set and are now making a perfect aseptic set, which offers especial facilities for aseptic precautions; the blades are soldered into hollow German-silver handles, nickel-plated, are light so as not to be unwieldy and admit of a firm grasp when operating.

The saw is adjusted to the handle on an entirely new principle, being made to separate easily and to facilitate thorough cleansing.

The handle is entirely of metal and fenestrated to overcome unnecessary weight.

Scissors and Forceps having French locks can be separated, and the slide can be easily removed from Artery and Needle Forceps.

Therefore, no opportunity is offered for the lodgment and development of germs.

The entire set is patterned with especial reference to facility in cleansing.

The instruments can be sterilized by placing them in boiling water, without fear of damaging them. Wood or rubber handles will not admit of this procedure. For price, see case A.

The following instruments are put up in either a fine Mahogany or Morocco case, with nickel trimmings, lined with velvet, and has an extra space for Trephine with handle, and Elevator if desired.

One Amputating Knife (6 in. blade); One Finger Knife; One Hernia Knife; One Sharp Curved Bistoury; Two Scalpels; One Tenotome; One Tenaculum; One Pair Scissors, curved or flat; One Saw (9 in. blade); One Liston's Bone Forceps, with Spring; One Artery and Needle Forceps, improved; One Esmarch's Flat Rubber Tourniquet, with Chain; One Hæmostatic Forceps; One Director, with Aneurism Needle; Two Silver Probes; Silk, Wire, Wax and Needles.

With the Sixteen Instruments Contained in this Case, any Ordinary Operation may be Performed.

SIZE, 11 INCHES LONG, 4 INCHES WIDE, 2 INCHES HIGH.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

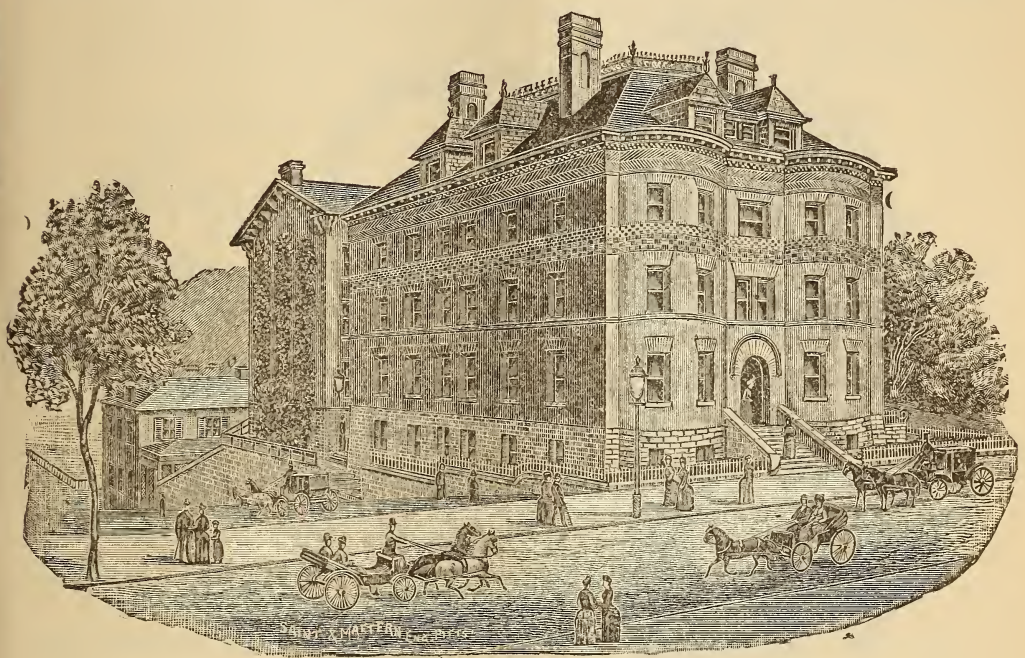
DR. R. S. SUTTON'S

Sanatorium for Diseases of Women.



Eighth Year Opens September 1, 1890.

ALLEGHENY CITY, PA.

This Institution is located on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers; it commands a view of the city of Pittsburgh, and its picturesque surroundings. The building is large and beautiful, it is provided with every modern convenience, the halls are heated by steam, the rooms are commodious, well lighted and ventilated, and heated by open grates. The house is provided with a private parlor and reading-room for patients. The dining-room is large, handsomely finished, and furnished with small tables, securing privacy at meals for those who do not care to have meals served in their own rooms. Patients can be as secluded, should they desire it, as in a well appointed hotel. Each patient is examined by Dr. Sutton, and receives his daily personal attention, while Dr. J. H. Williamson, a physician of ample hospital experience, resides in the Institution, and has, under Dr. Sutton, the immediate care of the patients. The Institution accommodates 25 patients, and is equal in comfort to the best hotels.

Electricity, baths, douches, massage, local treatment, general medication and surgical operations are resorted to according to the requirements of each patient.

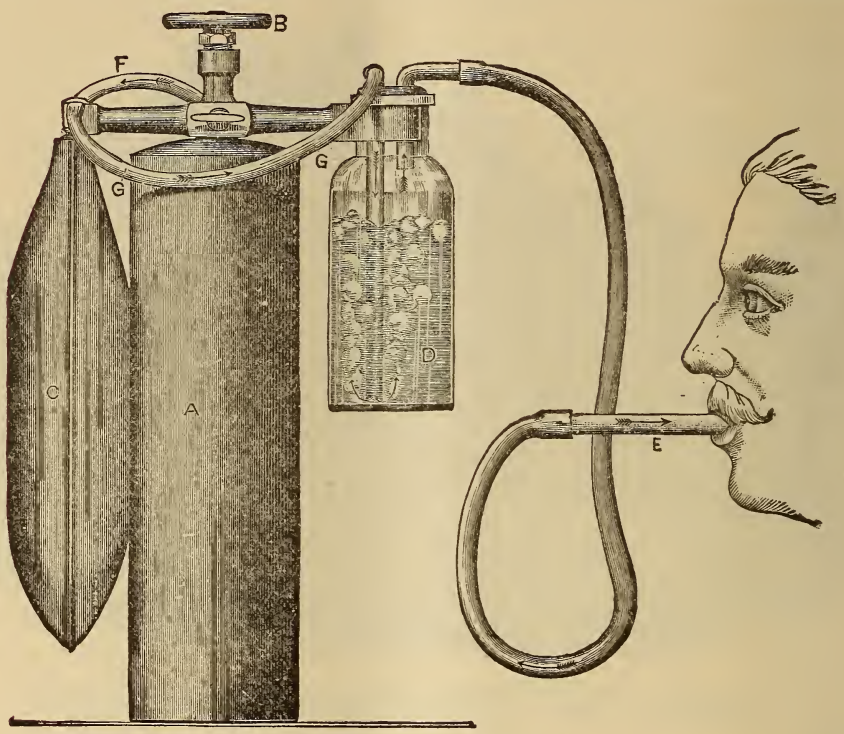
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S

COMPRESSED ANTISEPTIC PASTILLES.

(Dr. CARL SIELER'S FORMULÆ.)

FOR MAKING ANTISEPTIC SPRAYS, NASAL WASH, MOUTH WASH, Etc.

One tablet dissolved in four tablespoonfuls of warm water makes a solution which can be used as a spray or wash.

Supplied in bottles of 50, 100 and 1 lb.

COMPRESSED ANTISEPTIC TABLETS.

(FOR EXTERNAL USE.)

Each tablet contains:

7.3 grains . . . . . Hydrarg. Bichlor.
7.7 grains . . . . . Ammon. Clor.

One tablet dissolved in one pint of water will make a 1 to 1,000 solution, containing one part of Corrosive Sublimate in 1,000 parts of water.

Supplied in screw-cap bottles, containing 25 and 100 tablets each, and pounds.

FRENCH'S

COMPRESSED SULPHUR and CREAM OF TARTAR TABLETS.

An alterative and mild laxative for children and invalids. They are pleasantly flavored and sweetened, and form an agreeable method of medication.

FORMULA:

Sulphur Lotum, U. S. P. . . . . grs. v.
Potass. Bitart., pur. . . . . grs. xv in each tablet.

Put up in metal screw-cap glass jars, containing 35 tablets each. Also in 1 lb. bottles.

A sample of any of these preparations will be mailed to physicians free of charge, on application.

FOR SALE BY THE RETAIL DRUG TRADE GENERALLY.

FRENCH, RICHARDS & CO., Philadelphia, Pa.

GASTRIC DERANGEMENTS.

HORSFORD'S ACID PHOSPHATE.

Unlike all other forms of phosphorus in combination, such as dilute phosphoric acid, glacial phosphoric acid, neutral phosphate of lime, hypophosphites, etc., the phosphates in this product are in solution, and readily assimilative by the system, and it not only causes no trouble with the digestive organs, but promotes in a marked degree their healthful action.

In certain forms of dyspepsia it acts as a specific.

Dr. H. R. MERVILLE, Milwaukee, Wis., says: "I regard it as valuable in the treatment of gastric derangements affecting digestion."

Send for descriptive circular. Physicians who wish to test it will be furnished a bottle on application, without expense, except express charges.

Prepared under the direction of Prof. E. N. HORSFORD, by the

Rumford Chemical Works, Providence, R. I.

Beware of Substitutes and Imitations.

CAUTION:—Be sure the word "HORSFORD'S" is PRINTED on the label. All others are spurious. NEVER SOLD IN BULK.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) **of**

Tinct. Nux Strychnos,	1 minim.
" Ignatia Amara,	1 "
" Cinchona,	4 "
" Matricaria,	1 "
" Gentian,	½ "
" Columbo,	½ "
" Phosphorus, C. P.,	1-300 gr.
Aromatics,	2 minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

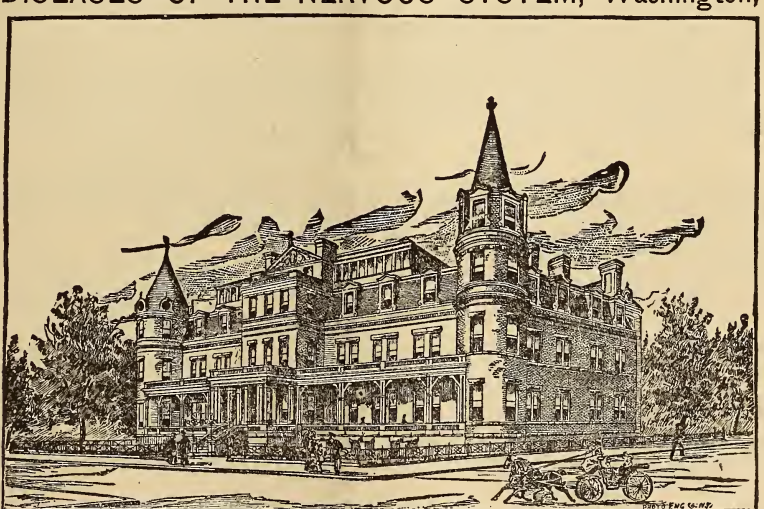
A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

DR. WILLIAM A. HAMMOND'S SANITARIUM,

FOR DISEASES OF THE NERVOUS SYSTEM, Washington, D. C.



DR. WILLIAM A. HAMMOND announces to the medical profession that he has returned from New York to Washington, D. C., where he has established, in a building especially erected for the purpose, a *Sanitarium* for the treatment of mild and curable cases of mental derangement, diseases of the nervous system generally, cases of the morphia and chloral habits, and such other affections as may properly be treated by the remedial agencies under his control.

The *Sanitarium* is situated on Columbia Heights, at the corner of Fourteenth Street and Sheridan Avenue. The position is the highest in the immediate vicinity of Washington, the soil is dry, and all the surroundings are free from noxious influences. Electricity in all its forms, baths, douches, massage, inhalations, nursing, etc., are provided as may be required by patients, in addition to such other medical treatment as may be deemed advisable.

A large *Solarium* for sun-baths and exercise in cold or inclement weather and heated with steam in winter, is constructed on the top of the main building.

The *Sanitarium* has now been in successful operation since the 7th of January, 1889.

For further information Dr. Hammond can be addressed at The Sanitarium, Fourteenth Street and Sheridan Avenue, Washington, D. C.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

RIO CHEMICAL CO., ST. LOUIS, MO., U. S. A.

LONDON, 16 Coleman St. CALCUTTA, 9 & 10 Dalhousie Square. PARIS, 5 Rue de la Paix. MONTREAL, 374 St. Paul St.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical Department, State University of Iowa,

AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address

DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

COLLEGE OF PHYSICIANS AND SURGEONS

OF BALTIMORE, Md.

The Preliminary Course will begin September 15, 1890.

The Regular Session will open October 1, 1890, and close April 1, 1891. For catalogue containing full information, write to

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S PRIVATE SANITARIUM

3607 Locust Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY

BATTLE & CO.,

CHEMISTS' CORPORATION,

Clinical Notes sent on Application. ST. LOUIS, MO.

REASONS FOR SPECIFYING FAIRCHILD'S PEPSIN.

It is the most active, gives the greatest value for the price asked.

One grain will digest more albumen than will a grain of any other pepsin made. We do not care by whose test, what the proportions of albumen, water, and acid, only let the conditions be the same for all.

It is positively guaranteed to be permanent. It will not get soft or sticky, or deteriorate in value, because it is not a peptone. It is free from all the well-known characteristics of peptone. It is not made by a patented or pirated process.

If you prescribe pepsin in scale or powder, and it becomes sticky, you may be sure that it is not Fairchild's. Investigate the matter, place the blame where it belongs.

There are pepsins "made to sell" under the title of scales—products which are inferior and dissimilar to Fairchild's pepsin in scales. They are peptones made by a patented process and sold under cover of a title first and properly used only by Fairchilds to describe their original, true pepsin in the form of scales.

The druggist is told "they are just as good as Fairchild's. If Fairchild's is not specified, put in mine." But claims and pretensions, however colossal, cannot make peptones permanent.

There is no soluble or peptone pepsin equal in activity to Fairchild's, none which will keep in all weathers and all conditions as Fairchild's will.

FAIRCHILD BROS. & FOSTER, NEW YORK.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

's the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND
OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED
IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them.

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

BLAUD

Doctor:

You have many cases of nervous debility to treat.

Some of them are merchants who worry over their business affairs; lawyers, teachers and ministers who do a great deal of brain work, and women worn out with the cares of the family. Others are men suffering from sexual weakness, spermatorrhea, or other forms of sexual drain.

They are coming home now from seashore and mountain, where they have been vainly seeking the restoration they thus far have failed to find. You dread to see them coming, because it only means another ceaseless round of those irritant stimulant and "tonic" remedies, which, instead of curing them, act like a whip to the wearied horse, only goading them on to hopeless incurability.

Now let us give you a secret by which you may cure these cases.

Instead of stimulating them, *feed up* the exhausted nerve tissue with the true tissue food, McArthur's Chemically Pure Syrup of the Hypophosphites of Lime and Soda.

The treatment will be restful and refreshing, and improvement will be manifest at once and permanent cure will result from steady, persistent use of the remedy. In the few special cases calling for temporary use of other remedies they can be combined in the same prescription with the Syrup. But the Syrup should be continued, month after month, until a cure has resulted.

Remember, all forms of nerve exhaustion are amenable to this treatment.

Think how much your reputation will be enhanced and your practice increased by this timely means. The great Niemeyer attributed the rapid growth of his practice to a successful prescription for anemia, for which patients used to come from great distances.

No one has yet been disappointed with McArthur's Syrup.

It is the only one containing the chemically pure hypophosphites of lime and soda without other irritant so-called tonics.

It is specially indicated also in Tuberculosis and Scrofulosis, where it builds up the tissue walls and rapidly and permanently restores the health. Also in Rachitis, Chronic Cough, Chronic Bronchitis, Alcoholism, Pregnancy and Lactation to build up the child's system through the mother, Teething, Chronic Diarrhea, Suppurating Discharges and Sores, Uterine Fibroids, and all disorders of waste or faulty nutrition.

Write your prescription thus:

℞ Syr: Hypophos: Comp: McArthur: 1 Bottle.

A valuable book, "Curability of Consumption," sent free. A large bottle sent free if you will pay express.

THE P.P.P. SYRINGE

Is universally considered the most perfect urethral Syringe in the market, because it combines within itself all desirable qualities. It measures but 1½ x 2¾ inches, has a capacity of fully half an ounce, and is made of one piece of soft rubber with conical point. To protect this soft point and to prevent pocket dust from getting into the Syringe, a Hard Rubber cap screws air-tight over it and enables the patient to carry it in his pocket filled with the injection ordered, ready for use when away from home.

For sale by all druggists.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

W. H. Schieffelin & Co.,

170 & 171 William Street,

NEW YORK.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

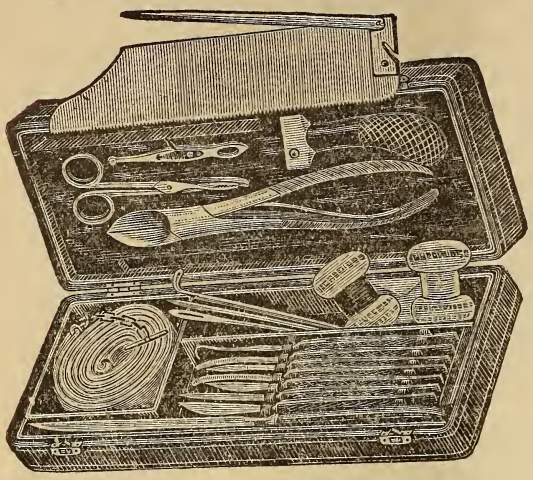
LENTZ'S ASEPTIC COMPACT OPERATING SET, No. 10.



We have from time to time made improvements to this set and are now making a perfect aseptic set, which offers especial facilities for aseptic precautions; the blades are soldered into hollow German-silver handles, nickel-plated, are light so as not to be unwieldy and admit of a firm grasp when operating.

The saw is adjusted to the handle on an entirely new principle, being made to separate easily and to facilitate thorough cleansing.

The handle is entirely of metal and fenestrated to overcome unnecessary weight.

Scissors and Forceps having French locks can be separated, and the slide can be easily removed from Artery and Needle Forceps.

Therefore, no opportunity is offered for the lodgment and development of germs.

The entire set is patterned with especial reference to facility in cleansing.

The instruments can be sterilized by placing them in boiling water, without fear of damaging them. Wood or rubber handles will not admit of this procedure. For price, see case A.

The following instruments are put up in either a fine Mahogany or Morocco case, with nickel trimmings, lined with velvet, and has an extra space for Trephine with handle, and Elevator if desired.

One Amputating Knife (6 in. blade); One Finger Knife; One Hernia Knife; One Sharp Curved Bistoury; Two Scalpels; One Tenotome; One Tenaculum; One Pair Scissors, curved or flat; One Saw (9 in. blade); One Liston's Bone Forceps, with Spring; One Artery and Needle Forceps, improved; One Esmarch's Flat Rubber Tourniquet, with Chain; One Hæmostatic Forceps; One Director, with Aneurism Needle; Two Silver Probes; Silk, Wire, Wax and Needles.

With the Sixteen Instruments Contained in this Case, any Ordinary Operation may be Performed.

SIZE, 11 INCHES LONG, 4 INCHES WIDE, 2 INCHES HIGH.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

THE GENUINE IMPORTED NATURAL

CARLSBAD SPRUDEL SALT

AND

CARLSBAD MINERAL WATERS

Are Highly Recommended for

1. **Diseases of the Stomach**—Chronic catarrh of the stomach, cardialgia, ulcer of the stomach.

2. **Diseases of the Intestines**—Chronic constipation, chronic diarrhœa.

3. **Diseases of the Spleen**—Chronic hyperæmia of the spleen, tumors of the spleen, arising after intermittent fever, typhus, etc., and the effects of a residence in marshy districts or hot climates.

The genuine imported Carlsbad Sprudel Salt is put up in round bottles like the above cut. Each bottle comes in a paper cartoon with the seal of the City of Carlsbad, and signature of "Eisner & Mendelson Co.," sole Agents, on the neck of every bottle and on the outside cartoon.

4. **Liver Diseases**—Hyperæmia of the liver, resulting from agglomeration of the blood in the veins, if it does not originate in organic defects; fat liver, jaundice, produced by catarrh of the passages of the bile, or by liver complaint in consequence of violent emotions; gallstones.

5. **Diseases of the Kidneys and Bladder**—Gravel, nephritic stones, sand, stone in the bladder—chronic catarrh of the kidneys and bladder—albuminuria.

6. **Diseases of the Prostate**—Chronic hyperæmia of the prostate, resulting from interrupted circulation in the bowels, constipation, hemorrhoids, etc.

7. **Chronic Catarrh of the Womb**, produced by menstrual disturbances, hemorrhoids, and the different consequences of interrupted circulation in the bowels.

8. **Gout**, especially in the early stages.

9. **Diabetes Mellitus**—By the use of the Carlsbad Thermal Waters, not only the clinical phenomena of this disease (the tormenting thirst, violent hunger, dryness of the skin) disappear in a very short time, but it also considerably diminishes the secretion of sugar in the urine, and frequently causes it to disappear altogether.

Diseases of the stomach are best treated with the Carlsbad Water, whereas the Carlsbad Sprudel Salt (powder form) is to be preferred in diseases of the viscera, such as intestinal canal, spleen, kidneys, inadiposis, etc.

PAMPHLETS MAILED ON APPLICATION.

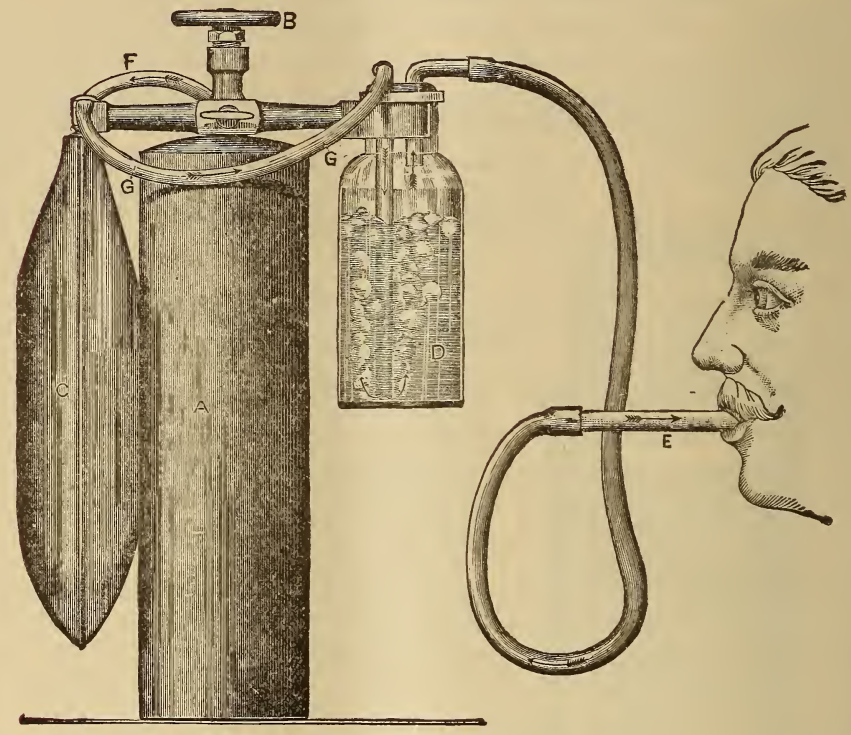
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

Put up in metal screw-cap glass jars, containing 35 tablets each. Also in 1 lb. bottles.

A sample of any of these preparations will be mailed to physicians free of charge, on application.

FOR SALE BY THE RETAIL DRUG TRADE GENERALLY.

FRENCH, RICHARDS & CO., Philadelphia, Pa.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others. I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion."—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **G. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years.
Pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

SOLE AGENTS IN THE UNITED STATES AND CANADA.

REASONS FOR SPECIFYING FAIRCHILD'S PEPSIN.

It is the most active, gives the greatest value for the price asked.

One grain will digest more albumen than will a grain of any other pepsin made. We do not care by whose test, what the proportions of albumen, water, and acid, only let the conditions be the same for all.

It is positively guaranteed to be permanent. It will not get soft or sticky, or deteriorate in value, because it is not a peptone. It is free from all the well-known characteristics of peptone. It is not made by a patented or pirated process.

If you prescribe pepsin in scale or powder, and it becomes sticky, you may be sure that it is not Fairchild's. Investigate the matter, place the blame where it belongs.

There are pepsins "made to sell" under the title of scales—products which are inferior and dissimilar to Fairchild's pepsin in scales. They are peptones made by a patented process and sold under cover of a title first and properly used only by Fairchilds to describe their original, true pepsin in the form of scales.

The druggist is told "they are just as good as Fairchild's. If Fairchild's is not specified, put in mine." But claims and pretensions, however colossal, cannot make peptones permanent.

There is no soluble or peptone pepsin equal in activity to Fairchild's, none which will keep in all weathers and all conditions as Fairchild's will.

FAIRCHILD BROS. & FOSTER, NEW YORK.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

INDIGESTION

"and acidity of the stomach will in a large majority of cases be counteracted by a systematic use of good sound Burgundy. I know of none better than the Royal Burgundy (Calvico brand only)."

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

PREPARED BY

The Roseberry Nutrolactis Company,

18 CORTLANDT STREET,

NEW YORK, N. Y.

Samples free to physicians who pay express charges.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. MCKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical Department, State University of Iowa,

AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address

DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

COLLEGE OF PHYSICIANS AND SURGEONS

OF BALTIMORE, Md.

The Preliminary Course will begin September 15, 1890.

The Regular Session will open October 1, 1890, and close April 1, 1891. For catalogue containing full information, write to

THOMAS OPIE, M. D., DEAN,
N. W. Cor. Calvert and Saratoga Streets,

JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.

SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.

THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M. D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S PRIVATE SANITARIUM

3607 Locust Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY

1706 Walnut Street, Philadelphia

Detroit College of Medicine.

Detroit, Mich,

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

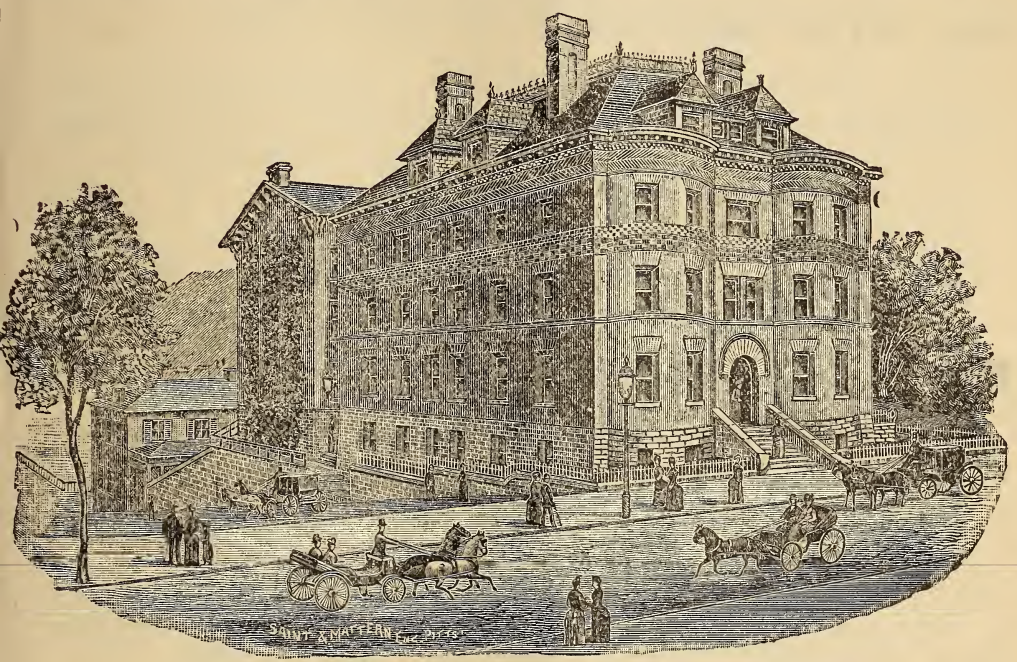
JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D, LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D, Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D. Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof. of Ophthalmology
BARTON COOKE HIRST, M.D., Professor of Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS, M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

For Catalogue and announcement containing particulars, apply to

DR. JAMES TYSON, Dean,
36th and Woodland Avenue, Philadelphia.

DR. R. S. SUTTON'S

Sanatorium for Diseases of Women.



Eighth Year Opens September 1, 1890.

ALLEGHENY CITY, PA.

This Institution is located on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers; it commands a view of the city of Pittsburgh, and its picturesque surroundings. The building is large and beautiful, it is provided with every modern convenience, the halls are heated by steam, the rooms are commodious, well lighted and ventilated, and heated by open grates. The house is provided with a private parlor and reading-room for patients. The dining-room is large, handsomely finished, and furnished with small tables, securing privacy at meals for those who do not care to have meals served in their own rooms. Patients can be as secluded, should they desire it, as in a well appointed hotel. Each patient is examined by Dr. Sutton, and receives his daily personal attention, while Dr. J. H. Williamson, a physician of ample hospital experience, resides in the Institution, and has, under Dr. Sutton, the immediate care of the patients. The Institution accommodates 25 patients, and is equal in comfort to the best hotels.

Electricity, baths, douches, massage, local treatment, general medication and surgical operations are resorted to according to the requirements of each patient.

For further information address the Matron

MISS KENNEDY,

170 Ridge Ave., Allegheny, Pa.

MEDICAL AND SURGICAL REPORTER,

P. O. BOX 843. PHILADELPHIA.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)		Soda.....1-3 Grains.	
Distilled Water.....35 "		Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.		Hyochotic Acid.....1-90 "	

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which HYDROLEINE is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

The Model Leager

enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

Specimen Pages will be sent on Application =

An Open Letter to the Medical Profession.

THE INFANT FOOD PROBLEM SOLVED.

NEW YORK, May 1, 1890.

The Annual of the Universal Medical Sciences for 1889 says: "A perfect Infant Food is still a desideratum; such a food will probably be evolved in the mind of some manufacturer who understands the physiology of infantile digestion and the chemistry of milk. A substitute for human milk to approximate the latter closely should be made entirely from cow's milk, without the addition of any ingredient not derived from milk."

"But not alone do we demand that these Milk Foods contain the equivalent of the solids in human milk, and especially of the albuminoids derived from milk, but that the latter be gathered with the utmost care from properly fed animals, transported with the least possible jolting to the factory, maintained during its transit at a low temperature, then transferred to an apparatus for sterilization, and immediately after the latter has been accomplished reduced to the dry state, in order to prevent the formation of those organisms which Loeffer, Pasteur, and Lester have found to develop in fluid milk after boiling under an alkaline reaction. If such a preparation be put into air-tight and sterilized jars, all will have been accomplished that can be done to render the food sterile, and thus fulfil the chief indications in the prevention of the most serious gastro-intestinal derangements."

"Such a food, too, would have the advantage of being easily and rapidly prepared by addition of sterilized water, affording an altogether sterilized food."

To the *Medical Profession* at large we submit for examination and trial the perfected Milk Food known as LACTO-PREPARATA. We claim that LACTO-PREPARATA is an *ideal Infant Food*, and that it fulfils the above requirements in every particular, except the partial substitution of cocoa-butter for unstable milk-fat. This substitution was made by advice of Prof. Attfield, London, who made extensive tests of its food value and digestibility in the London Hospitals for Infants.

LACTO-PREPARATA is made from cow's milk evaporated in vacuo a few hours after it leaves the udder. In order to have the product correspond in composition with breast-milk, sufficient milk-sugar is added to bring up the carbohydrates and reduce the albuminoids to a proper proportion (17 per cent.). The casein is partially pre-digested (30 per cent.), and the remaining portion is rendered like human milk in character and digestibility. The ingredients are perfectly sterilized and placed in hermetically sealed cans; the powdering, bolting, and canning are done in an air-tight room, all air entering and leaving this room is forced by a blower through heavy layers of cotton. LACTO-PREPARATA is adapted more especially to infants from birth to six months of age; *and by the addition of water alone represents almost perfectly human milk in taste, composition, and digestibility.*

Another product of our laboratory which has been before the profession for a number of years is CARNRICK'S SOLUBLE FOOD, which, as now prepared and perfected, contains 37½ per cent. of the solid constituents of milk, 37½ per cent. of wheat with the starch converted into dextrine and soluble starch, and 25 per cent. additional milk-sugar. For infants over six months of age it is perfect in every respect; for infants younger than this, LACTO-PREPARATA is more suitable, although *Soluble Food* has also been used largely from birth with the most satisfactory results.

Samples will be sent prepaid, also pamphlet giving detailed description.

REED & CARNRICK, NEW YORK.

It is Important

for the Physician to watch the character and quality of the remedies used in his prescriptions. Responsibility *does not cease* when the patient leaves the office, for impure, stale, or inferior preparations may be used without his knowledge. Personal examination of remedies prescribed—is the best check upon substitution.

ESSENCE PEPSIN.

A concentrated solution of the Peptic Glands.

Essence of Pepsin.—(MERRELL.)

A direct solution of all the soluble constituents of the peptic glands of the pig's stomach, unchanged by chemical action or manipulation. Inasmuch as the pepsin herein contained has never been precipitated or acted upon by any re-agent, it is presented in as nearly as possible the condition in which it originally existed in the glands, and will be found entirely free from any decomposed odor or taste. Each fluid drachm is equivalent to 20 grains U. S. P. Saccharated Pepsin, and will digest 1,000 grains coagulated albumen in 6 hours, according to the pharmacopœal test.

DOSES:—1-2 to 1 fluid drachm.

Sufficient acid only is added to this preparation to properly preserve the pepsin, and if an acid dose is desired in connection with the pepsin, we recommend our Ess. Pepsin Lactated, or the following:

℞ Acid Lactic Dil., U. S. P., ... f℥ss to i.
Ess. Pepsin, ... q. s. ad f℥iv.
M. Sig. Teaspoonful before meals.

ALKALINE ELIXIR.

Rhubarb Co. with Pancreatin.

Alkaline Elixir Rhubarb Co. with Pancreatin.—(MERRELL.)

Each fluid ounce contains 20 grains each East India Rhubarb and Bicarb. Potass., 16 grains Pancreatin, and 10 grains Hydrastis Can. (without the Resin) with flavored brandy and aromatics.

This is, without doubt, the most valuable antacid, carminative-stomachic and digestive agent obtainable, and will be found extremely valuable in all abnormally acid conditions of the digestive tract, as in cholera morbus, cholera infantum, infantile or flatulent colics, acid dyspepsia—acute or chronic—etc.

DOSES:—1 to 4 fluid drachms every 1-2 to 4 hours, according to age and the severity of cases.

This preparation promptly allays the vomiting in cholera morbus, etc., and acts generally as a corrective in deranged conditions of the stomach and intestines.

Druggists may tell you that the "Merrell" preparations are not in stock—the reply is that Smith-Kline Co., Philadelphia; Gilpin, Langdon & Co., Baltimore, and The Richards Drug Co., San Francisco, can supply them. Physicians should specify "Wm. S. M. C. Co.," and insist upon the prompt recognition of their requests.

THE ABOVE PREPARATIONS ARE FROM THE LABORATORIES OF

THE WM. S. MERRELL CHEMICAL CO.,

Laboratories, CINCINNATI and 96 Maiden Lane, NEW YORK CITY.

Orders or inquiries to either address will have prompt attention.

To avoid the evil effects of Tea and Coffee, use constantly VAN HOUTEN'S COCOA, which is a STRENGTHENER OF THE NERVES and a refreshing and nourishing beverage.

One trial of VAN HOUTEN'S COCOA will convince every one of its *great superiority in strength, flavor, and economy.*

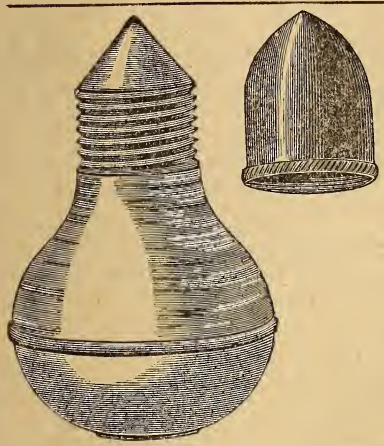
FOR SALE.

SOUND and SAFE.

Address, MEDICAL AND SURGICAL REPORTER, P. O. Box 843, Philadelphia.



THE P.P.P. SYRINGE

Is universally considered the most perfect urethral Syringe in the market, because it combines within itself all desirable qualities. It measures but 1½ x 2¾ inches, has a capacity of fully half an ounce, and is made of one piece of soft rubber with conical point. To protect this soft point and to prevent pocket dust from getting into the Syringe, a Hard Rubber cap screws air-tight over it and enables the patient to carry it in his pocket filled with the injection ordered, ready for use when away from home.

For sale by all druggists.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

The Model Ledger

enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

Specimen Pages will be sent on Application.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1	minim.
" Ignatia Amara,	1	"
" Cinchona,	4	"
" Matricaria,	1	"
" Gentian,	½	"
" Columbo,	½	"
" Phosphorus, C. P.,	1-300	gr.
Aromatics,	2	minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

EXTRACT FROM AN ARTICLE

IN THE

"Medical Press and Circular,"

BY

EDWARD WARREN-BEY, M. D., C. M., LL. D.,

Chevalier of the Legion of Honour.

To those familiar with the use of BROMIDIA, no argument is necessary, for it speaks for itself, by fulfilling the indications for which it is administered with a certainty, efficiency, and harmlessness which elicit at once the wonder of the patient and the delight of the prescriber, and give to the profession the assurance of possessing one remedy at least which approximates so near to infallibility of action as to justify the title of *specific*.

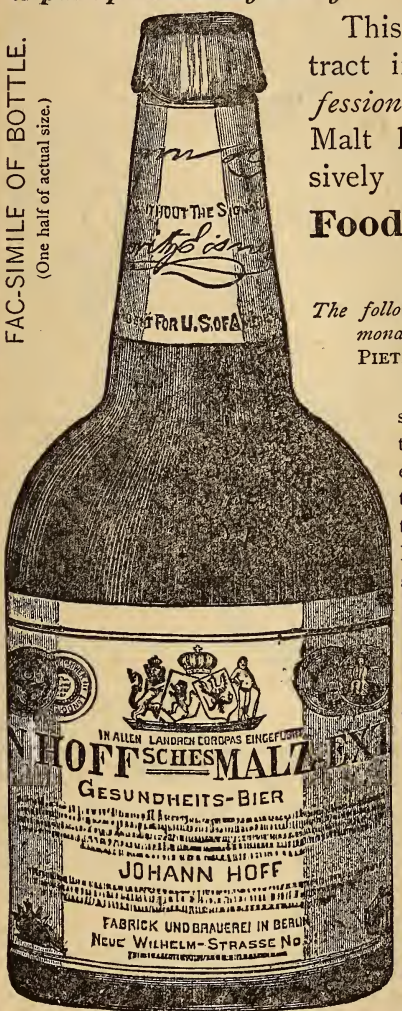
The Genuine Imported

Johann Hoff's Malt Extract

is put up in this style only.

FAC-SIMILE OF BOTTLE.
(One half of actual size.)



This has been the first Malt Extract introduced to the *Medical Profession* (1847). No preparation of Malt has been so long and extensively employed as a Medical

Food Nutrient and Tonic.

The following is an abstract from the work on the Pulmonary Diseases published by Prof. PROSPER DE PIETRA SANTA, *at Paris:*

"As a large number of patients lack the necessary power to digest solid food, and would through the use of stimulants be merely excited and weakened, therefore I regard it of immense value to the practitioner to bring to his aid a nutritious tonic and remedy like the *Johann Hoff's* Malt Extract, which will act not only as a tonic, but as a nutrient as well, and which is less exciting than wine as a stimulant."

"I have, during the past eighteen months, made a number of examinations of the principal forms of Malt Extract in the market, and have satisfied myself that the *Johann Hoff's* Malt Extract, imported by Eisner & Mendelson Co., is a genuine Malt Extract, FREE FROM Salicylic Acid or other objectionable substances."

HENRY LEFFMANN, M.D., Phila.

CAUTION: A preparation bottled in New York is being sold as "Hoff's" Malt Extract. To obtain the genuine, original article, please specify "JOHANN HOFF'S MALT EXTRACT, imported by Eisner," which will prevent substitution.

Please Specify

"JOHANN HOFF'S" MALT EXTRACT,
Imported by "EISNER,"
When ordering the Genuine Article.

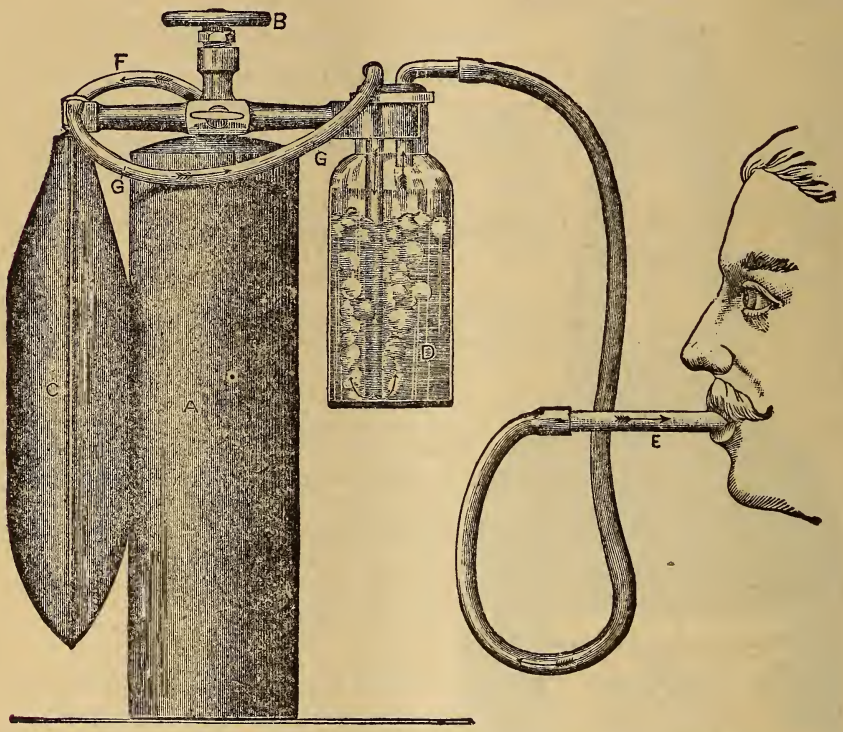
The Genuine has the signature of "hann Hoff" and "Moritz Eisner" on the neck of every bottle.

EISNER & MENDELSON CO., Sole Agents for the U. S.,
6 Barclay Street, New York.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC. PROPHYLACTIC. DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

SVAPNIA
OR
PURIFIED OPIUM

☞ FOR PHYSICIANS USE ONLY. ☜

Contains the Anodyne and Soporific Alkaloids, Codeia, Narceia and Morphia.
Excludes the Poisonous and Convulsive Alkaloids, Thebaine, Narcotine and Papaverine.

SVAPNIA has been in steadily increasing use for over twenty years, and whenever used has given great satisfaction.

To PHYSICIANS OF REPUTE, not already acquainted with its merits, samples will be mailed on application.

SVAPNIA is made to conform to a uniform standard of Opium of Ten per cent. Morphia strength.

JOHN FARR, Manufacturing Chemist, New York.
C. N. CRITTENTON, Gen'l Agent, 115 Fulton St., N. Y.
To whom all orders for samples must be addressed.

SVAPNIA IS FOR SALE BY DRUGGISTS GENERALLY.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month, thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

Samples free to physicians who pay express charges.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

CHEMIST,

WALNUT & THIRTEENTH STREETS,

PHILADELPHIA.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical Department, State University of Iowa,

AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address

DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

COLLEGE OF PHYSICIANS AND SURGEONS

OF BALTIMORE, Md.

The Preliminary Course will begin September 15, 1890.

The Regular Session will open October 1, 1890, and close April 1, 1891. For catalogue containing full information, write to

HENRY B. ALLEN M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology Materia Medica.

SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.

THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years', graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

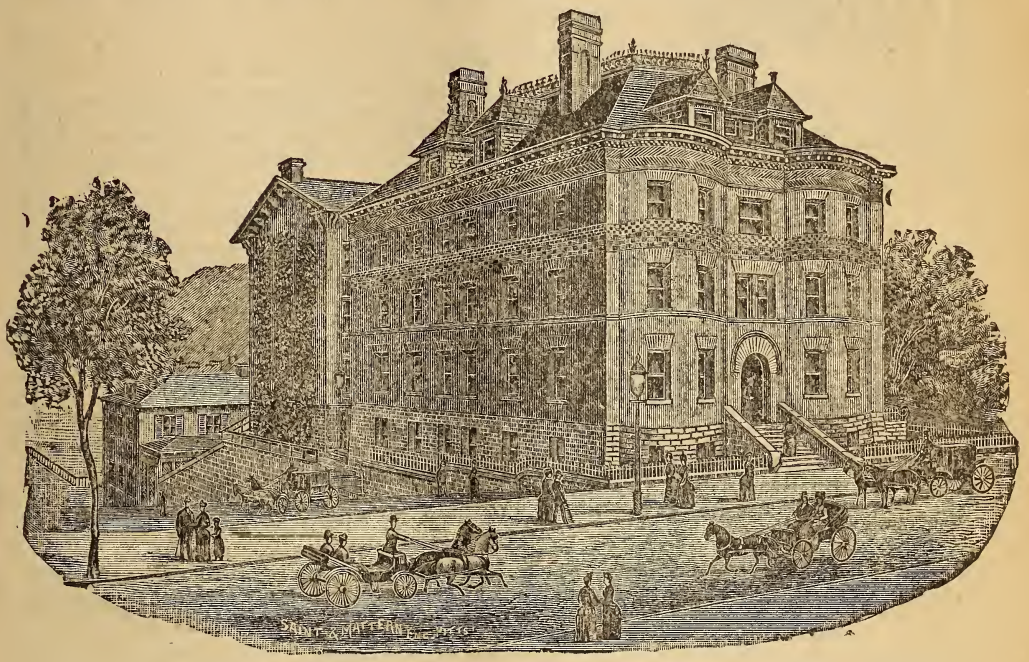
DR. R. S. SUTTON'S

Sanatorium for Diseases of Women.



Eighth Year Opens September 1, 1890.

ALLEGHENY CITY, PA.

This Institution is located on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers; it commands a view of the city of Pittsburgh, and its picturesque surroundings. The building is large and beautiful, it is provided with every modern convenience, the halls are heated by steam, the rooms are commodious, well lighted and ventilated, and heated by open grates. The house is provided with a private parlor and reading-room for patients. The dining-room is large, handsomely finished, and furnished with small tables, securing privacy at meals for those who do not care to have meals served in their own rooms. Patients can be as secluded, should they desire it, as in a well appointed hotel. Each patient is examined by Dr. Sutton, and receives his daily personal attention, while Dr. J. H. Williamson, a physician of ample hospital experience, resides in the Institution, and has, under Dr. Sutton, the immediate care of the patients. The Institution accommodates 25 patients, and is equal in comfort to the best hotels.

Electricity, baths, douches, massage, local treatment, general medication and surgical operations are resorted to according to the requirements of each patient.

For further information address the Matron

MISS KENNEDY,

170 Ridge Ave., Allegheny, Pa.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

Clinical Notes sent on Application. ST. LOUIS, MO.

REASONS FOR SPECIFYING FAIRCHILD'S PEPSIN.

It is the most active, gives the greatest value for the price asked.

One grain will digest more albumen than will a grain of any other pepsin made. We do not care by whose test, what the proportions of albumen, water, and acid, only let the conditions be the same for all.

It is positively guaranteed to be permanent. It will not get soft or sticky, or deteriorate in value, because it is not a peptone. It is free from all the well-known characteristics of peptone. It is not made by a patented or pirated process.

If you prescribe pepsin in scale or powder, and it becomes sticky, you may be sure that it is not Fairchild's. Investigate the matter, place the blame where it belongs.

There are pepsins "made to sell" under the title of scales—products which are inferior and dissimilar to Fairchild's pepsin in scales. They are peptones made by a patented process and sold under cover of a title first and properly used only by Fairchilds to describe their original, true pepsin in the form of scales.

The druggist is told "they are just as good as Fairchild's. If Fairchild's is not specified, put in mine." But claims and pretensions, however colossal, cannot make peptones permanent.

There is no soluble or peptone pepsin equal in activity to Fairchild's, none which will keep in all weathers and all conditions as Fairchild's will.

FAIRCHILD BROS. & FOSTER, NEW YORK.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

's the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND
OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED
IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges. Please mention this journal.

Wyeth's Beef Juice

A Liquid Preparation of the Choicest Beef, containing the Nutritious Albuminous Principles in an unaltered and soluble form.

Physicians have, for a long time, had their attention called to the fact that beef extracts, made by the LIEBIG process, are utterly devoid of the valuable and nutritious albuminous constituents of meat, as these are coagulated and filtered out in the process of manufacture. In consequence, the most advanced class of medical practitioners to-day, merely use the commercial extracts of meat as stimulants, and not for any nutritious properties they may possess. Realizing this fact, we have, after continued and exhaustive experiments, succeeded in preparing the article which we offer as WYETH'S BEEF JUICE, and for which we make the following claims:

FIRST.—That it contains all of the albuminous principles of beef in an active and soluble form. This may be proven by mixing a small portion of Beef Juice with an equal part of water in a test-tube or any convenient vessel, and gradually heating to the boiling point, when the albuminous principles will be coagulated.

SECOND.—That it contains the Hæmoglobin of the meat unaltered, as is evidenced by the bright arterial color of the preparation, and by the fact that it loses this color upon boiling, as the Hæmoglobin is precipitated with the albumen.

THIRD.—That it will be found upon trial to possess the nutritive properties of the choicest beef to a higher degree than any extract of meat yet offered to the profession.

Physicians will find WYETH'S BEEF JUICE of great value as a strengthening diet in cases of convalescence, consumption, nervous prostration, and similar diseases; also, in typhoid fever, debility, etc. Beef Tea prepared from it, contains more nourishment than any other liquid preparation of meat, and, when properly seasoned, is more grateful and appetizing to the patient. Professional men who are suffering from over-work, mental anxiety, etc., will find that one-half teaspoonful in about half a glass of iced water, taken at intervals during the day, and upon retiring, will relieve fatigue,—both of mind and body.

DIRECTIONS.—In cases of debility, nervous prostration, convalescence, etc., one-half to one teaspoonful in a half tumblerful of iced or luke-warm water.

CAUTION.—As the valuable albuminous elements are rendered insoluble by extreme heat, this preparation should only be mixed with iced or LUKE-WARM water, and never with water at the boiling point.

MANUFACTURED BY

JOHN WYETH & BROTHER,

PHILADELPHIA, PA.

Doctor:

You have many cases of nervous debility to treat.

Some of them are merchants who worry over their business affairs; lawyers, teachers and ministers who do a great deal of brain work, and women worn out with the cares of the family. Others are men suffering from sexual weakness, spermatorrhea, or other forms of sexual drain.

They are coming home now from seashore and mountain, where they have been vainly seeking the restoration they thus far have failed to find. You dread to see them coming, because it only means another ceaseless round of those irritant stimulant and "tonic" remedies, which, instead of curing them, act like a whip to the wearied horse, only goading them on to hopeless incurability.

Now let us give you a secret by which you may cure these cases.

Instead of stimulating them, *feed up* the exhausted nerve tissue with the true tissue food, McArthur's Chemically Pure Syrup of the Hypophosphites of Lime and Soda.

The treatment will be restful and refreshing, and improvement will be manifest at once and permanent cure will result from steady, persistent use of the remedy. In the few special cases calling for temporary use of other remedies they can be combined in the same prescription with the Syrup. But the Syrup should be continued, month after month, until a cure has resulted.

Remember, all forms of nerve exhaustion are amenable to this treatment.

Think how much your reputation will be enhanced and your practice increased by this timely means. The great Niemeyer attributed the rapid growth of his practice to a successful prescription for anemia, for which patients used to come from great distances.

No one has yet been disappointed with McArthur's Syrup.

It is the only one containing the chemically pure hypophosphites of lime and soda without other irritant so-called tonics.

It is specially indicated also in Tuberculosis and Scrofulosis, where it builds up the tissue walls and rapidly and permanently restores the health. Also in Rachitis, Chronic Cough, Chronic Bronchitis, Alcoholism, Pregnancy and Lactation to build up the child's system through the mother, Teething, Chronic Diarrhea, Suppurating Discharges and Sores, Uterine Fibroids, and all disorders of waste or faulty nutrition.

Write your prescription thus:

℞ Syr: Hypophos: Comp: McArthur: 1 Bottle.

A valuable book, "Curability of Consumption," sent free. A large bottle sent free if you will pay express.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—DR. WILLIAM C. WILE sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

DR. HENRY M. FIELD, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—DR. F. PEYRE PORCHER, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

W. H. Schieffelin & Co.,

170 & 171 WILLIAM STREET,

NEW YORK.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

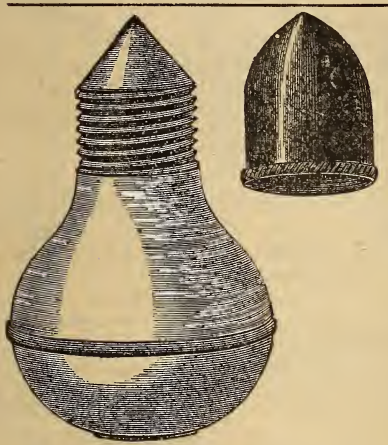
For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing, etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address, DRS. S. S. & S. E. STRONG.



THE P.P.P. SYRINGE

Is universally considered the most perfect urethral Syringe in the market, because it combines within itself all desirable qualities. It measures but 1½ x 2¾ inches, has a capacity of fully half an ounce, and is made of one piece of soft rubber with conical point. To protect this soft point and to prevent pocket dust from getting into the Syringe, a Hard Rubber cap screws air-tight over it and enables the patient to carry it in his pocket filled with the injection ordered, ready for use when away from home.

For sale by all druggists.

THE GOODYEAR RUBBER CO.,

49 MAIDEN LANE, NEW YORK.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1	minim.
" Ignatia Amara,	1	"
" Cinchona,	4	"
" Matricaria,	1	"
" Gentian,	½	"
" Columbo,	½	"
" Phosphorus, C. P.,	1-300	gr.
Aromatics,	2	minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

SOMNAL.

RADLAUER.

CHEMICAL FORMULA: $C_7H_{12}Cl_3O_3N$.

SOMNAL is a new soporific which produces sound sleep within half an hour after taking, and the effect lasting six to eight hours. The dose is **2 or 3 grammes** (half a teaspoonful); it is best administered with extract of licorice or with syrup of raspberry. **Somnal** does not affect either digestion, respiration, or the temperature of the body.

Dr. Guttman, Surg. Director of the City Hospital Moabit, in Berlin, states that he has applied "Somnal" in 60 to 70 cases at the hospital. Doses of 2 grammes have produced a quiet, refreshing sleep, lasting from 6 to 8 hours, without any unpleasant symptoms following its use.

The British Medical Journal says: "*Somnal*," when given in doses of half a teaspoonful, will produce sleep in thirty minutes. The sleep is described as sound and natural, lasting from 6 to 8 hours, and followed by no unpleasant effects.

Somnal *does not disturb the digestion*, has no influence over the pulse or temperature, and, in fact, has the excellent qualities **of both chloral and urethane without their disadvantages.**

Dr. Kny, of Strassburg, prefers *Somnal* to *Sulfonal*, and claims that it produces *deep sleep* **within half an hour after its administration,** and that it has but little influence on the heart's action.

Dr. J. S. Ridge, of Kingston, R. I., writes: "I have used Somnal on three cases of insomia, in middle aged and quite old ladies, with beautiful results, having used Sulphonal, Bromidia, Chloralamid with little or no result. I gave a lady 80 years old suffering from Insomnia 3 grammes of Somnal at bedtime in a little Syrup of Raspberry, with splendid effect, she getting, so the nurse says, 6 hours sound sleep. This is the best soporific I have used yet."

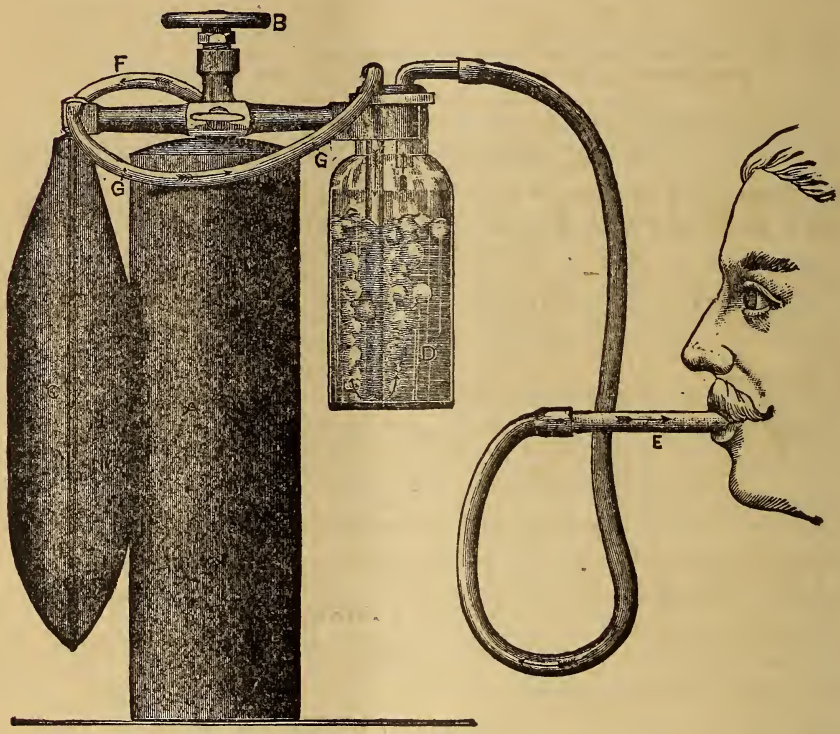
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S

COMPRESSED ANTISEPTIC PASTILLES.

(Dr. CARL SIELER'S FORMULÆ.)

FOR MAKING ANTISEPTIC SPRAYS, NASAL WASH, MOUTH WASH, Etc.

One tablet dissolved in four tablespoonfuls of warm water makes a solution which can be used as a spray or wash.

Supplied in bottles of 50, 100 and 1 lb.

COMPRESSED ANTISEPTIC TABLETS.

(FOR EXTERNAL USE.)

Each tablet contains:

7.3 grains . . . . . Hydrarg. Bichlor.
7.7 grains . . . . . Ammon. Clor.

One tablet dissolved in one pint of water will make a 1 to 1,000 solution, containing one part of Corrosive Sublimate in 1,000 parts of water.

Supplied in screw-cap bottles, containing 25 and 100 tablets each, and pounds.

FRENCH'S

COMPRESSED SULPHUR and CREAM OF TARTAR TABLETS.

An alterative and mild laxative for children and invalids. They are pleasantly flavored and sweetened, and form an agreeable method of medication.

FORMULA:

Sulphur Lotum, U. S. P. . . . . grs. v.
Potass. Bitart., pur. . . . . grs. xv in each tablet.

Put up in metal screw-cap glass jars, containing 35 tablets each. Also in 1 lb. bottles.

A sample of any of these preparations will be mailed to physicians free of charge, on application.

FOR SALE BY THE RETAIL DRUG TRADE GENERALLY.

FRENCH, RICHARDS & CO., Philadelphia, Pa.

To PHYSICIANS.

THE FOREMOST COCOA OF EUROPE
THE COMING ONE OF AMERICA.

VAN HOUTEN'S
"Best and Goes Farthest."

Physicians will do well in recommending, as their European colleagues do, VAN HOUTEN'S COCOA for daily family use. Now that the profession is deprecating the habitual use of alcoholic liquors, and as even tea and coffee are found too exciting for many temperaments—to say nothing of the growing number of cases of nervous disorder in this age of hot haste and feverish anxiety—the question of what beverage may be recommended, as at once refreshing and innocuous, is assuming the highest importance.

VAN HOUTEN'S
Most Appetizing. Easily Digested.

Cocoa has long been known as a useful article of diet, and its claims are steadily winning recognition. Unlike tea or coffee, it is not only a stimulant but a nourisher; and it has the great advantage of leaving none of their narcotic effects on the system. For this reason it is adapted to general use. The strong may take it with pleasure, and the weak with impunity.

VAN HOUTEN'S
The Original—Most Soluble.

"Pure soluble cocoa" is an invention of Mr. C. J. Van Houten, who patented this invention in Holland. Thus all other "pure soluble cocoas" are imitations. The process of manufacturing Van Houten's cocoa is still, to-day, a secret of C. J. Van Houten & Zoon. Chemists and medical men of the highest standing say, universally, that their observation shows that the Van Houtens do exactly what science would suggest for the conversion of raw cocoa into a satisfactory article of food. They simply remove some of the originally contained fat, which is apt to disagree with the system, and in some ingenious manner, increase the solubility of flesh-forming constituents.

VAN HOUTEN'S
"Once Tried, Always Used."

To remove excess of fat is always desirable. Some manufacturers do this by largely diluting the ground cocoa with starch. A cupful of thick beverage may thus be made, which no doubt contains a diminished amount of fat, but of course also contains a diminished amount of every other constituent of the cocoa. For persons who desire a thick, starch-like beverage, such a mixture, miscalled "soluble" cocoa, may be unobjectionable, though the cocoa in it is less easy of digestion than Van Houten's preparation. A far better method, however, is to extract, as the Van Houtens do, one part of the fat from four of cocoa, and, as a consequence, render each of the valuable constituents remaining, one-third more effective than before. Instead of being weakened by starch, Van Houten's cocoa is thus made one-third stronger in every one of its valuable properties.

VAN HOUTEN'S
"Largest Sale in the World."

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

CONVALESCENTS

"can materially hasten restoration to health by taking small wineglassful of Royal Tokay (Calvico label only) half an hour before each meal. It warms the stomach, placing it in proper condition to receive the food."

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical Department, State University of Iowa,

AT IOWA CITY, IOWA.

The next session will begin on September 10th, 1890, and continue until March 11th, 1891.

Attendance upon three courses of lectures, of six months each, is requisite to graduation. Facilities for dissection and clinical study are unsurpassed.

Term Expenses:—Lecture Ticket, $20.00; Demonstrator's Ticket, $10.00; Matriculation Ticket, $5.00 (paid but once); Hospital Ticket, $3.00; Examination Fee (for final examination), $25.00. No charge for dissecting material.

For further information, address

DR. L. W. LITTIG, Secretary, Iowa City, Iowa.

A GOOD PRICE WILL BE PAID FOR the Board and Care of a nervous lady. A physician's family preferred.

Address

DR. G. F.,

Care of Medical and Surgical Reporter, Philadelphia.

Professor of Chemistry.
JOHN C. UHLER, M. D., D.D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D.D. S.,
Demonstrator of Operative Dentistry.

Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For catalogue and other information, apply to **Dr. F. J. S. GORGAS, Dean, 845 Eutaw Street, Baltimore.**

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M. D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

Detroit, Mich,

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D., Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D. Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof. of Ophthalmology
BARTON COOKE HIRST, M.D., Professor of Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS, M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

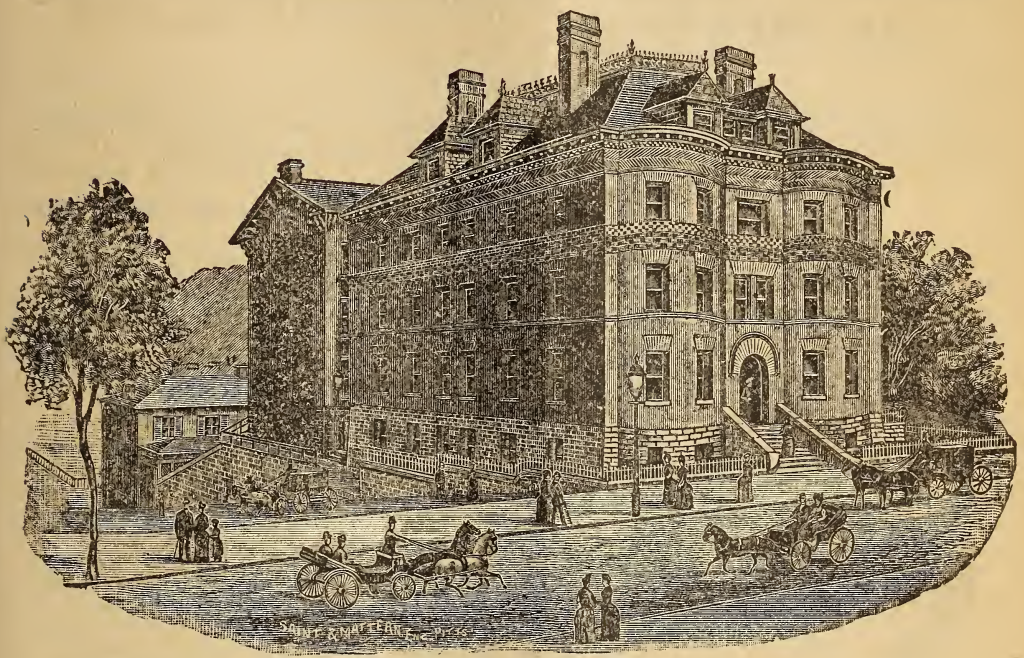
DR. R. S. SUTTON'S

Sanatorium for Diseases of Women.



Eighth Year Opens September 1, 1890.

ALLEGHENY CITY, PA.

This Institution is located on high ground, and overlooks the Allegheny, Monongahela and Ohio rivers; it commands a view of the city of Pittsburgh, and its picturesque surroundings. The building is large and beautiful, it is provided with every modern convenience, the halls are heated by steam, the rooms are commodious, well lighted and ventilated, and heated by open grates. The house is provided with a private parlor and reading-room for patients. The dining-room is large, handsomely finished, and furnished with small tables, securing privacy at meals for those who do not care to have meals served in their own rooms. Patients can be as secluded, should they desire it, as in a well appointed hotel. Each patient is examined by Dr. Sutton, and receives his daily personal attention, while Dr. J. H. Williamson, a physician of ample hospital experience, resides in the Institution, and has, under Dr. Sutton, the immediate care of the patients. The Institution accommodates 25 patients, and is equal in comfort to the best hotels.

Electricity, baths, douches, massage, local treatment, general medication and surgical operations are resorted to according to the requirements of each patient.

GEO. H. WEBB, Lockport, N. Y.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

ESTABLISHED 16 YEARS. BEWARE OF IMITATIONS.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, "**With Iron, No. 1**;" while the same preparation, **Without Iron,** is designated on the label as "**No. 2.**"

In prescribing this preparation, physicians should be particular to mention "*COLDEN'S*," viz., "*Ext. Carnis Fl. Comp.* (*Colden.*)" A Sample of COLDEN'S BEEF TONIC will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

C. N. CRITTENTON, General Agent, 115 Fulton St., New York.

GLENN'S SULPHUR SOAP.

BEWARE OF COUNTERFEITS.

Physicians know the great value of the local use of Sulphur in the Treatment of Diseases of the Skin.

Constantine's Pine-Tar Soap.

THE BEST SOAP MADE.

Has been on trial among physicians for very many years as a healing agent. **By far the Best Tar Soap made.**

Wholesale Depot, C. N. CRITTENTON, 115 Fulton St, New York.

Samples of above Soaps SENT FREE, on application, to any Physician enclosing card

Publisher Medical and Surgical Reporter

P.O. Box 843. PHILADELPHIA, PA.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

MILK OF MAGNESIA.

A PURE HYDRATED OXIDE OF MAGNESIUM.—(MgH_2O_2.)

ANTACID AND CORRECTIVE.

Especially recommended in the Gastro-intestinal irritations of infant, child and adult life—Nausea—Vomiting in Pregnancy—Sour Stomach—Diarrhœa—Cholera Infantum—and the Rheumatic and Gouty conditions resulting from acid secretions.

This Hydrate presents Magnesia practically in solution without grittiness or precipitation—No danger from concretions as with the calcined—Free from Carbonic Acid—Miscible with other fluids—in a form easy of administration and absorption. Superior to lime water or chalk mixture for addition to milk. It is not a purge: but in antacid, corrective or mild laxative indications will be found reliable and safe. It combines well with Syrup Rhubarb—Soda—Opium—the various astringents, etc.

PHOSPHO-MURIATE OF QUININE,

COMPOUND,

A RELIABLE ALTERATO-CONSTRUCTIVE,

Particularly indicated in conditions of **disturbed nutrition** and **tissue retrograde.**

An easily appropriated general tonic, promoting digestion, and safe under prolonged use. A permanent combination of the soluble Wheat Phosphates, with Muriate of Quinine, Iron and Strychnia.

Of greater strength than the various Hypophosphite compounds.

The above are put up in Dispensing and Trade Containers.

DIGESTIBLE COCOA.
WHEAT PHOSPHATES.
COD LIVER OIL EMUL.

THE CHAS. H. PHILLIPS CHEMICAL CO.,
77 PINE STREET, NEW YORK.

CH. MARCHAND'S

Peroxide of Hydrogen,

MEDICINAL (ABSOLUTELY HARMLESS)
H_2O_2

is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a nostrum.

Experiments of Prof. Pasteur, Dr. Koch, and many other scientific authorities, prove beyond doubt that Germs, Bacteria, or Microbes cause and develop: **NOSE, THROAT, AND LUNG DISEASES—Diphtheria, Croup, Sore Throat, Catarrh of the Nose, Hay Fever, Bronchitis, Laryngitis, Pharyngitis, Whooping Cough, Consumption and other Chronic Affections, specific or not.**

GERMS, BACTERIA, OR MICROBES are instantaneously annihilated when brought into contact with **Ch. Marchand's Peroxide of Hydrogen.** This wonderful bactericide acts both chemically and mechanically upon all excretions and secretions, so as to thoroughly change their character and reactions instantly. By destroying the microbian element this remedy removes the cause of the disease.

CAUTION.—I would earnestly impress upon the profession the very great importance of prescribing only my Peroxide of Hydrogen (Medicinal), from which all hurtful chemicals have been eliminated.

By specifying in your prescriptions "Ch. Marchand's Peroxide of Hydrogen (Medicinal)," which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon.

Prepared only by

Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of **Ch. Marchand's Peroxide of Hydrogen (Medicinal),** with opinions of the profession, will be mailed to physicians free of charge on application.

¼ lb. bottle, retail, 35 cents; ½ lb. bottle, retail, 50 cents; 1 lb. bottle, retail, 75 cents.

SOLD BY LEADING DRUGGISTS.

THE P.P.P. SYRINGE

Is universally considered the most perfect urethral Syringe in the market, because it combines within itself all desirable qualities. It measures but 1½ x 2¾ inches, has a capacity of fully half an ounce, and is made of one piece of soft rubber with conical point. To protect this soft point and to prevent pocket dust from getting into the Syringe, a Hard Rubber cap screws air-tight over it and enables the patient to carry it in his pocket filled with the injection ordered, ready for use when away from home.

For sale by all druggists.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

{ Phenacetine-Bayer, . . 3 grs.
{ Caffeiæ Citrat., ... 1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

{ Phenacetine-Bayer, . . 2½ grs.
{ Salol, ... 2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

{ Phenacetine-Bayer, . . 1¼ grs.
{ Salol, ... 1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

{ Sulfonal-Bayer, . . . 10 grs.
{ Phenacetine-Bayer, . . . 5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

{ Sulfonal-Bayer, . . . 5 grs.
{ Phenacetine-Bayer, . . . 2½ grs.

NEW YORK.

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

Price, $2.00 per bottle.

Send for copy of our Hand-Book of Pharmacy and Therapeutics. Useful for reference and contains much valuable information.

PIL. APHRODISIACA

(LILLY.)

Phosphorus and **Nux Vomica,** as is well known to the profession, act as powerful tonics to the nervous system, especially the spinal cord, and can be relied upon as possessing real aphrodisiac power The **Damiana** used is the genuine **Turnera Aphrodisiaca.** By our process for the manufacture of **Phosphorus Pills,** a thorough subdivision of phosphorus in the mass is obtained, and, with a coating perfectly **protecting** it from **oxidation,** there is nothing to be desired. It is necessary that the administration of this pill be continued from **three to four weeks,** or until the **system is thoroughly under the influence of the remedy.** It is indicated in **mental overwork, sexual debility, impotency.** It is decidedly beneficial in cases of **nocturnal emissions,** the result of excesses, **mental apathy,** or indifference, and in an **enfeebled condition of the general system,** with **weakness or dull pain in the lumbo sacral region.** In diseases of the **reproductive organs** of the female, and especially of the uterus, it is one of our most valuable agents, acting as a **uterine tonic,** and gradually removing abnormal conditions, while at the same time, it imparts tone and vigor; hence, it is of value in **Leucorrhea, Amenorrhea, Dysmenorrhea,** and to remove the tendency to repeated miscarriages.

Obtain only in original package. Oval pink pills.

GENTLEMEN:—Your management of the collections of the MEDICAL AND SURGICAL REPORTER during the past year has been so admirable and so much more successful than that of any agency with which I have dealt heretofore, that I renew my contract with you for the coming year with great pleasure.

The Publisher of the Medical and Surgical Reporter.

Philadelphia,

September 25, 1890.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* PARIS, 8 RUE PAYENNE, and at every Pharmacy. (Beware of imitations.)

BLAUD

SVAPNIA

OR

PURIFIED OPIUM

FOR PHYSICIANS USE ONLY.

Contains the Anodyne and Soporific Alkaloids, Codeia, Narceia and Morphia.

Excludes the Poisonous and Convulsive Alkaloids, Thebaine, Narcotine and Papaverine.

SVAPNIA has been in steadily increasing use for over twenty years, and whenever used has given great satisfaction.

To PHYSICIANS OF REPUTE, not already acquainted with its merits, samples will be mailed on application.

SVAPNIA is made to conform to a uniform standard of Opium of Ten per cent. Morphia strength.

SVAPNIA IS FOR SALE BY DRUGGISTS GENERALLY.

THE HYGIENE

OF THE

Lying-in Room.

ALTHOUGH it is well known that women in the puerperal state are peculiarly sensitive to the influence of imperfect sanitation, it is remarkable that comparatively little attention is paid to the hygiene of the lying-in chamber in private dwellings.

We do not believe the careful practitioner ignores the importance of disinfectants in this connection, yet it is true their use is frequently considered of secondary value, when the greatest skill will be vain, so long as the surroundings of the patient are lowering the vitality or poisoning the blood.

Because of the unpleasant odor it is easily understood why objection should be made to the use about the room of chloride of lime or carbolic acid, or any pungent compound, but when thorough disinfection and complete deodorization may be attained by the use of odorless yet harmless chemicals, it seems it should be a pleasing duty of the physician to adopt their use.

For this purpose especially let us again call your attention to Platt's Chlorides, at once a reliable disinfectant, a prompt deodorant and a powerful antiseptic, entirely free from odor or color, clean, stainless, and economical.

***

To neutralize the gases and odors of the room, moisten a towel or sheet with a mixture of one part Platt's Chlorides to ten of water. Shake or snap this about and then suspend it to the gas bracket, or any convenient hook, that it may act as a permanent absorbent. Re-moisten when dry.

For the vessels of the room, use one part Chlorides to four of water, to neutralize the discharges, etc.

For sprinkling about the room use a ten per cent. solution and scatter with a whisp broom. It leaves no stain.

As a vaginal injection one part to fifty, or, if fetor still persists, one to thirty parts of water, as judgment and experience may dictate.

***

The following practical words from a well-known New York city physician are to the point:

In all confinements, with the best of care, there is necessarily a good deal of offensive air under the bed covers which is not due to offensive lochia, but to perfectly normal discharges and perspiration, both of which are so profuse during the lying-in period. This effluvium is as unpleasant to the lady herself as to her physician and attendants. For all these conditions let me urge the profession to make free use of "Platt's Chlorides." For injections at first, use one part to thirty of water. The strength can be easily modified to suit the circumstances. For simply purifying the room or bed I saturate towels with undiluted Chlorides and hang about the room or spread between the sheets and re-saturate when evaporation is complete. It is very effectual.

A. M. PIERSONS, M. D.,

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

WALNUT LODGE HOSPITAL,
HARTFORD, CONN.
Organized in 1880 for the special medical treatment of
ALCOHOL AND OPIUM INEBRIATES.
Elegantly situated in the suburbs of the city with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed
T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

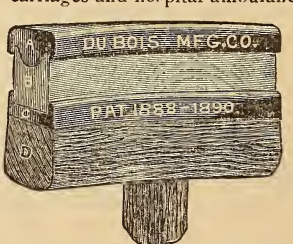
RUBBER-CUSHIONED TIRES.

Comfort, ease, and luxury secured by the use of these improvements in vehicles; they are also economical in that they prolong the life of a carriage by practically eliminating all jar and vibration.

The Du Bois Manufacturing Company is prepared to furnish the cushioned tire in all sizes. They are durable, elastic, and practically noiseless, making riding over rough roads easy, and are as great an improvement to the modern vehicle as the intervention of springs proved to carriages hung on dead axles. The cut below represents the construction of the Rubber-cushioned Tire.

Adapted to all styles of vehicles, but especially to physicians' carriages and hospital ambulances.



A—Steel outer tire or shoe. **B**—Rubber Cushion. **C**—Steel channel or tire. **D**—Is wooden felloe or rim.

These will stand the roughest usage without displacing the outer shoe or tire. Can be applied to wheels already in use. For prices, address,

The Du Bois Manufacturing Company,

Otter St., below Front, Philadelphia, Pa.

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure. They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

"Polar Star" Norwegian Cod-liver Oil.

PINT BOTTLES.

OUR Cod-liver Oil is light-colored, sweet tasting, will stand the ice test, and is strictly pure. It is especially pressed for us from select livers, and has been exported to us alone for a term of years.

FRENCH'S EMULSION
OF
Pure Norwegian Cod-liver Oil.

With Bi-Basic Phosphate of Lime.

PINT BOTTLES.

THIS emulsion is made from our "Polar Star" Norwegian Cod-liver Oil that we import directly from Norway, and which is now well known to the retail drug trade on account of its superior quality.

FRENCH, RICHARDS & CO.,

Philadelphia, Pa.

A MENSTRUUM.

HORSFORD'S ACID PHOSPHATE.

THIS preparation has been found especially serviceable as a menstruum for the administration of such alkaloids as morphine, quinine, and other organic bases which are usually exhibited in acid combination.

The admixture with pepsin has been introduced with advantage when indicated.

The Acid Phosphate does not disarrange the stomach, but, on the contrary, promotes in a marked degree the process of digestion.

Dr. R. S. MILES, Glencoe, Minn., says: "I use it in a great many cases as a menstruum for quinine, when an acid is necessary."

Send for descriptive circular. Physicians who wish to test it will be furnished a bottle on application, without expense, except express charges.

Prepared under the direction of Prof. E. N. HORSFORD, by the

Rumford Chemical Works, Providence, R. I.

BEWARE OF SUBSTITUTES AND IMITATIONS.

CAUTION:—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1 minim.
" Ignatia Amara,	1 "
" Cinchona,	4 "
" Matricaria,	1 "
" Gentian,	½ "
" Columbo,	½ "
" Phosphorus, C. P.,	1-300 gr.
Aromatics,	2 minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

And insist upon receiving the **HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.**

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

Samples free to physicians who pay express charges.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

WANTED.—A Northern Physician in an unusually desirable place in Virginia.

Address the Editor of the MEDICAL AND SURGICAL REPORTER, Philadelphia.

A GOOD PRICE WILL BE PAID FOR the Board and Care of a nervous lady. A physician's family preferred.

Address

DR. G. F.,

Care of Medical and Surgical Reporter, Philadelphia.

P. O. BOX 843.

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.
JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN, M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.
SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.
THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address
W. H. DUNLAP, M. D., Registrar, SYRACUSE, N. Y.

UNIVERSITY OF MARYLAND
SCHOOL OF MEDICINE.

Eighty-fourth Annual Announcement, 1890–91. The next regular session will begin October 1st, 1890. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY:

GEORGE W. MILTENBERGER, M. D.,
Emeritus Professor of Obstetrics, and Honorary President of the Faculty.
CHRISTOPHER JOHNSON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Emeritus Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M. D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis. Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. FAIRCHILD'S

ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges. Please mention this journal.

SIR MORELL MACKENZIE, in the *Journal of Laryngology*, published in London, says the following:

"Most of the German Saline Springs are situated on a range of the Taunus Hills. Of these, unquestionably one of *the very best* is

SODEN.

"Containing, as it does, some 23 springs, with a temperature varying between 12° to 18° C., the waters of which are charged with Chloride of Sodium in varying degrees up to 116 Grammes per litre, and some of which are further charged with Carbonic Acid, the Health Resort of Soden is unquestionably one of the very best places for the treatment of Pulmonary and Catarrhal complaints.

"COMPRESSED PASTILLES of the Soden Water are now an article of commerce, as well as the mineral waters. These are made from two of the well-waters, and containing a large amount of Chloride of Sodium, are particularly serviceable in pharyngeal catarrhs, and may even in some degree be used where it is desired to obtain the effect of the Soden treatment, in persons who are unable to make the necessary journey to the Spa itself. I have watched the effects of the Soden Waters for a considerable period, and regard them as extremely valuable in obstinate catarrhal affections of the throat. The small amount of iron which they contain renders them very useful in the stages of Throat Consumption, and they do good in nearly all cases of relaxation of the mucous membrane.

"The Pastilles offer a most convenient method of using the Waters; producing both a local and general effect. They are especially beneficial in catarrhal diseases of the air-passages; I have frequently found them of great service in the case of singers and public speakers.

(Signed) "MORELL MACKENZIE, M. D., LONDON."

DR. NORRIS WOLFENDEN, Senior Physician Throat Hospital, London, writes:

"SIR:—The Wells of Soden are known to possess most powerful medicinal virtues, and have been found of the utmost benefit in the treatment of Catarrhal conditions of the upper respiratory tract, such as Bronchitis and Emphysema, and even in Pulmonary Phthisis. Many chronic throat conditions are equally benefited. Possessing a large amount of Sodium Chloride in their composition, they have a character which is quite special, and the fact that the several Wells of Soden contain varying amounts of this important mineral constituent, renders it possible to treat many complaints of opposite nature on the same spot.

"I consider the 'Soden Mineral Pastilles,' which you have introduced to me, to be a most convenient and pleasant mode of obtaining the medicinal benefits of the Soden Wells. They form an agreeable and effective lozenge, and I feel certain will be of great service to patients afflicted with certain forms of chronic throat disease. Sprays of the same waters would, I am sure, be of much service. I hope your efforts to introduce the Soden Mineral Waters and Pastilles into this country will meet with success.

"I am, Sir, yours faithfully,

(Signed) "R. NORRIS WOLFENDEN, M.D. Cantab.,

"Senior Physician Throat Hospital, London; Editor of Journal of Laryngology."

SAMPLES AND PAMPHLETS MAILED UPON APPLICATION.

Soden Mineral Springs Co., Ld., Sole Agents,

P. O. BOX 3319, NEW YORK.

Doctor:

How are those cases of Tuberculosis and Scrofula coming on?

By the way, did you ever think of the similarity in the lesions created by these two diseases—disintegration and breaking down of the tissue walls?

Now, what must be the obvious remedy? Not irritant and stimulant tonics, as iron, arsenic, etc. They only increase the force of pressure brought to bear against these same tissue walls, and cause them the sooner to give way, producing hemorrhages, extravasations, etc.

The true and unfailing remedy will be found in the genuine tissue builders, as prepared in McArthur's Compound Syrup of the Hypophosphites of Lime and Soda. Each atom finds its way unerringly to its place in the tissue walls, until they are built up so strong as to resist hemorrhages, extravasations, diapedesis and excessive perspiration. From this time on the improvement is rapid, and may be continued until the cure is permanent.

The individual may thus be built up until he is no more liable to a return of the disease than one who has never yet had it. The teachings of Salisbury and Churchill announce these truths, and the clinical experience of a few observant physicians confirms them.

The point of superiority in McArthur's Syrup is that the Hypophosphites are *chemically pure*, which is so very rare in such preparations.

One of the first effects produced by the use of our Chemically Pure Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

Their use is also indicated in all wasting discharges, Nerve Exhaustion, Brain Fatigue, Impotence, Spermatorrhea, Tabes Dorsalis and Mesenterica, Chronic Bronchitis and Cough, Diarrhea, Uterine Fibroids, and all diseases characterized by waste and faulty nutrition.

Physicians when prescribing will please write thus:

℞ Syr: Hypophos: Comp: McArthur. One Bottle.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

A valuable treatise on the "Curability of Consumption" sent free. A large bottle free if you will pay express charges.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

W. H. Schieffelin & Co.,

170 & 171 William Street,

NEW YORK.

"Peculiarly adapted to all the requirements of the sick room."
—A. L. LOOMIS, M.D., LL.D.
"Satisfactory to me."—D. HAYES AGNEW, M.D., LL.D.
"Compounded scientifically, odorless, yet very efficient."—J. ADAMS ALLEN, M.D., LL.D.
"Destined to take the place of every other disinfectant."—H. TUHOLSKE, M.D.

PLATT'S CHLORIDES

A liquid disinfectant, powerful, prompt and cheap.
A deodorizer, without odor or objectionable feature.
A germicide, at once active and thoroughly reliable.
An antiseptic of tried and proven efficiency.

Supplied in Quart Bottles only, by Druggists everywhere. Price, 50 cts.

To any physician, who for any reason may be still unfamiliar with the practical value of Platt's Chlorides, a sample will be sent, by express, prepaid, on request. Address, giving both Post and Express offices,

HENRY B. PLATT,
36 PLATT STREET, NEW YORK.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1	minim.
" Ignatia Amara,	1	"
" Cinchona,	4	"
" Matricaria,	1	"
" Gentian,	½	"
" Columbo,	½	"
" Phosphorus, C. P.,	1-300	gr.
Aromatics,	2	minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious Elixir, **QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address, DRS. S. S. & S. E. STRONG.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.--

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

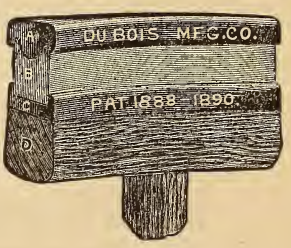
RUBBER-CUSHIONED TIRES.

Comfort, ease, and luxury secured by the use of these improvements in vehicles; they are also economical in that they prolong the life of a carriage by practically eliminating all jar and vibration.

The Du Bois Manufacturing Company is prepared to furnish the cushioned tire in all sizes. They are durable, elastic, and practically noiseless, making riding over rough roads easy, and are as great an improvement to the modern vehicle as the intervention of springs proved to carriages hung on dead axles. The cut below represents the construction of the Rubber-cushioned Tire.

Adapted to all styles of vehicles, but especially to physicians' carriages and hospital ambulances.



A—Steel outer tire or shoe. B—Rubber Cushion. C—Steel channel or tire. D—Is wooden felloe or rim.

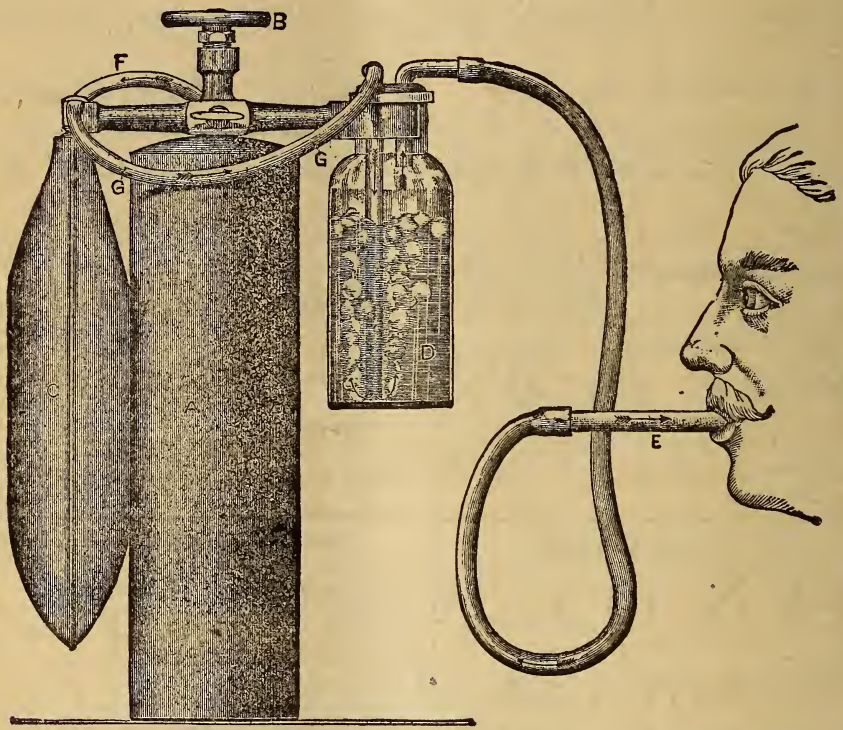
These will stand the roughest usage without displacing the outer shoe or tire. Can be applied to wheels already in use. For prices, address,

The Du Bois Manufacturing Company,
Otter St., below Front, Philadelphia, Pa.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others. I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion."—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **G. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years.
Pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

SOLE AGENTS IN THE UNITED STATES AND CANADA.

FAIRCHILD'S
PANCREATIC TABLETS.

Afford a convenient, effective, and elegant means of administering the ferments of the pancreas.

These tablets can be given at any interval prior or subsequent to the ingestion of food, at the discretion of the physician, without entailing inconvenience to the patient.

In cases of intestinal indigestion, what can be a more rational practice than the introduction of the pancreatic ferments at the time when the gastric digestion is spent, and no obstacle is offered to their passage into the intestinal tract?

Pancreatic ferments bear no dependence upon an alkaline reaction. They are exceedingly active in neutral solutions and are not rendered inert by a merely acid reaction. It is, therefore, only at the height of *normal* gastric acidity that the pancreatic ferments may be theoretically held to be inoperative in the stomach. The ferments of the pancreas—known to digest rapidly every form of food, starches, fats, beef, milk, fibrin, etc., have proven useful as remedies, *per se*, notwithstanding the prejudice of theoretical views and conclusions based upon experiments under conditions purely artificial and differing in important respects from those in which their employment is indicated.

FAIRCHILD BRO'S & FOSTER,
82 and 84 Fulton Street, New York.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

CONVALESCENTS

"can materially hasten restoration to health by taking small wineglassful of Royal Tokay (Calvico label only) half an hour before each meal. It warms the stomach, placing it in proper condition to receive the food."

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as Indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

In 97% of all cases where mother's milk is scanty or poor a copious flow of rich milk will be caused in 3 days by giving the mother "nutrolactis". Using this remedy mothers become stronger, infants thrive notably. Try it Doctor

PREPARED BY

The Roseberry Nutrolactis Company,

18 CORTLANDT STREET,

NEW YORK, N. Y.

Samples free to physicians who pay express charges.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

CHEMIST,

WALNUT & THIRTEENTH STREETS,

PHILADELPHIA.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

WANTED.—A Northern Physician in an unusually desirable place in Virginia.

Address the Editor of the MEDICAL AND SURGICAL REPORTER, Philadelphia.

A GOOD PRICE WILL BE PAID FOR the Board and Care of a nervous lady. A physician's family preferred.

Address

DR. G. F.,

Care of Medical and Surgical Reporter, Philadelphia.

P. O. BOX 843.

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.
JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.
SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.
THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address

UNIVERSITY OF MARYLAND
SCHOOL OF MEDICINE.

Eighty-fourth Annual Announcement, 1890–91. The next regular session will begin October 1st, 1890. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY:

GEORGE W. MILTENBERGER, M. D.,
Emeritus Professor of Obstetrics, and Honorary President of the Faculty.
CHRISTOPHER JOHNSON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Emeritus Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology and Clinical Professor of Diseases of Nervous System.
LOUIS McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Obstetrics.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
JOHN NOLAND MACKENZIE, M. D.,
Clinical Professor of Diseases of the Throat and Nose.

Professor of Anatomy.

Demonstrator of Anatomy.

For catalogue and further information, address: **Dr. I. E. ATKINSON, Dean, 605 Cathedral Street.**

DENTAL DEPARTMENT.

Ninth Annual Announcement. Next regular session begins October 1st, 1890. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY:

FRED. J. S. GORGAS, M. D., D.D. S.,
Professor of Principles of Dental Science, Dental Surgery, and Dental Mechanism.
JAMES H. HARRIS, M. D., D.D. S.,
Professor of Operative and Clinical Dentistry.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.

Professor of Anatomy.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D.D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D.D. S.,
Demonstrator of Operative Dentistry.

Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For catalogue and other information, apply to **Dr. F. J. S. GORGAS, Dean, 845 Eutaw Street, Baltimore.**

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M.D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M.D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,

Physician in Charge.

Detroit College of Medicine.

A FIRST-CLASS School of Medicine, with all modern facilities. Excellent corps of Instructors. Clinical advantages unsurpassed. Send for Catalogue.

E. C. SKINNER, M.D., Sec'y,

Detroit, Mich,

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

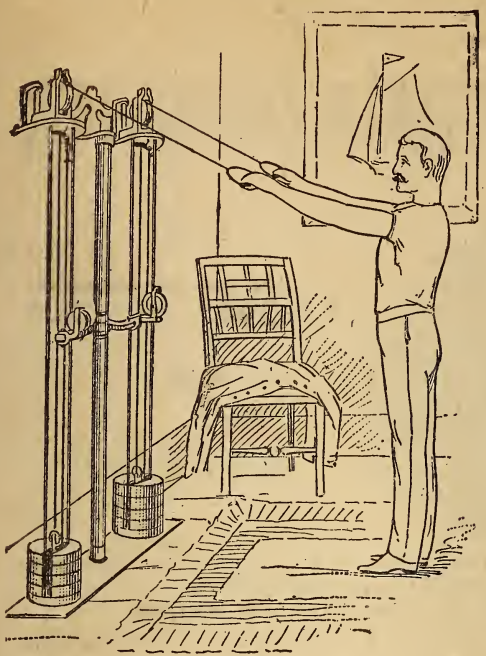
The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

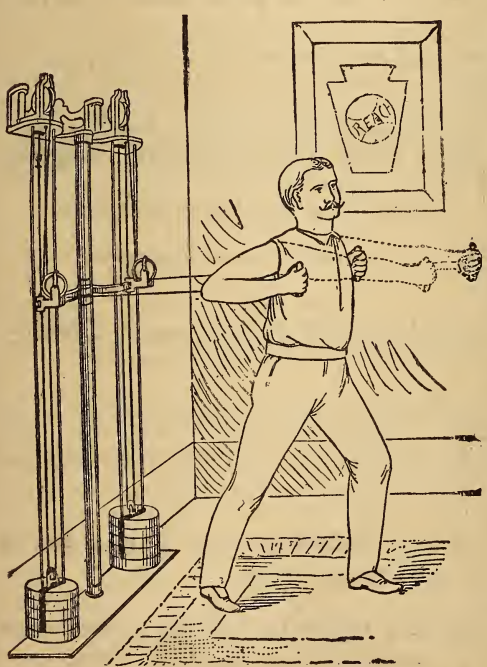
FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D, LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D, Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D. Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof. of Ophthalmology
BARTON COOKE HIRST, M.D., Professor of Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

For Catalogue and announcement containing particulars apply to

DR. JAMES TYSON, Dean,
36th and Woodland Avenue, Philadelphia.





A. G. SPALDING & BROS.'

Gymnasium Department.

From this time henceforth the **Gymnasium** in all its important details will be a department in our business to which we shall devote especial attention.

With the addition to our own valuable patents, those of the **A. J. Reach Company**, of Philadelphia, recently purchased by us, enables us to claim the most **extensive department of Gymnasium Appliances in the world.**

We have been encouraged in this **important** movement by the constantly increasing demand from **Colleges, Seminaries**, and other **Educational** Institutions for Gymnasium Supplies, and henceforth we shall devote special attention to furnishing **plans, specifications**, and **estimates** to such and for **private residences** as well, and solicit correspondence with all contemplating the introduction of gymnastics for any purpose.

The Peerless Pulley Weight, illustration of which appears on this page, is a most perfect appliance for the development of the **chest** and **arms**, adjustable to the height of *any* person, and in weight from five to thirty pounds. For **man or woman** this is the peer of any method yet devised, especially for home use. Realizing the attention the **medical profession** and the **teacher**, are now giving to **healthful** exercise in **schools**, we solicit also their correspondence, and any orders, or business proceeding from such, will be gratefully received, and entitled to our best rates of discount, and will receive prompt and careful attention.

Visitors to our different establishments at **Chicago, New York**, and **Philadelphia** will always be welcome and politely served by the many efficient salesmen constantly in attendance.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:	
Pure Cod Liver Oil.....80 m. (drops)	Soda.....1-3 Grains.
Distilled Water.....35 "	Salicylic Acid.....1-4 "
Soluble Pancreatin..... 5 Grains.	Hyocholic Acid.....1-90 "

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which HYDROLEINE is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

THIRD EDITION.

ACCIDENTS AND EMERGENCIES

By CHARLES W. DULLES, M.D.

"A work that ought to be in every home, and every home that has a copy kept where it can be consulted at short notice is likely to find it worth many times its small cost."—*Philadelphia Evening Telegraph*, May 5, 1888.

"The methods of treatment recommended are trustworthy and reliable. The manual is one of the best of this class of books and should be in the library of every householder, ready for reference at a moment's notice."—*Science*, May 18, 1888.

Publisher Medical and Surgical Reporter,

P.O. Box 843. PHILADELPHIA, PA.

THE GENUINE IMPORTED NATURAL

CARLSBAD SPRUDEL SALT

AND

CARLSBAD MINERAL WATERS

Are Highly Recommended for

1. **Diseases of the Stomach**—Chronic catarrh of the stomach, cardialgia, ulcer of the stomach.

2. **Diseases of the Intestines**—Chronic constipation, chronic diarrhœa.

3. **Diseases of the Spleen**—Chronic hyperæmia of the spleen, tumors of the spleen, arising after intermittent fever, typhus, etc., and the effects of a residence in marshy districts or hot climates.

The genuine imported Carlsbad Sprudel Salt is put up in round bottles like the above cut. Each bottle comes in a paper cartoon with the seal of the City of Carlsbad, and signature of "Eisner & Mendelson Co.," sole Agents, on the neck of every bottle and on the outside cartoon.

4. **Liver Diseases**—Hyperæmia of the liver, resulting from agglomeration of the blood in the veins, if it does not originate in organic defects; fat liver, jaundice, produced by catarrh of the passages of the bile, or by liver complaint in consequence of violent emotions; gallstones.

5. **Diseases of the Kidneys and Bladder**—Gravel, nephritic stones, sand, stone in the bladder—chronic catarrh of the kidneys and bladder—albuminuria.

6. **Diseases of the Prostate**—Chronic hyperæmia of the prostate, resulting from interrupted circulation in the bowels, constipation, hemorrhoids, etc.

7. **Chronic Catarrh of the Womb**, produced by menstrual disturbances, hemorrhoids, and the different consequences of interrupted circulation in the bowels.

8. **Gout**, especially in the early stages.

9. **Diabetes Mellitus**—By the use of the Carlsbad Thermal Waters, not only the clinical phenomena of this disease (the tormenting thirst, violent hunger, dryness of the skin) disappear in a very short time, but it also considerably diminishes the secretion of sugar in the urine, and frequently causes it to disappear altogether.

Diseases of the stomach are best treated with the Carlsbad Water, whereas the Carlsbad Sprudel Salt (powder form) is to be preferred in diseases of the viscera, such as intestinal canal, spleen, kidneys, inadiposis, etc.

PAMPHLETS MAILED ON APPLICATION.

EISNER & MENDELSON CO.,

SOLE AGENTS,

6 BARCLAY STREET, **NEW YORK.**

It is Important

For the Physician to watch the character and quality of the remedies used in his prescriptions. Responsibility *does not cease* when the patient leaves the office; for impure, stale, or inferior preparations may be used without his knowledge. Personal examination of remedies prescribed—is the best check upon substitution.

FERRO-SALICYLATA

LIQUID.

MERRELL.

An eligible combination of Methyl Salicylate and Tinct. Citro-Chloride Iron, in a pleasant and permanent form.

EACH FLUID DRACHM CONTAINS

True Salicylic Acid—from Oil Wintergreen (Methyl Salicylate), - - - - 5 grs.
Tinct. Citro-Chloride Iron, 5 minims.

Not Sold in Bulk.

ELIXIR

Pinus Compositus.

MERRELL.

Each Fluid Drachm Contains

White Pine—fresh bark,	2½ grs.
Balm Gilead Buds,	2 grs.
Spikenard,	2 grs.
Cherry Bark,	1¾ grs.
Ipecac,	1–4 gr.
Sanguinarina Nitrate,	1–64 gr.
Morphine Acetate,	1–16 gr.
Ammonium Chloride,	1–2 gr.
Chloroform,	1–2 minim.

Not Sold in Bulk.

FERRO-SALICYLATA.—*Merrell.*

Ferro-Salicylata is especially valuable in that shade of disease peculiar in anæmic, delicate, poorly nourished or broken-down patients—usually aged people—children or youth—but met with in all ages. In adults, and often in children when the disease is not plainly chronic, there will be a long series of recurrences with intervals of doubtful health. It may also be employed in acute articular rheumatism, and in some cases of acute tonsillitis, especially where the diagnosis is at first in doubt between rheumatic angina and diphtheria; also, in acute rheumatism and rheumatic affections generally.

Ferro-Salicylata may be used in combination with the Iodides and Bromides of Potassium and Sodium. Associated with the former, it will prove an admirable alterative and tonic in second syphilis attended by a debilitated condition of the general system. It also combines well with Chlorate Potassium, the Hypophosphites, with Fowler's Solution, the vegetable bitter tonics, either in Fluid Extract or Tincture Form.

Ferro-Salicylata and all other preparations of this Company reach the laity through professional channels only. We therefore avoid entering into the minute details of their application, leaving the physician to make such practical use of our therapeutic notes as in his judgment may be best suited to individual cases.

Ferro-Salicylata may be obtained of wholesale druggists throughout the United States, of our Eastern Office, 96 Maiden Lane, New York City, or direct from the Laboratory.

Please designate "Ferro-Salicylata—*Merrell.*"

ELIXIR PINUS COMPOSITUS.—*Merrell.*

An admirable combination of well known and highly approved medicinal agents; recommended in acute, chronic, and capillary bronchitis—in ordinary coughs and colds, and wherever a "routine" expectorant is suggested. In the troublesome cough following the recent epidemic "La Grippe," it proved invaluable—many of our correspondents looking upon it as a "specific" in this stage of the disease.

CAUTION.—Physicians are reminded that the Elixir Pinus Compositus of this manufacturer is wholly unlike the many syrups, etc., under similar names, and the difference will be readily appreciated when tried. In testing the physical properties of the Elixir Pinus, note especially its delicate taste and perfect freedom from the odor of rank syrup, the drastic, harsh, and repulsive characteristics of the crude blood-root, and other coarser ingredients characteristic of competing preparations.

"Merrell Co.'s" "Green Drug," Fluid Extracts, True Salicylic Acid, Salts of Hydrastis, Fluid Hydrastis, and Specialties may be obtained of wholesale druggists throughout the United States, at the Home Office at Cincinnati, or the New York Office, 96 Maiden Lane, New York City, Richards Drug Co., San Francisco, Agents for Pacific Coast. Prices-current and printed matter cheerfully supplied.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

NEW YORK.

HENRY LEFFMAN, M. D.,

Analytical Chemist and Expert,

715 Walnut Street,

PHILADELPHIA, October 26, 1889.

MESSRS. EISNER & MENDELSON:

SIRS:—In response to inquiries made concerning the relative merits of the Johann Hoff's Malt Extract, and that sold under the name of Tarrant's Hoff's Extract, I may state as follows:

"That I have, during the past eighteen months, made a number of examinations of the principal forms of Malt Extract in the market, and have, among other matters, satisfied myself that the Johann Hoff's Malt Extract, as imported by you, is a Genuine Extract of Malt."

The judgment of the value of a liquid preparation of Malt will be largely based on the percentage of Alcohol, and the presence of any preservative, especially Salicylic Acid. It may be justly said that the less Alcohol found the better, provided its place is not taken by some more objectionable substance. Under such considerations, the Johann Hoff's Malt Extract possesses decided advantages over the preparation sold under the name of Tarrant's Hoff's Extract, in the fact that the former contains three and one-half per cent. of Alcohol, while the latter has yielded, in two samples, four and three-quarters and five per cent. respectively.

Further, I have noted in a number of examinations of the latter article—Tarrant's Extract—the presence of Salicylic Acid, while I have never, in repeated examinations of the Eisner & Mendelson Johann Hoff's Extract, found any trace of such preservative. The effects of Salicylic Acid have been extensively studied, and the unanimous opinion of sanitary chemists is, that it is very objectionable as an addition to any form of food or drink, and especially objectionable in Malt Extract. From some observations made in my own laboratory, and published in the *Polyclinic* in May, 1888, it appears that not only does Salicylic Acid wholly suspend the action of Diastase, to which Malt owes its starch-converting power, but that the starch-digesting power of the pancreatic secretion is also wholly suspended by it. It thus appears the addition of this body is to render the Extract not only inactive so far as its own function is concerned, but it introduces into the system an injurious substance, and one which interferes with an important function. Sanitary authorities, in various parts of Europe, have given from time to time much attention to the now indiscriminate use of this acid, and have all, so far as I am aware, condemned its employment in any article of food or drink. For this reason, among others as above noted, I am of the opinion that the Genuine Johann Hoff's Malt Extract, as imported by Eisner & Mendelson, is to be preferred. I may say that all the examinations were made on samples obtained in the open market, and in the bottles as originally imported. Yours,

HENRY LEFFMAN, M. D.,

Professor Chemistry Woman's Medical College, and Penna. College Dental Surgery; Food Inspector, Pennsylvania Board of Agriculture.

IN GYNÆCOLOGICAL PRACTICE

For Sub-Involution, Congestive Dysmenorrhœa, Chronic Metritis, &c.

AS AN INJECTION

For Hemorrhoids, Relaxation of Sphincter, Prolapsus of Rectum, &c.

AS A LOCAL APPLICATION

For Congestion of Mucous Membranes as in Conjunctivitis, Cervicitis, Pharyngitis, Gonorrhœa, &c.

HYPODERMICALLY

Or by the mouth, for Aneurisms, Dilatation of Heart, Acute and Chronic Dysentery, Hæmoptysis, Hæmaturia and other Hemorrhages; Chronic Arteritis, Incontinence, Spermatorrhœa, Varicocele, Varicose Veins, Diabetes Insipidus; with the Bromides for Spinal Meningitis, Acute Myelitis and Congestion of Meninges and Cord, and in obstetric practice, especially when Post-Partum Hemorrhage is threatened,

ERGOTOLE S. & D.'S

has been most successfully employed. When given hypodermically, more prompt action and the best results are usually obtained.

Ergotole is a new preparation of Ergot of Rye. It is specially made for hypodermic use by a new process; representing all the active principles of Ergot in a very concentrated form, and entirely freed from all inert and irritating constituents.

It causes neither pain nor abscess, and **keeps perfectly without precipitation for any length of time.** It has been extensively tried in hospital and private practice, hypodermically and administered by the mouth, proving uniformly efficacious, and it has been pronounced

THE MOST EFFICIENT PREPARATION OF ERGOT IN USE

One minim representing the full therapeutic strength of about 2½ grains of the best Spanish Ergot. Administered by the mouth, it will prove itself divested of all irritating and nauseating properties, which are so objectionable in the officinal fluid extract.

An eminent physician of Baltimore states that he has had uniform and satisfactory results in over fifty cases of various diseases from a supply of our Ergotole, which was prepared over two years ago, and kept in a cork-stopped bottle partially filled.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious Elixir, **QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

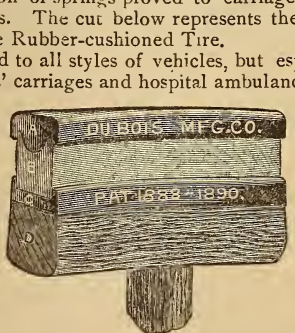
RUBBER-CUSHIONED TIRES.

Comfort, ease, and luxury secured by the use of these improvements in vehicles; they are also economical in that they prolong the life of a carriage by practically eliminating all jar and vibration.

The Du Bois Manufacturing Company is prepared to furnish the cushioned tire in all sizes. They are durable, elastic, and practically noiseless, making riding over rough roads easy, and are as great an improvement to the modern vehicle as the intervention of springs proved to carriages hung on dead axles. The cut below represents the construction of the Rubber-cushioned Tire.

Adapted to all styles of vehicles, but especially to physicians' carriages and hospital ambulances.



A—Steel outer tire or shoe. **B**—Rubber Cushion. **C**—Steel channel or tire. **D**—Is wooden felloe or rim.

These will stand the roughest usage without displacing the outer shoe or tire. Can be applied to wheels already in use. For prices, address,

The Du Bois Manufacturing Company,
Otter St., below Front, Philadelphia, Pa.

THE HYGIENE
OF THE
Lying-in Room.

ALTHOUGH it is well known that women in the puerperal state are peculiarly sensitive to the influence of imperfect sanitation, it is remarkable that comparatively little attention is pa[illegible]e of the lying-in chamber in private dwellings.

We do not believe the careful practitioner ignores the importance of disinfectants in this connection, yet it is true their use is frequently considered of secondary value, when the greatest skill will be vain, so long as the surroundings of the patient are lowering the vitality or poisoning the blood.

Because of the unpleasant odor it is easily understood why objection should be made to the use about the room of chloride of lime or carbolic acid, or any pungent compound, but when thorough disinfection and complete deodorization may be attained by the use of odorless yet harmless chemicals, it seems it should be a pleasing duty of the physician to adopt their use.

For this purpose especially let us again call your attention to Platt's Chlorides, at once a reliable disinfectant, a prompt deodorant and a powerful antiseptic, entirely free from odor or color, clean, stainless, and economical.

***

To neutralize the gases and odors of the room, moisten a towel or sheet with a mixture of one part Platt's Chlorides to ten of water. Shake or snap this about and then suspend it to the gas bracket, or any convenient hook, that it may act as a permanent absorbent. Re-moisten when dry.

For the vessels of the room, use one part Chlorides to four of water, to neutralize the discharges, etc.

For sprinkling about the room use a ten per cent. solution and scatter with a whisp broom. It leaves no stain.

As a vaginal injection one part to fifty, or, if fetor still persists, one to thirty parts of water, as judgment and experience may dictate.

***

The following practical words from a well-known New York city physician are to the point:

In all confinements, with the best of care, there is necessarily a good deal of offensive air under the bed covers which is not due to offensive lochia, but to perfectly normal discharges and perspiration, both of which are so profuse during the lying-in period. This effluvium is as unpleasant to the lady herself as to her physician and attendants. For all these conditions let me urge the profession to make free use of "Platt's Chlorides." For injections at first, use one part to thirty of water. The strength can be easily modified to suit the circumstances. For simply purifying the room or bed I saturate towels with undiluted Chlorides and hang about the room or spread between the sheets and re-saturate when evaporation is complete. It is very effectual.

A. M. PIERSONS, M. D.,
24 East 127th Street.

DISEASES IN WHICH

Oxygen and Nitrogen Monoxide

HAVE BEEN EMPLOYED.

(See "THERAPEUTIC USES OF OXYGEN AND NITROGEN MONOXIDE," which can be obtained upon application.)

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

"Polar Star" Norwegian Cod-liver Oil.

PINT BOTTLES.

OUR Cod-liver Oil is light-colored, sweet tasting, will stand the ice test, and is strictly pure. It is especially pressed for us from select livers, and has been exported to us alone for a term of years.

FRENCH'S EMULSION OF Pure Norwegian Cod-liver Oil.

With Bi-Basic Phosphate of Lime.

PINT BOTTLES.

THIS emulsion is made from our "Polar Star" Norwegian Cod-liver Oil that we import directly from Norway, and which is now well known to the retail drug trade on account of its superior quality.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE :—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, ʒi to ʒij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

For Rent.

For Physician, an office, with furnished bedroom, formerly occupied by late Dr. L. Himmell.

340 South Fifteenth St.

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

DR. MASSEY'S PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,

Physician in Charge.

Detroit College of Medicine.

A FIRST-CLASS School of Medicine, with all modern facilities. Excellent corps of Instructors. Clinical advantages unsurpassed. Send for Catalogue.

Detroit, Mich,

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D., Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D. Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof. of Ophthalmology
BARTON COOKE HIRST, M.D., Professor of Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS, M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

A. G. SPALDING & BROS.'

Gymnasium Department.

From this time henceforth the **Gymnasium** in all its important details will be a department in our business to which we shall devote especial attention.

With the addition to our own valuable patents, those of the **A. J. Reach Company**, of Philadelphia, recently purchased by us, enables us to claim the most **extensive department** of **Gymnasium Appliances in the world.**

We have been encouraged in this **important** movement by the constantly increasing demand from **Colleges, Seminaries**, and other **Educational** Institutions for Gymnasium Supplies, and henceforth we shall devote special attention to furnishing **plans, specifications**, and **estimates** to such and for **private residences** as well, and solicit correspondence with all contemplating the introduction of gymnastics for any purpose.

The Peerless Pulley Weight, illustration of which appears on this page, is a most perfect appliance for the development of the **chest** and **arms**, adjustable to the height of *any* person, and in weight from five to thirty pounds. For **man or woman** this is the peer of any method yet devised, especially for home use. Realizing the attention the **medical profession** and the **teacher**, are now giving to **healthful** exercise in **schools**, we solicit also their correspondence, and any orders, or business proceeding from such, will be gratefully received, and entitled to our best rates of discount, and will receive prompt and careful attention.

Visitors to our different establishments at **Chicago, New York**, and **Philadelphia** will always be welcome and politely served by the many efficient salesmen constantly in attendance.

A. G. SPALDING & BROS.,

Clinical Notes sent on Application. ST. LOUIS, MO.

FAIRCHILD'S

ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND
OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED
IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges.
Please mention this journal.

Wyeth's Beef Juice

A Liquid Preparation of the Choicest Beef, containing the Nutritious Albuminous Principles in an unaltered and soluble form.

Physicians have, for a long time, had their attention called to the fact that beef extracts, made by the LIEBIG process, are utterly devoid of the valuable and nutritious albuminous constituents of meat, as these are coagulated and filtered out in the process of manufacture. In consequence, the most advanced class of medical practitioners to-day, merely use the commercial extracts of meat as stimulants, and not for any nutritious properties they may possess. Realizing this fact, we have, after continued and exhaustive experiments, succeeded in preparing the article which we offer as WYETH'S BEEF JUICE, and for which we make the following claims:

FIRST.—That it contains all of the albuminous principles of beef in an active and soluble form. This may be proven by mixing a small portion of Beef Juice with an equal part of water in a test-tube or any convenient vessel, and gradually heating to the boiling point, when the albuminous principles will be coagulated.

SECOND.—That it contains the Hæmoglobin of the meat unaltered, as is evidenced by the bright arterial color of the preparation, and by the fact that it loses this color upon boiling, as the Hæmoglobin is precipitated with the albumen.

THIRD.—That it will be found upon trial to possess the nutritive properties of the choicest beef to a higher degree than any extract of meat yet offered to the profession.

Physicians will find WYETH'S BEEF JUICE of great value as a strengthening diet in cases of convalescence, consumption, nervous prostration, and similar diseases; also, in typhoid fever, debility, etc. Beef Tea prepared from it, contains more nourishment than any other liquid preparation of meat, and, when properly seasoned, is more grateful and appetizing to the patient. Professional men who are suffering from over-work, mental anxiety, etc., will find that one-half teaspoonful in about half a glass of iced water, taken at intervals during the day, and upon retiring, will relieve fatigue,—both of mind and body.

DIRECTIONS.—In cases of debility, nervous prostration, convalescence, etc., one-half to one teaspoonful in a half tumblerful of iced or luke-warm water.

CAUTION.—As the valuable albuminous elements are rendered insoluble by extreme heat, this preparation should only be mixed with iced or LUKE-WARM water, and never with water at the boiling point.

MANUFACTURED BY

JOHN WYETH & BROTHER,

PHILADELPHIA, PA.

Doctor:

How are those cases of Tuberculosis and Scrofula coming on?

By the way, did you ever think of the similarity in the lesions created by these two diseases—disintegration and breaking down of the tissue walls?

Now, what must be the obvious remedy? Not irritant and stimulant tonics, as iron, arsenic, etc. They only increase the force of pressure brought to bear against these same tissue walls, and cause them the sooner to give way, producing hemorrhages, extravasations, etc.

The true and unfailing remedy will be found in the genuine tissue builders, as prepared in McArthur's Compound Syrup of the Hypophosphites of Lime and Soda. Each atom finds its way unerringly to its place in the tissue walls, until they are built up so strong as to resist hemorrhages, extravasations, diapedesis and excessive perspiration. From this time on the improvement is rapid, and may be continued until the cure is permanent.

The individual may thus be built up until he is no more liable to a return of the disease than one who has never yet had it. The teachings of Salisbury and Churchill announce these truths, and the clinical experience of a few observant physicians confirms them.

The point of superiority in McArthur's Syrup is that the Hypophosphites are *chemically pure*, which is so very rare in such preparations.

One of the first effects produced by the use of our Chemically Pure Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

Their use is also indicated in all wasting discharges, Nerve Exhaustion, Brain Fatigue, Impotence, Spermatorrhea, Tabes Dorsalis and Mesenterica, Chronic Bronchitis and Cough, Diarrhea, Uterine Fibroids, and all diseases characterized by waste and faulty nutrition.

Physicians when prescribing will please write thus:

℞ Syr: Hypophos: Comp: McArthur. One Bottle.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

A valuable treatise on the "Curability of Consumption" sent free. A large bottle free if you will pay express charges.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

W. H. Schieffelin & Co.,

170 & 171 William Street,

NEW YORK.

THE GENUINE IMPORTED NATURAL

CARLSBAD SPRUDEL SALT

AND

CARLSBAD MINERAL WATERS

Are Highly Recommended for

1. **Diseases of the Stomach**—Chronic catarrh of the stomach, cardialgia, ulcer of the stomach.

2. **Diseases of the Intestines**—Chronic constipation, chronic diarrhœa.

3. **Diseases of the Spleen**—Chronic hyperæmia of the spleen, tumors of the spleen, arising after intermittent fever, typhus, etc., and the effects of a residence in marshy districts or hot climates.

The genuine imported Carlsbad Sprudel Salt is put up in round bottles like the above cut. Each bottle comes in a paper cartoon with the seal of the City of Carlsbad, and signature of "EISNER & MENDELSON CO.," sole Agents, on the neck of every bottle and on the outside cartoon.

4. **Liver Diseases**—Hyperæmia of the liver, resulting from agglomeration of the blood in the veins, if it does not originate in organic defects; fat liver, jaundice, produced by catarrh of the passages of the bile, or by liver complaint in consequence of violent emotions; gallstones.

5. **Diseases of the Kidneys and Bladder**—Gravel, nephritic stones, sand, stone in the bladder—chronic catarrh of the kidneys and bladder—albuminuria.

6. **Diseases of the Prostate**—Chronic hyperæmia of the prostate, resulting from interrupted circulation in the bowels, constipation, hemorrhoids, etc.

7. **Chronic Catarrh of the Womb**, produced by menstrual disturbances, hemorrhoids, and the different consequences of interrupted circulation in the bowels.

8. **Gout**, especially in the early stages.

9. **Diabetes Mellitus**—By the use of the Carlsbad Thermal Waters, not only the clinical phenomena of this disease (the tormenting thirst, violent hunger, dryness of the skin) disappear in a very short time, but it also considerably diminishes the secretion of sugar in the urine, and frequently causes it to disappear altogether.

Diseases of the stomach are best treated with the Carlsbad Water, whereas the Carlsbad Sprudel Salt (powder form) is to be preferred in diseases of the viscera, such as intestinal canal, spleen, kidneys, inadiposis, etc.

LAPACTIC PILLS, S.& D.'s.

(PILULÆ LAPACTICÆ.)

Aloin	1-4 gr.
Strychnine	1-60 gr.
Ext. Belladonna	1-8 gr.
Ipecac	1-16 gr.

An elegant and most efficient combination **introduced by us** and found in practice to possess superior advantages over similar formulæ for the relief of

HABITUAL CONSTIPATION, ATONIC DYSPEPSIA, BILIARY ENGORGEMENT AND MANY GASTRIC DISORDERS.

☞ **Since we introduced our Lapactic Pills**—some four years ago—a number of manufacturers have adopted the same formula and have furnished these pills under the same name. Should Physicians fail to obtain satisfactory results from Lapactic Pills not of our make (and we have received a large number of such complaints), we shall be glad to furnish a sample of our Lapactic Pills on application. We feel confident that they will fully substantiate our claims.

Please use the term **"Lapactic Pills, S. & D.'s"** when prescribing these pills.
Dose: One to two pills when going to bed.

PAN-PEPTIC TABLETS, S.& D.'s.

A TONIC DIGESTIVE.

Pure Pepsin	1 gr.
Pure Pancreatin	1 gr.
Pure Caffeine	¼ gr.
Acid Lacto-Phosphate of Calcium.	
Celery.	

The **Pepsin** and **Pancreatin** used in these tablets possess highest digestive power, and cannot fail to promptly start and accomplish

THE DIGESTION OF FOOD.

Whilst the **Caffeine,** by its stimulant tonic action on stomach and bowels, assists and quickens the normal digestion and assimilation of food, the **Acid Lacto-Phosphate of Calcium** contributes to the tonic action of the tablets, and aids to build up the general system, and a small quantity of that refreshing aromatic nerve stimulant, **Celery,** imparts a pleasant flavor and acts as an appetizer.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing, etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address,

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

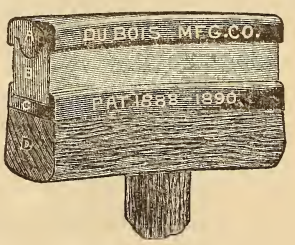
RUBBER-CUSHIONED TIRES.

Comfort, ease, and luxury secured by the use of these improvements in vehicles; they are also economical in that they prolong the life of a carriage by practically eliminating all jar and vibration.

The Du Bois Manufacturing Company
is prepared to furnish the cushioned tire in all sizes. They are durable, elastic, and practically noiseless, making riding over rough roads easy, and are as great an improvement to the modern vehicle as the intervention of springs proved to carriages hung on dead axles. The cut below represents the construction of the Rubber-cushioned Tire.

Adapted to all styles of vehicles, but especially to physicians' carriages and hospital ambulances.



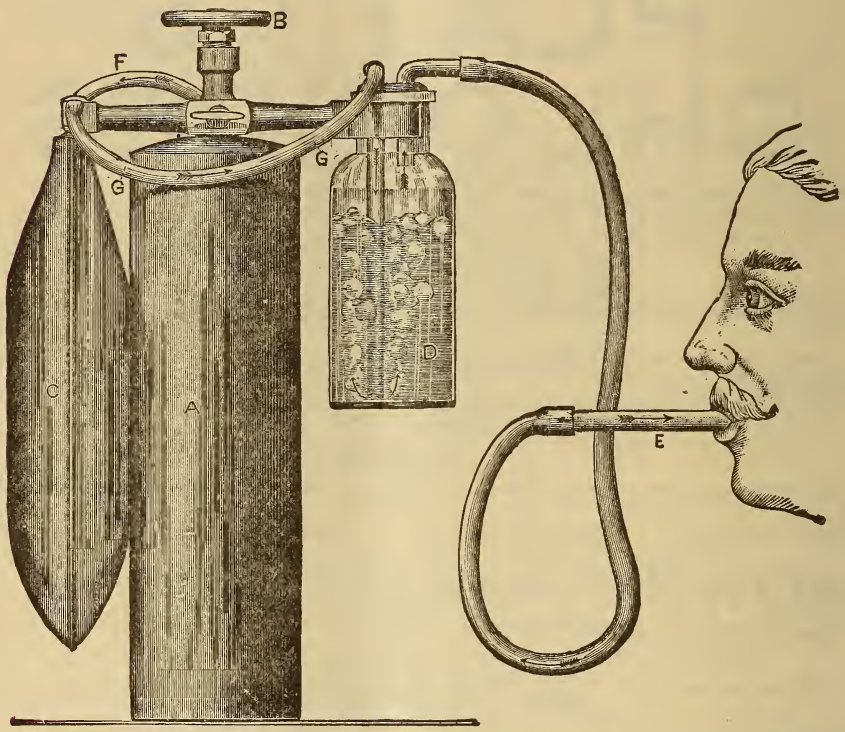
A—Steel outer tire or shoe. **B**—Rubber Cushion. **C**—Steel channel or tire. **D**—Is wooden felloe or rim.
These will stand the roughest usage without displacing the outer shoe or tire. Can be applied to wheels already in use. For prices, address,

The Du Bois Manufacturing Company,
Otter St., below Front, Philadelphia, Pa.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE BEST ANTISEPTIC

FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

"Polar Star" Norwegian Cod-liver Oil.

PINT BOTTLES.

FRENCH, RICHARDS & CO.,

Philadelphia, Pa.

There is no Nourishment

in Tea or Coffee, but plenty in

COCOA

especially in

VAN HOUTEN'S

THE DRINK QUESTION

is ever coming to the front. What beverage shall we drink to quench thirst? The most popular non-intoxicant is cocoa, which is rapidly supplanting tea and coffee as a national beverage. There are many excellent cocoas, but in advance of all other preparations stands VAN HOUTEN'S which is universally declared to be perfectly pure, free from fat, easily digested, delicious to the taste, nutritious, and a stimulant without any depressing after-effects.

VAN HOUTEN'S COCOA was introduced into the household of the late Emperor of Germany upon high recommendation. The senior physician of the London Court Hospital has used this brand of Cocoa for many years. It is strongly recommended to Students and all whose duties involve much wear and tear, whether mental or physical. For these reasons it has earned the highest encomiums of the leading analysts of the day.

What shall we drink to raise the spirits high?
VAN HOUTEN'S COCOA, is the universal cry!
The purest and most delicious;
The best and most nutritious.

VAN HOUTEN'S COCOA - - - - - "BEST & GOES FARTHEST."

☞ It only needs a single trial to convince any one of the superiority of VAN HOUTEN'S COCOA. Please insist upon your grocer or storekeeper ordering it for you, *and take no substitute.* It is put up in one-quarter, one-half, and one-pound cans. ☞ If not obtainable, enclose 25 cents in stamps or postal note to either VAN HOUTEN & ZOON, 106 Reade Street, New York, or 45 Wabash Avenue, Chicago, and a can will be sent by mail, *if you mention this publication.* Prepared only by VAN HOUTEN & ZOON, Weesp-Holland.

VAN HOUTEN'S COCOA - - - - - "ONCE TRIED, ALWAYS USED."

102

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

FRAUD.

Unscrupulous parties are selling an inferior Wine, calling it Royal Tokay, thus profiting by the numberless Medical Editorials written about our genuine product. The Wine cannot be used as a substitute for ours, and many physicians have unjustly blamed us for damage done, imagining they were securing our Wine, which they had already tested with complete satisfaction. Your patients will not secure the Wine you prescribe unless you specify CALVICO TOKAY, by which name it will hereafter be known.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

LONDON. PARIS. CALCUTTA. MONTREAL.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1 minim.
" Ignatia Amara,	1 "
" Cinchona,	4 "
" Matricaria,	1 "
" Gentian,	½ "
" Columbo,	½ "
" Phosphorus, C. P.,	1-300 gr.
Aromatics,	2 minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

I. O. WOODRUFF & CO.,

Manufacturers of Physicians' Specialties,

No. 88 Maiden Lane, New York City.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

DR. MASSEY'S
PRIVATE SANITARIUM
212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,

Physician in Charge.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russ an, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

"The Limitation of the Family"

is a subject of Deep and Far-reaching Importance, and is seriously and very ably treated in "THE LAW OF POPULATION." By Mrs. Annie Besant.

This justly famous work is again in the market, and can be procured at wholesale and retail of the Publishers. The retail price of the **Law of Population** is 30 CENTS. This edition contains a fine steel portrait of MRS. BESANT.

Send all orders to the Publishers.

UNIVERSITY OF MARYLAND
SCHOOL OF MEDICINE.

Eighty-fourth Annual Announcement, 1890–91. The next regular session will begin October 1st, 1890. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY:

GEORGE W. MILTENBERGER, M. D.,
Emeritus Professor of Obstetrics, and Honorary President of the Faculty.
CHRISTOPHER JOHNSON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Emeritus Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology and Clinical Professor of Diseases of Nervous System.
LOUIS McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Obstetrics.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
JOHN NOLAND MACKENZIE, M. D.,
Clinical Professor of Diseases of the Throat and Nose.

Professor of Anatomy.

Demonstrator of Anatomy.

For catalogue and further information, address: **Dr. I. E. ATKINSON, Dean, 605 Cathedral Street.**

DENTAL DEPARTMENT.

Ninth Annual Announcement. Next regular session begins October 1st, 1890. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY:

FRED. J. S. GORGAS, M. D., D.D. S.,
Professor of Principles of Dental Science, Dental Surgery, and Dental Mechanism.
JAMES H. HARRIS, M. D., D.D. S.,
Professor of Operative and Clinical Dentistry.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.

Professor of Anatomy.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D.D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D.D. S.,
Demonstrator of Operative Dentistry.

Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M.D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.
JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN, M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.
SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.
THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address

W. H. DUNLAP, M. D., Registrar, SYRACUSE, N. Y.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

ESTABLISHED 16 YEARS. BEWARE OF IMITATIONS.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE.

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, **"With Iron, No. 1;"** while the same preparation, **Without Iron,** is designated on the label as **"No. 2."**

In prescribing this preparation, physicians should be particular to mention *"COLDEN'S,"* viz., *"Ext. Carnis Fl. Comp. (Colden)."* A Sample of COLDEN'S BEEF TONIC will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

C. N. CRITTENTON, General Agent, 115 Fulton St., New York.

GLENN'S SULPHUR SOAP.

BEWARE OF COUNTERFEITS.

Physicians know the great value of the local use of Sulphur in the Treatment of Diseases of the Skin.

Constantine's Pine-Tar Soap.

THE BEST SOAP MADE.

Has been on trial among physicians for very many years as a healing agent. By far the Best Tar Soap made.

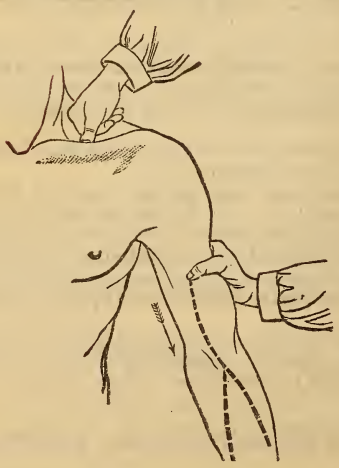
Wholesale Depot, C. N. CRITTENTON, 115 Fulton St., New York.

Samples of above Soaps SENT FREE, on application, to any Physician enclosing card.

THIRD EDITION.

ACCIDENTS AND EMERGENCIES

By CHARLES W. DULLES, M.D.



"A work that ought to be in every home, and every home that has a copy kept where it can be consulted at short notice is likely to find it worth many times its small cost."—*Philadelphia Evening Telegraph,* May 5, 1888.

"The methods of treatment recommended are trustworthy and reliable. The manual is one of the best of this class of books and should be in the library of every householder, ready for reference at a moment's notice."—*Science,* May 18, 1888.

Sent on receipt of 75 Cents.

ADDRESS:

Publisher Medical and Surgical Reporter,

P.O. Box 843. PHILADELPHIA, PA.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

MILK OF MAGNESIA.

A PURE HYDRATED OXIDE OF MAGNESIUM.—(MgH_2O_2.)

ANTACID AND CORRECTIVE.

Especially recommended in the Gastro-intestinal irritations of infant, child and adult life—Nausea—Vomiting in Pregnancy—Sour Stomach—Diarrhœa—Cholera Infantum—and the Rheumatic and Gouty conditions resulting from acid secretions.

This Hydrate presents Magnesia practically in solution without grittiness or precipitation—No danger from concretions as with the calcined—Free from Carbonic Acid—Miscible with other fluids—in a form easy of administration and absorption. Superior to lime water or chalk mixture for addition to milk. It is not a purge; but in antacid, corrective or mild laxative indications will be found reliable and safe. It combines well with Syrup Rhubarb—Soda—Opium—the various astringents, etc.

PHOSPHO-MURIATE OF QUININE,

COMPOUND.

A RELIABLE ALTERATO-CONSTRUCTIVE,

Particularly indicated in conditions of **disturbed nutrition** and **tissue retrograde.**

An easily appropriated general tonic, promoting digestion, and safe under prolonged use. A permanent combination of the soluble Wheat Phosphates, with Muriate of Quinine, Iron and Strychnia.

Of greater strength than the various Hypophosphite compounds.

The above are put up in Dispensing and Trade Containers.

DIGESTIBLE COCOA.
WHEAT PHOSPHATES.

CH. MARCHAND'S

Peroxide of Hydrogen,

MEDICINAL (ABSOLUTELY HARMLESS)

H_2O_2

is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a nostrum.

Experiments of Prof. Pasteur, Dr. Koch, and many other scientific authorities, prove beyond doubt that Germs, Bacteria, or Microbes cause and develop: **NOSE, THROAT, AND LUNG DISEASES—Diphtheria, Croup, Sore Throat, Catarrh of the Nose, Hay Fever, Bronchitis, Laryngitis, Pharyngitis, Whooping Cough, Consumption and other Chronic Affections, specific or not.**

GERMS, BACTERIA, OR MICROBES are instantaneously annihilated when brought into contact with **Ch. Marchand's Peroxide of Hydrogen.** This wonderful bactericide acts both chemically and mechanically upon all excretions and secretions, so as to thoroughly change their character and reactions instantly. By destroying the microbian element this remedy removes the cause of the disease.

Prepared only by

Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

CAUTION.—I would earnestly impress upon the profession the very great importance of prescribing only my **Peroxide of Hydrogen (Medicinal)**, from which all hurtful chemicals have been eliminated.

By specifying in your prescriptions "Ch. Marchand's Peroxide of Hydrogen (Medicinal)," which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon.

A book containing full explanations concerning the therapeutical applications of **Ch. Marchand's Peroxide of Hydrogen (Medicinal)**, with opinions of the profession, will be mailed to physicians free of charge on application.

¼ lb. bottle, retail, 35 cents; ½ lb. bottle, retail, 50 cents; 1 lb. bottle, retail, 75 cents.

SOLD BY LEADING DRUGGISTS.

Laboratory, 10 West Fourth Street, New York.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

{ Phenacetine-Bayer, . . 3 grs.
{ Caffeiæ Citrat., ... 1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

{ Phenacetine-Bayer, . . 2½ grs.
{ Salol, ... 2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

{ Phenacetine-Bayer, . . 1¼ grs.
{ Salol, ... 1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

{ Sulfonal-Bayer, . . . 10 grs.

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by DR. GEO. W. MCDADE, exclusively for ELI LILLY & Co., and endorsed by DR. J. MARION SIMS.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

Price, $2 00 per bottle.

Send for copy of our Hand-Book of Pharmacy and Therapeutics. Useful for reference and contains much valuable information.

PIL. APHRODISIACA

(LILLY.)

Phosphorus and **Nux Vomica**, as is well known to the profession, act as powerful tonics to the nervous system, especially the spinal cord, and can be relied upon as possessing real aphrodisiac power The **Damiana** used is the genuine **Turnera Aphrodisiaca.** By our process for the manufacture of **Phosphorus Pills,** a thorough subdivision of phosphorus in the mass is obtained, and, with a coating perfectly **protecting** it from **oxidation,** there is nothing to be desired. It is necessary that the administration of this pill be continued from **three to four weeks,** or until the **system is thoroughly under the influence of the remedy.** It is indicated in **mental overwork, sexual debility, impotency.** It is decidedly beneficial in cases of **nocturnal emissions,** the result of excesses, **mental apathy,** or indifference, and in an **enfeebled condition of the general system,** with **weakness or dull pain in the lumbo sacral region.** In diseases of the **reproductive organs** of the female, and especially of the uterus, it is one of our most valuable agents, acting as a **uterine tonic,** and gradually removing abnormal conditions, while at the same time, it imparts tone and vigor; hence, it is of value in **Leucorrhea, Amenorrhea, Dysmenorrhea,** and to remove the tendency to repeated miscarriages.

Obtain only in original package. Oval pink pills.

One Hundred Mailed on Receipt of $1.00.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared **Compound Extract of Quinquina**, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

Mr. Laroche, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, **Anæmia, Chlorosis, Intestinal Hæmorrhage, Castralgia, Exhaustion, Etc., Etc.**

PARIS.—22 RUE DROUOT.—PARIS.

The Model Ledger

enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

Specimen Pages will be sent on Application.

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.--

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

ROOFING.

GUM-ELASTIC ROOFING FELT costs only $2.00 per 100 square feet. Makes a good roof for years, and anyone can put it on. Send stamp for sample and full particulars.

January 19, 1889.

Charles W. Dulles, M.D.,
Dear Sir:

The Daily Pocket Record was received yesterday. Accept my thanks for prompt sending. I have used all sorts of Pocket Records, but have found yours the most desirable for a country physician's use of all the forms I have tested in the last thirty years.

Respectfully,
Jas. T. Clarke, M.D.

PREVENTING CONSUMPTION.

That Consumption is a contagious disease may be disputed; but, that it is in a very great degree infectious must be admitted, as according to statistics gleaned by the most competent authorities "one-seventh of the people who die from tuberculosis acquire the disease from breathing the air tainted with contagion by a person already affected."

It follows, therefore, by way of prevention of the disease, the most practical results must be looked for in the prompt destruction or disinfection of the materials thrown off by the Consumptive. The sputa expectorations and nasal discharges are offensive, poisonous, and dangerous, and through them the dread disease is passed along.

The liberal use of a reliable inodorous and inexpensive disinfectant about the sick-room is always an aid toward recovery for the patient, and a blessing as well as a protection to the attendants and friends, and this is equally true in cases of Consumption and ailments tending that way.

The practical advice of an experienced and most successful physician in this relation we sum up as follows: "Give your patient every chance. Keep the room pleasant, the air sweet and pure. Always have a bottle of Platt's Chlorides handy in the room. Put a mixture of one part chlorides to six or eight of water in the vessels before using, and keep a solution of this strength constantly in the cuspidor, or spittoon. This popular disinfectant has no smell, so your patient will not be annoyed; neither is it dangerous to use, as it contains no mercury.

"Should the patient be confined to the bed relieve the atmosphere of the room by occasionally shaking a towel wet with a mixture of one part chlorides to ten of water, and then leave the moistened towel hanging to the gas-bracket or any convenient hook. It is astonishing how quickly and thoroughly the air is changed and sweetened by this simple process, and how gratefully the patient will appreciate it."

To use this disinfectant frequently and liberally costs but a little, as a quart bottle is supplied by the apothecary at 50 cents, and this quantity is sufficient to prepare two to three gallons of disinfecting liquid of ample strength for general household and sick-room purposes.

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure. They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.
LAMBERT'S
LITHIATED HYDRANGEA
KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

"Polar Star" Norwegian Cod-liver Oil.

PINT BOTTLES.

OUR Cod-liver Oil is light-colored, sweet tasting, will stand the ice test, and is strictly pure. It is especially pressed for us from select livers, and has been exported to us alone for a term of years.

FRENCH'S EMULSION
OF
Pure Norwegian Cod-liver Oil.

With Bi-Basic Phosphate of Lime.

PINT BOTTLES.

THIS emulsion is made from our "Polar Star" Norwegian Cod-liver Oil that we import directly from Norway, and which is now well known to the retail drug trade on account of its superior quality.

FRENCH, RICHARDS & CO.,

Philadelphia, Pa.

A MENSTRUUM.

HORSFORD'S ACID PHOSPHATE.

THIS preparation has been found especially serviceable as a menstruum for the administration of such alkaloids as morphine, quinine, and other organic bases which are usually exhibited in acid combination.

The admixture with pepsin has been introduced with advantage when indicated.

The Acid Phosphate does not disarrange the stomach, but, on the contrary, promotes in a marked degree the process of digestion.

Dr. R. S. MILES, Glencoe, Minn., says: "I use it in a great many cases as a menstruum for quinine, when an acid is necessary."

Send for descriptive circular. Physicians who wish to test it will be furnished a bottle on application, without expense, except express charges.

Prepared under the direction of Prof. E. N. HORSFORD, by the

Rumford Chemical Works, Providence, R. I.

BEWARE OF SUBSTITUTES AND IMITATIONS.

CAUTION:—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

A Phosphorized Cerebro-Spinant

(FRELIGH'S TONIC).

FORMULA.

Ten minims of the Tonic contain the equivalents (according to the formulæ of the U. S. P., and Dispensatory) of

Tinct. Nux Strychnos,	1 minim.
" Ignatia Amara,	1 "
" Cinchona,	4 "
" Matricaria,	1 "
" Gentian,	½ "
" Columbo,	½ "
" Phosphorus, C. P.,	1-300 gr.
Aromatics,	2 minims.

Dose: 5 to 10 drops in 2 tablespoonfuls of water.

INDICATIONS.

Paralysis, Neurasthenia, Sick and Nervous Headache, Dyspepsia, Epilepsy, Locomotor Ataxia, Insomnia, Debility of Old Age, and in the Treatment of Mental and Nervous Diseases.

A BALTIMORE PHYSICIAN, WHOSE DIPLOMA DATES FROM 1825, SAYS:

"Your combination I find vastly more effective than any tonic I have ever used. It furnishes a most powerful evidence of the vastly increased power of medicament by combination and judicious pharmaceutic preparation."

Price, One Dollar per Bottle, containing 100 of the Average 5-Drop Doses.—Physicians' single sample delivered, charges prepaid, on application. That every physician may be his own judge of its value, irrespective of the opinions of others, we make the following

SPECIAL OFFER:

We will send to any physician, delivered, charges prepaid, on receipt of twenty-five cents, and his card or letter-head, half a dozen physicians' samples, sufficient to test it on as many cases for a week to ten days each. The Tonic is kept in stock regularly by all the leading wholesale druggists of the country. As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-lists, etc., address,

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month, thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f3i to f3ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

CHEMIST,

PHILADELPHIA.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. MCKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

A HANDSOME BINDER FOR THE REPORTER

WILL BE SENT FOR 50 CENTS.

SEND MONEY WITH ORDER.

Address,

MEDICAL AND SURGICAL REPORTER,
P. O. Box 843, Philadelphia.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

DR. MASSEY'S PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,
Physician in Charge.

UNIVERSITY OF MARYLAND
SCHOOL OF MEDICINE.

Eighty-fourth Annual Announcement, 1890–91. The next regular session will begin October 1st, 1890. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY:

GEORGE W. MILTENBERGER, M. D.,
Emeritus Professor of Obstetrics, and Honorary President of the Faculty.
CHRISTOPHER JOHNSON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Emeritus Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology and Clinical Professor of Diseases of Nervous System.
LOUIS MCLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Obstetrics.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
JOHN NOLAND MACKENZIE, M. D.,
Clinical Professor of Diseases of the Throat and Nose.

Professor of Anatomy.

Demonstrator of Anatomy.

For catalogue and further information, address: **Dr. I. E. ATKINSON, Dean, 605 Cathedral Street.**

DENTAL DEPARTMENT.

Ninth Annual Announcement. Next regular session begins October 1st, 1890. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY:

FRED. J. S. GORGAS, M. D., D.D. S.,
Professor of Principles of Dental Science, Dental Surgery, and Dental Mechanism.
JAMES H. HARRIS, M. D., D.D. S.,
Professor of Operative and Clinical Dentistry.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. MCLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.

Professor of Anatomy.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D.D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D.D. S.,
Demonstrator of Operative Dentistry.

Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For catalogue and other information, apply to **Dr. F. J. S. GORGAS, Dean, 845 Eutaw Street, Baltimore.**

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.
JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.

SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.

THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address

W. H. DUNLAP, M. D., Registrar, SYRACUSE, N. Y.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D., Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D., Professor of Physiology.

FAIRCHILD'S

ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND
OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF.

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED
IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Imported by **"EISNER,"**

When ordering the Genuine Article.

This has been the first Malt Extract introduced to the *Medical Profession* (1847). No preparation of Malt has been so long and extensively employed as a Medical

Food Nutrient and Tonic.

The following is an abstract from the work on the Pulmonary Diseases published by Prof. PROSPER DE PIETRA SANTA, *at Paris:*

"As a large number of patients lack the necessary power to digest solid food, and would through the use of stimulants be merely excited and weakened, therefore I regard it of immense value to the practitioner to bring to his aid a nutritious tonic and remedy like the *Johann Hoff's* Malt Extract, which will act not only as a tonic, but as a nutrient as well, and which is less exciting than wine as a stimulant."

"I have, during the past eighteen months, made a number of examinations of the principal forms of Malt Extract in the market, and have satisfied myself that the *Johann Hoff's* Malt Extract, imported by Eisner & Mendelson Co., is a genuine Malt Extract, FREE FROM Salicylic Acid or other objectionable substances."

HENRY LEFFMANN, M.D., Phila.

CAUTION: A preparation bottled in New York is being sold as "Hoff's" Malt Extract. To obtain the genuine, original article, please specify "JOHANN HOFF'S MALT EXTRACT, imported by Eisner," which will prevent substitution.

The Genuine has the signature of "hann Hoff" and "Moritz Eisner" on the neck of every bottle.

EISNER & MENDELSON CO., Sole Agents for the U. S.,

6 Barclay Street, New York.

Doctor:

You now find that your consumptive patients, with lowered vitality and exhausted tissues, are unable to bear the cold weather. With impaired appetite and weakened digestion, they cannot take and assimilate sufficient food to create the normal bodily heat.

Hence you notice them instinctively seeking the sunny side of the street, or hovering over the fire, shivering. They are now losing ground more rapidly than ever, on account of the devitalizing effects of the cold. The fear expressed by their acquaintances, that "the poor fellow will never see spring again," you find justified by the cough, the increased sputa and the rapid increase in the pulmonary lesions.

The cold, which is a tonic to those in good health, proves permanently depressing to them, because their tissues lack sufficient tone to produce the necessary reaction.

What are you to do? Give up the case of those in moderate circumstances, and send the rich ones to some warm, malarious climate?

No, Doctor; keep them with you, under your own watchful supervision.

Home comforts where they are will more than compensate for balmy air, with hotel inconveniences, in a strange land. Meet the accidents and emergencies of the case according to their indications as they arise, but place the patients at once and permanently on McArthur's Syrup, containing the Hypophosphites of lime and soda in their chemical purity. This will so build up all the tissues and impart tone and elasticity to the entire system, that a new life will spring up in the patient, with a power of resistance fully equal to the normal. This will be of permanent value, as it is not produced by temporary irritant stimulation, but by supplying the tissues with new food and adding cells faster than they are exhausted by the disease.

By so continuing you can keep them on the upward grade, while others are constantly losing, and, although the progress may be slow, yet you will find that your perseverance will be amply rewarded. Such a course means all the difference between the early death and the final recovery of a patient whose life may be very valuable to the family, friends and society.

The promise is surely worth the effort, and in consideration of the number of successes recorded from such treatment, you could hardly be justified in a continued neglect of its benefits.

A sample bottle will be sent free if you will enclose your professional card and agree to pay express charges.

A valuable treatise, "The Curability and Treatment of Consumption," free.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{60}$ gr.), Atropiæ Sulph. ($\frac{1}{100}$ gr.), Codeia ($\frac{1}{20}$ gr.), Antimony Tart. $\frac{1}{25}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis, fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{10}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen, lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice, MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

LAPACTIC PILLS, S. & D.'s.

(PILULÆ LAPACTICÆ.)

Aloin	1-4 gr.
Strychnine	1-60 gr.
Ext. Belladonna	1-8 gr.
Ipecac	1-16 gr.

An elegant and most efficient combination **introduced by us** and found in practice to possess superior advantages over similar formulæ for the relief of

HABITUAL CONSTIPATION, ATONIC DYSPEPSIA, BILIARY ENGORGEMENT AND MANY GASTRIC DISORDERS.

☞ **Since we introduced our Lapactic Pills**—some four years ago—a number of manufacturers have adopted the same formula and have furnished these pills under the same name. Should Physicians fail to obtain satisfactory results from Lapactic Pills not of our make (and we have received a large number of such complaints), we shall be glad to furnish a sample of our Lapactic Pills on application. We feel confident that they will fully substantiate our claims.

Please use the term **"Lapactic Pills, S. & D.'s"** when prescribing these pills.
Dose: One to two pills when going to bed.

PAN-PEPTIC TABLETS, S. & D.'s.

A TONIC DIGESTIVE.

Pure Pepsin	1 gr.
Pure Pancreatin	1 gr.
Pure Caffeine	¼ gr.
Acid Lacto-Phosphate of Calcium.	
Celery.	

The **Pepsin** and **Pancreatin** used in these tablets possess highest digestive power, and cannot fail to promptly start and accomplish

THE DIGESTION OF FOOD.

Whilst the **Caffeine,** by its stimulant tonic action on stomach and bowels, assists and quickens the normal digestion and assimilation of food, the **Acid Lacto-Phosphate of Calcium** contributes to the tonic action of the tablets, and aids to build up the general system, and a small quantity of that refreshing aromatic nerve stimulant, **Celery,** imparts a pleasant flavor and acts as an appetizer.

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux,* Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic,* is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence,* having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

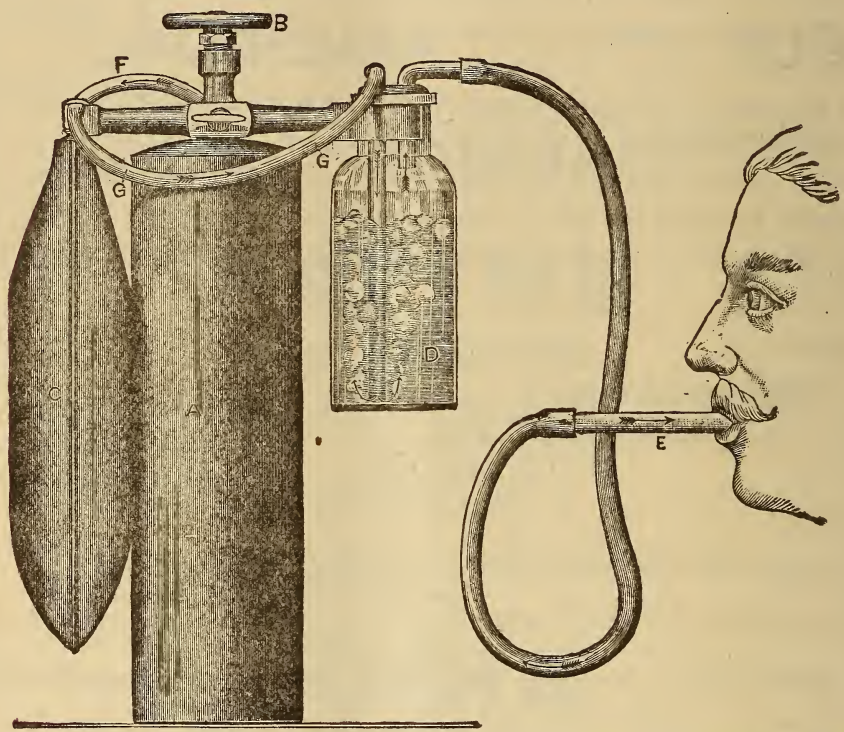
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC. PROPHYLACTIC. DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S
LITHIATED HYDRANGEA
KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S FLUID EXTRACT

OF

ERGOT, U. S. P.

(Claviceps Purpurea.)

EACH FLUID OUNCE REPRESENTS ONE TROY OUNCE OF ERGOT.

Med. Prop.: Parturient, Emmenagogue.

This important remedial agent is made from carefully selected sound ergot, ground in mills on our own premises. The fluid extract is made by the cold re-percolation process and fully represents the medicinal constituents of the drug. It is prepared under the supervision of Professor F. G. RYAN, of the Philadelphia College of Pharmacy.

PHILADELPHIA.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others. I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion."—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **G. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years.
Pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

SOLE AGENTS IN THE UNITED STATES AND CANADA.

FAIRCHILD'S
PANCREATIC TABLETS.

Afford a convenient, effective, and elegant means of administering the ferments of the pancreas.

These tablets can be given at any interval prior or subsequent to the ingestion of food, at the discretion of the physician, without entailing inconvenience to the patient.

In cases of intestinal indigestion, what can be a more rational practice than the introduction of the pancreatic ferments at the time when the gastric digestion is spent, and no obstacle is offered to their passage into the intestinal tract?

Pancreatic ferments bear no dependence upon an alkaline reaction. They are exceedingly active in neutral solutions and are not rendered inert by a merely acid reaction. It is, therefore, only at the height of *normal* gastric acidity that the pancreatic ferments may be theoretically held to be inoperative in the stomach. The ferments of the pancreas—known to digest rapidly every form of food, starches, fats, beef, milk, fibrin, etc., have proven useful as remedies, *per se*, notwithstanding the prejudice of theoretical views and conclusions based upon experiments under conditions purely artificial and differing in important respects from those in which their employment is indicated.

FAIRCHILD BRO'S & FOSTER,
82 and 84 Fulton Street, New York.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

FRAUD.

Unscrupulous parties are selling an inferior Wine, calling it Royal Tokay, thus profiting by the numberless Medical Editorials written about our genuine product. The Wine cannot be used as a substitute for ours, and many physicians have unjustly blamed us for damage done, imagining they were securing our Wine, which they had already tested with complete satisfaction. Your patients will not secure the Wine you prescribe unless you specify CALVICO TOKAY, by which name it will hereafter be known.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

DR. MASSEY'S
PRIVATE SANITARIUM
212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,
Physician in Charge.

WESTERN PENNSYLVANIA MEDICAL COLLEGE
CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

WALNUT LODGE HOSPITAL,
HARTFORD, CONN.

Organized in 1880 for the special medical treatment of
ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M. D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)	Soda.....1-2 Grains	Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.
Distilled Water.....35 "	Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.	Hyochotic Acid.....1-20 "	

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which HYDROLEINE is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, HYDROLEINE is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

CHEMIST,

WALNUT & THIRTEENTH STREETS,

PHILADELPHIA.

SOMNAL.

RADLAUER.

CHEMICAL FORMULA: $C_7H_{12}Cl_3O_3N$.

SOMNAL is a new soporific which produces sound sleep within half an hour after taking, and the effect lasting six to eight hours. The dose is **2 or 3 grammes** (half a teaspoonful); it is best administered with extract of licorice or with syrup of raspberry. **Somnal** does not affect either digestion, respiration, or the temperature of the body.

Dr. Guttman, Surg. Director of the City Hospital Moabit, in Berlin, states that he has applied "Somnal" in 60 to 70 cases at the hospital. Doses of 2 grammes have produced a quiet, refreshing sleep, lasting from 6 to 8 hours, without any unpleasant symptoms following its use.

The British Medical Journal says: "*Somnal*," when given in doses of half a teaspoonful, will produce sleep in thirty minutes. The sleep is described as sound and natural, lasting from 6 to 8 hours, and followed by no unpleasant effects.

Somnal *does not disturb the digestion*, has no influence over the pulse or temperature, and, in fact, has the excellent qualities **of both chloral and urethane without their disadvantages.**

Dr. Kny, of Strassburg, prefers *Somnal* to *Sulfonal*, and claims that it produces *deep sleep* **within half an hour after its administration,** and that it has but little influence on the heart's action.

Dr. J. S. Ridge, of Kingston, R. I., writes: "I have used Somnal on three cases of insomia, in middle aged and quite old ladies, with beautiful results, having used Sulphonal, Bromidia, Chloralamid with little or no result. I gave a lady 80 years old suffering from Insomnia 3 grammes of Somnal at bedtime in a little Syrup of Raspberry, with splendid effect, she getting, so the nurse says, 6 hours sound sleep. This is the best soporific I have used yet."

S. RADLAUER, - BERLIN.

It is Important

For the Physician to watch the character and quality of the remedies used in his prescriptions. Responsibility *does not cease* when the patient leaves the office; for impure, stale, or inferior preparations may be used without his knowledge. Personal examination of remedies prescribed—is the best check upon substitution.

FERRO-SALICYLATA

LIQUID.

MERRELL.

An eligible combination of Methyl Salicylate and Tinct. Citro-Chloride Iron, in a pleasant and permanent form.

EACH FLUID DRACHM CONTAINS

True Salicylic Acid—from Oil Wintergreen (Methyl Salicylate), - - - - 5 grs.
Tinct. Citro-Chloride Iron, 5 minims.

Not Sold in Bulk.

ELIXIR

Pinus Compositus.

MERRELL.

Each Fluid Drachm Contains

White Pine—fresh bark,	2½ grs.
Balm Gilead Buds,	2 grs.
Spikenard,	2 grs.
Cherry Bark,	1¾ grs.
Ipecac,	1–4 gr.
Sanguinarina Nitrate,	1–64 gr.
Morphine Acetate,	1–16 gr.
Ammonium Chloride,	1–2 gr.
Chloroform,	1–2 minim.

Not Sold in Bulk.

FERRO-SALICYLATA.—*Merrell.*

Ferro-Salicylata is especially valuable in that shade of disease peculiar in anæmic, delicate, poorly nourished or broken-down patients—usually aged people—children or youth—but met with in all ages. In adults, and often in children when the disease is not plainly chronic, there will be a long series of recurrences with intervals of doubtful health. It may also be employed in acute articular rheumatism, and in some cases of acute tonsillitis, especially where the diagnosis is at first in doubt between rheumatic angina and diphtheria; also, in acute rheumatism and rheumatic affections generally.

Ferro-Salicylata may be used in combination with the Iodides and Bromides of Potassium and Sodium. Associated with the former, it will prove an admirable alterative and tonic in second syphilis attended by a debilitated condition of the general system. It also combines well with Chlorate Potassium, the Hypophosphites, with Fowler's Solution, the vegetable bitter tonics, either in Fluid Extract or Tincture Form.

Ferro-Salicylata and all other preparations of this Company reach the laity through professional channels only. We therefore avoid entering into the minute details of their application, leaving the physician to make such practical use of our therapeutic notes as in his judgment may be best suited to individual cases.

Ferro-Salicylata may be obtained of wholesale druggists throughout the United States, of our Eastern Office, 96 Maiden Lane, New York City, or direct from the Laboratory.

Please designate "Ferro-Salicylata—*Merrell.*"

ELIXIR PINUS COMPOSITUS.—*Merrell.*

An admirable combination of well known and highly approved medicinal agents; recommended in acute, chronic, and capillary bronchitis—in ordinary coughs and colds, and wherever a "routine" expectorant is suggested. In the troublesome cough following the recent epidemic "La Grippe," it proved invaluable—many of our correspondents looking upon it as a "specific" in this stage of the disease.

CAUTION.—Physicians are reminded that the Elixir Pinus Compositus of this manufacturer is wholly unlike the many syrups, etc., under similar names, and the difference will be readily appreciated when tried. In testing the physical properties of the Elixir Pinus, note especially its delicate taste and perfect freedom from the odor of rank syrup, the drastic, harsh, and repulsive characteristics of the crude blood-root, and other coarser ingredients characteristic of competing preparations.

"Merrell Co.'s" "Green Drug," Fluid Extracts, True Salicylic Acid, Salts of Hydrastis, Fluid Hydrastis, and Specialties may be obtained of wholesale druggists throughout the United States, at the Home Office at Cincinnati, or the New York Office, 96 Maiden Lane, New York City, Richards Drug Co., San Francisco, Agents for Pacific Coast. Prices-current and printed matter cheerfully supplied.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

W. H. Schieffelin & Co.,

170 and 172 William Street,

NEW YORK.

SIR MORELL MACKENZIE, in the *Journal of Laryngology*, published in London, says the following:

"Most of the German Saline Springs are situated on a range of the Taunus Hills. Of these, unquestionably one of *the very best* is

SODEN.

"Containing, as it does, some 23 springs, with a temperature varying between 12° to 18° C., the waters of which are charged with Chloride of Sodium in varying degrees up to 116 Grammes per litre, and some of which are further charged with Carbonic Acid, the Health Resort of Soden is unquestionably one of the very best places for the treatment of Pulmonary and Catarrhal complaints.

"COMPRESSED PASTILLES of the Soden Water are now an article of commerce, as well as the mineral waters. These are made from two of the well-waters, and containing a large amount of Chloride of Sodium, are particularly serviceable in pharyngeal catarrhs, and may even in some degree be used where it is desired to obtain the effect of the Soden treatment, in persons who are unable to make the necessary journey to the Spa itself. I have watched the effects of the Soden Waters for a considerable period, and regard them as extremely valuable in obstinate catarrhal affections of the throat. The small amount of iron which they contain renders them very useful in the stages of Throat Consumption, and they do good in nearly all cases of relaxation of the mucous membrane.

"The Pastilles offer a most convenient method of using the Waters; producing both a local and general effect. They are especially beneficial in catarrhal diseases of the air-passages; I have frequently found them of great service in the case of singers and public speakers.

(Signed) "MORELL MACKENZIE, M. D., LONDON."

DR. NORRIS WOLFENDEN, Senior Physician Throat Hospital, London, writes:

"SIR:—The Wells of Soden are known to possess most powerful medicinal virtues, and have been found of the utmost benefit in the treatment of Catarrhal conditions of the upper respiratory tract, such as Bronchitis and Emphysema, and even in Pulmonary Phthisis. Many chronic throat conditions are equally benefited. Possessing a large amount of Sodium Chloride in their composition, they have a character which is quite special, and the fact that the several Wells of Soden contain varying amounts of this important mineral constituent, renders it possible to treat many complaints of opposite nature on the same spot.

"I consider the 'Soden Mineral Pastilles,' which you have introduced to me, to be a most convenient and pleasant mode of obtaining the medicinal benefits of the Soden Wells. They form an agreeable and effective lozenge, and I feel certain will be of great service to patients afflicted with certain forms of chronic throat disease. Sprays of the same waters would, I am sure, be of much service. I hope your efforts to introduce the Soden Mineral Waters and Pastilles into this country will meet with success.

"I am, Sir, yours faithfully,

(Signed) "R. NORRIS WOLFENDEN, M.D. Cantab.,

"Senior Physician Throat Hospital, London; Editor of Journal of Laryngology."

IN GYNÆCOLOGICAL PRACTICE

For Sub-Involution, Congestive Dysmenorrhœa, Chronic Metritis, &c.

AS AN INJECTION

For Hemorrhoids, Relaxation of Sphincter, Prolapsus of Rectum, &c.

AS A LOCAL APPLICATION

For Congestion of Mucous Membranes as in Conjunctivitis, Cervicitis, Pharyngitis, Gonorrhœa, &c.

HYPODERMICALLY

Or by the mouth, for Aneurisms, Dilatation of Heart, Acute and Chronic Dysentery, Hæmoptysis, Hæmaturia and other Hemorrhages; Chronic Arteritis, Incontinence, Spermatorrhœa, Varicocele, Varicose Veins, Diabetes Insipidus; with the Bromides for Spinal Meningitis, Acute Myelitis and Congestion of Meninges and Cord, and in obstetric practice, especially when Post-Partum Hemorrhage is threatened,

ERGOTOLE S.&D.'s

has been most successfully employed. When given hypodermically, more prompt action and the best results are usually obtained.

Ergotole is a new preparation of Ergot of Rye. It is specially made for hypodermic use by a new process; representing all the active principles of Ergot in a very concentrated form, and entirely freed from all inert and irritating constituents.

It causes neither pain nor abscess, and **keeps perfectly without precipitation for any length of time.** It has been extensively tried in hospital and private practice, hypodermically and administered by the mouth, proving uniformly efficacious, and it has been pronounced

THE MOST EFFICIENT PREPARATION OF ERGOT IN USE

One minim representing the full therapeutic strength of about 2½ grains of the best Spanish Ergot. Administered by the mouth, it will prove itself divested of all irritating and nauseating properties, which are so objectionable in the officinal fluid extract.

An eminent physician of Baltimore states that he has had uniform and satisfactory results in over fifty cases of various diseases from a supply of our Ergotole, which was prepared over two years ago, and kept in a cork-stopped bottle partially filled.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

Care of Medical and Surgical Reporter, Philadelphia.

P. O. BOX 843.

Requires No Cooking.

Liebig demonstrated that the best substitute for normal human milk was not the milk of any animal, but a combination of animal milk with the elements of those grains which are used in repairing waste, building tissues, and generating heat.

Mellin's Food

Dissolved in hot water and milk, according to the directions, is the genuine Liebig's Food, and promotes in infants a healthy growth, a full development, and a vigorous constitution. *It requires no cooking.*

DOLIBER-GOODALE CO., BOSTON, MASS.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. MCKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

DR. MASSEY'S
PRIVATE SANITARIUM
212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,
Physician in Charge.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of
ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

HOME FOR HABITUÉS.
OPIUM, CHLORAL, COCAINE.
DR. J. B. MATTISON,

Continues to receive at his residence, 314 State Street, Brooklyn, N. Y., a limited number of these habitués, to whom he devotes his *exclusive* professional attention. Patients Six. and Select. Attractive apartments, liberal cuisine, desirable privacy, cheerful society, and *personal* professional attention, based on several years' experience in the treatment of this disease. Details on application.

NEW POCKET RECORD FOR 1891 PREPARING.

PREVENTING CONSUMPTION.

That Consumption is a contagious disease may be disputed; but, that it is in a very great degree infectious must be admitted, as according to statistics gleaned by the most competent authorities "one-seventh of the people who die from tuberculosis acquire the disease from breathing the air tainted with contagion by a person already affected."

It follows, therefore, by way of prevention of the disease, the most practical results must be looked for in the prompt destruction or disinfection of the materials thrown off by the Consumptive. The sputa expectorations and nasal discharges are offensive, poisonous, and dangerous, and through them the dread disease is passed along.

The liberal use of a reliable inodorous and inexpensive disinfectant about the sick-room is always an aid toward recovery for the patient, and a blessing as well as a protection to the attendants and friends, and this is equally true in cases of Consumption and ailments tending that way.

The practical advice of an experienced and most successful physician in this relation we sum up as follows: "Give your patient every chance. Keep the room pleasant, the air sweet and pure. Always have a bottle of Platt's Chlorides handy in the room. Put a mixture of one part chlorides to six or eight of water in the vessels before using, and keep a solution of this strength constantly in the cuspidor, or spittoon. This popular disinfectant has no smell, so your patient will not be annoyed; neither is it dangerous to use, as it contains no mercury.

"Should the patient be confined to the bed relieve the atmosphere of the room by occasionally shaking a towel wet with a mixture of one part chlorides to ten of water, and then leave the moistened towel hanging to the gas-bracket or any convenient hook. It is astonishing how quickly and thoroughly the air is changed and sweetened by this simple process, and how gratefully the patient will appreciate it."

To use this disinfectant frequently and liberally costs but a little, as a quart bottle is supplied by the apothecary at 50 cents, and this quantity is sufficient to prepare two to three gallons of disinfecting liquid of ample strength for general household and sick-room purposes.

DISEASES IN WHICH

Oxygen and Nitrogen Monoxide

HAVE BEEN EMPLOYED.

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure. They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

For descriptive circulars, and term for gas outfits, address

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

LIQUOR SANTAL FLAV:

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

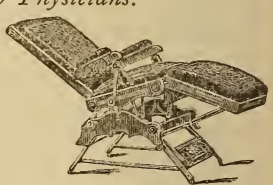
No. 1.

It is the most wonderful Chair in the world. You can sit in the Chair with your feet on the foot-rest and rock yourself, and it is impossible for a beholder to tell what makes the Chair rock. It is the finest invalid's Chair in the world.

As an **Invalid's Chair**, a person can recline the back by quarter-inches until he lies straight or horizontally, and without taking his weight from the back of the chair in the least, and CAN ROCK AS WELL LYING DOWN AS SITTING UP. Upholstered in Plush, Leather or Wilton Rugs. This Chair has over 200 changes of position, and sells for $25.00.

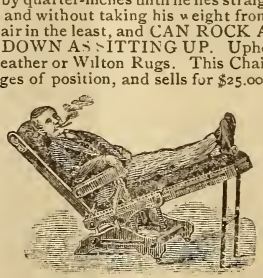


No. 2.

This Chair can be converted from a splendid Office Chair (see cuts Nos. 1 and 3) into one of the most complete Gynæcological Chairs in a half minnte, (see cuts 2, 4, and 5).

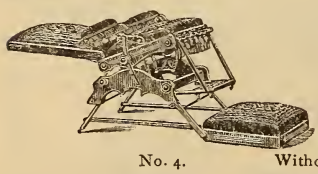
As a Gynæcological Chair it will take all the positions of the high-priced chairs costing two and three times what this one does.

The Rip Van Winkle Chair has over 200 changes of position. Every chair fully warranted.



No. 3.

This Chair is sold with or without the Gynæcological attachment, as desired. It is *unquestionably* the most complete and comfortable Reclining or Lounging Chair ever made. I make a special price to physicians, and also give them a handsome commission on all orders I receive through them for Chairs for their patients. No Chair in the world is so well adapted to ladies suffering from female weakness, and the commission I give on your orders will soon pay for your own Chair.



No. 4.

The Chair makes 5 pieces of Furniture.

I have attachments by which it can be converted into an Invalid's Rolling Chair in one minute. Parties can get these attachments from factory at any time. Send for full particulars, price-list, and illustrated catalogue showing the principal positions and changes. The Catalogue contains the "Legend of Rip Van Winkle."

Without the Gynæcological Attachment these Chairs

No. 5.

Make an Elegant Wedding or Holiday Present.

Manufactured by **P. C. LEWIS,** Box 154, Catskill, N. Y.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ.

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{50}$ gr.), Atropiæ Sulph. ($\frac{1}{100}$ gr.), Codeia ($\frac{1}{10}$ gr.), Antimony Tart. $\frac{1}{15}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis. fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{10}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen. lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice. MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

I. O. WOODRUFF & CO.,

MANUFACTURERS OF PHYSICIANS' SPECIALTIES,

88 Maiden Lane, **New York City.**

UNIVERSITY OF MARYLAND

SCHOOL OF MEDICINE.

Eighty-fourth Annual Announcement, 1890–91. The next regular session will begin October 1st, 1890. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY:

GEORGE W. MILTENBERGER, M. D.,
Emeritus Professor of Obstetrics, and Honorary President of the Faculty.
CHRISTOPHER JOHNSON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Emeritus Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology and Clinical Professor of Diseases of Nervous System.

LOUIS McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Obstetrics.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
JOHN NOLAND MACKENZIE, M. D.,
Clinical Professor of Diseases of the Throat and Nose.

Professor of Anatomy.

Demonstrator of Anatomy.

For catalogue and further information, address: **Dr. I. E. ATKINSON, Dean, 605 Cathedral Street.**

DENTAL DEPARTMENT.

Ninth Annual Announcement. Next regular session begins October 1st, 1890. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY:

FRED. J. S. GORGAS, M. D., D.D. S.,
Professor of Principles of Dental Science, Dental Surgery, and Dental Mechanism.
JAMES H. HARRIS, M. D., D.D. S.,
Professor of Operative and Clinical Dentistry.
I. EDMONSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.

Professor of Anatomy.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D.D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D.D. S.,
Demonstrator of Operative Dentistry.

Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For catalogue and other information, apply to **Dr. F. J. S. GORGAS, Dean, 845 Eutaw Street, Baltimore.**

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M. D., SECRETARY.

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.
JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN, M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.
SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.
THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address

W. H. DUNLAP, M. D., Registrar, SYRACUSE, N. Y.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D., Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D., Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof. of Ophthalmology
BARTON COOKE HIRST, M.D., Professor of Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS, M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

For Catalogue and announcement containing particulars apply to

CHEMISTS' CORPORATION,

Clinical Notes sent on Application. ST. LOUIS, MO.

FAIRCHILD'S
ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND
OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED
IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges.
Please mention this journal.

Wyeth's Beef Juice

A Liquid Preparation of the Choicest Beef, containing the Nutritious Albuminous Principles in an unaltered and soluble form.

Physicians have, for a long time, had their attention called to the fact that beef extracts, made by the LIEBIG process, are utterly devoid of the valuable and nutritious albuminous constituents of meat, as these are coagulated and filtered out in the process of manufacture. In consequence, the most advanced class of medical practitioners to-day, merely use the commercial extracts of meat as stimulants, and not for any nutritious properties they may possess. Realizing this fact, we have, after continued and exhaustive experiments, succeeded in preparing the article which we offer as WYETH'S BEEF JUICE, and for which we make the following claims:

FIRST.—That it contains all of the albuminous principles of beef in an active and soluble form. This may be proven by mixing a small portion of Beef Juice with an equal part of water in a test-tube or any convenient vessel, and gradually heating to the boiling point, when the albuminous principles will be coagulated.

SECOND.—That it contains the Hæmoglobin of the meat unaltered, as is evidenced by the bright arterial color of the preparation, and by the fact that it loses this color upon boiling, as the Hæmoglobin is precipitated with the albumen.

THIRD.—That it will be found upon trial to possess the nutritive properties of the choicest beef to a higher degree than any extract of meat yet offered to the profession.

Physicians will find WYETH'S BEEF JUICE of great value as a strengthening diet in cases of convalescence, consumption, nervous prostration, and similar diseases; also, in typhoid fever, debility, etc. Beef Tea prepared from it, contains more nourishment than any other liquid preparation of meat, and, when properly seasoned, is more grateful and appetizing to the patient. Professional men who are suffering from over-work, mental anxiety, etc., will find that one-half teaspoonful in about half a glass of iced water, taken at intervals during the day, and upon retiring, will relieve fatigue,—both of mind and body.

DIRECTIONS.—In cases of debility, nervous prostration, convalescence, etc., one-half to one teaspoonful in a half tumblerful of iced or luke-warm water.

CAUTION.—As the valuable albuminous elements are rendered insoluble by extreme heat, this preparation should only be mixed with iced or LUKE-WARM water, and never with water at the boiling point.

MANUFACTURED BY

JOHN WYETH & BROTHER,

PHILADELPHIA, PA.

Doctor:

How are those cases of Tuberculosis and Scrofula coming on?

By the way, did you ever think of the similarity in the lesions created by these two diseases—disintegation and breaking down of the tissue walls?

Now, what must be the obvious remedy? Not irritant and stimulant tonics, as iron, arsenic, etc. They only increase the force of pressure brought to bear against these same tissue walls, and cause them the sooner to give way, producing hemorrhages, extravasations, etc.

The true and unfailing remedy will be found in the genuine tissue builders, as prepared in McArthur's Compound Syrup of the Hypophosphites of Lime and Soda. Each atom finds its way unerringly to its place in the tissue walls, until they are built up so strong as to resist hemorrhages. extravasations, diapedesis and excessive perspiration. From this time on the improvement is rapid, and may be continued until the cure is permanent.

The individual may thus be built up until he is no more liable to a return of the disease than one who has never yet had it. The teachings of Salisbury and Churchill announce these truths, and the clinical experience of a few observant physicans confirms them.

The point of superiority in McArthur's Syrup is that the Hypophosphites are *chemically pure*, which is so very rare in such preparations.

One of the first effects produced by the use of our Chemically Pure Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

Their use is also indicated in all wasting discharges, Nerve Exhaustion, Brain Fatigue, Impotence, Spermatorrhea, Tabes Dorsalis and Mesenterica, Chronic Bronchitis and Cough, Diarrhea, Uterine Fibroids, and all diseases characterized by waste and faulty nutrition.

Physicians when prescribing will please write thus:

℞ Syr: Hypophos: Comp: McArthur. One Bottle.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

A valuable treatise on the "Curability of Consumption" sent free. A large bottle free if you will pay express charges.

McARTHUR HYPOPHOSPHITE CO.,
BOSTON, MASS.

DR. MASSEY'S
PRIVATE SANITARIUM
212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. WESTERN PENNSYLVANIA MEDICAL COLLEGE
CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. MCKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

THE JEFFERSON MEDICAL COLLEGE
OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

W. H. Schieffelin & Co.,

170 & 171 William Street,

NEW YORK.

THE GENUINE IMPORTED NATURAL

CARLSBAD SPRUDEL SALT

AND

CARLSBAD MINERAL WATERS

Are Highly Recommended for

1. **Diseases of the Stomach**—Chronic catarrh of the stomach, cardialgia, ulcer of the stomach.

2. **Diseases of the Intestines**—Chronic constipation, chronic diarrhœa.

3. **Diseases of the Spleen**—Chronic hyperæmia of the spleen, tumors of the spleen, arising after intermittent fever, typhus, etc., and the effects of a residence in marshy districts or hot climates.

The genuine imported Carlsbad Sprudel Salt is put up in round bottles like the above cut. Each bottle comes in a paper cartoon with the seal of the City of Carlsbad, and signature of "EISNER & MENDELSON CO.," sole Agents, on the neck of every bottle and on the outside cartoon.

4. **Liver Diseases**—Hyperæmia of the liver, resulting from agglomeration of the blood in the veins, if it does not originate in organic defects; fat liver, jaundice, produced by catarrh of the passages of the bile, or by liver complaint in consequence of violent emotions; gallstones.

5. **Diseases of the Kidneys and Bladder**—Gravel, nephritic stones, sand, stone in the bladder—chronic catarrh of the kidneys and bladder—albuminuria.

6. **Diseases of the Prostate**—Chronic hyperæmia of the prostate, resulting from interrupted circulation in the bowels, constipation, hemorrhoids, etc.

7. **Chronic Catarrh of the Womb**, produced by menstrual disturbances, hemorrhoids, and the different consequences of interrupted circulation in the bowels.

8. **Gout**, especially in the early stages.

9. **Diabetes Mellitus**—By the use of the Carlsbad Thermal Waters, not only the clinical phenomena of this disease (the tormenting thirst, violent hunger, dryness of the skin) disappear in a very short time, but it also considerably diminishes the secretion of sugar in the urine, and frequently causes it to disappear altogether.

Diseases of the stomach are best treated with the Carlsbad Water, whereas the Carlsbad Sprudel Salt (powder form) is to be preferred in diseases of the viscera, such as intestinal canal, spleen, kidneys, inadiposis, etc.

PAMPHLETS MAILED ON APPLICATION.

A BRIEF SUMMARY

OF

HYPODERMIC MEDICATION.

will be sent, with our compliments, when application is made and the name of this journal is mentioned. It quotes Profs. Dujardin-Beaumetz, Bartholow, Anstie, Erb, Echeverria, Mays and others. It contains important and the most recent suggestions on the technique of hypodermic medication, and gives the composition, properties, doses, etc., of our

SOLUBLE HYPODERMIC TABLETS, S. & D.'s.

which are quickly and perfectly soluble in cold or warm water, combining accuracy of dose with perfect preservation of the active ingredient, and the base of which is perfectly harmless and unobjectionable. They will cause no abscesses and will not become insoluble by age. They may also be administered by the mouth, and are

ALWAYS READY FOR INSTANT USE.

We respectfully solicit a trial of these tablets, and will mail samples of them free to readers of this journal.

That the several objections to hypodermic medication might be obviated, we have had manufactured expressly for us a line of

HYPODERMIC SYRINGES, S. & D.'s.,

which have all the latest improvements, are most accurately made of the best materials and so constructed as to allow the

MAKING OF A SOLUTION IN THE SYRINGE.

They are sent to any address at the following prices:

Syringe, in leathered-covered case, two tubes of tablets . . . . . net, $2.50
" " metal case, latest improved style, two tubes of tablets . . . . . " 2.50
" " " " four tubes of tablets . . . . . " 3.50
" " flexible leather case, as shown by cut 3.50

NEURALGIAS

PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con- "gestive neuralgias*, and *painful and inflammatory Rheumatismal "affections*."

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting "of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing, etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address, DRS. S. S. & S. E. STRONG.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

Books for our Subscribers.

WHAT IS THOUGHT OF THEM.

HEATH'S DICTIONARY OF PRACTICAL SURGERY.

C. B. Porter, M. D., Boston, Mass., says; "A most excellent book for the library of the surgeon, and especially for the country practitioner; as a book of reference it is so concise and at the same time so complete."

N. Senn, M. D., College of Physicians and Surgeons, Milwaukee, says; "As a means of ready reference for the student and busy practitioner this book stands unexcelled."

Prof. E. n. Gregory, St. Louis Medical College, St. Louis, says: "I have examined the book, and find it a most valuable addition to my library. I am sure it will meet the favor of the surgical profession."

LEIDY'S HUMAN ANATOMY.

The Lancet-Clinic, Cincinnati, O., says: "Professor Leidy again presents to medical practitioners and students a treatise on human anatomy that at once commands the attention and admiration of all who are at all familiar with the subject. Most of the plates are original, and in common with the text are very beautiful to behold. The work is a complete illustration of the method of teaching anatomy adopted by a leading scientist, and one of America's best known professors of anatomy. This is one of the books that should be in the library of every practitioner of medicine and surgery."

The Medical Advance, Ann Arbor, Mich., says: "The student can master and retain a practical knowledge of anatomy in a shorter time and with less hard work from this text-book than from any other work extant, and it has been our privilege to teach anatomy for several years."

BYFORD'S DISEASES OF WOMEN.

The Boston Medical and Surgical Journal says: "It is a satisfaction to observe the discussion of certain topics which are often neglected by writers, notably of the sympathetic symptoms of organs apparently disconnected with the uterus, for which he will receive the thanks of the younger members of the profession. Another topic very widely treated is that of Constipation in its relation to uterine diseases. All the other topics which should have a place in a work of this kind have been fully and properly treated."

The Cincinnati Lancet-Clinic says: "The book is eminently practical and instructive. Its suggestions for treatment are well up with the times, mostly judicious, conservative, and valuable, and the whole amply repays for thorough perusal."

The St. Louis Courier of Medicine says: "The work of a representative Western practitioner and professor, and is a thoroughly practical work."

The Virginia Medical Monthly says: "We take pleasure in recommending it to every student and physician desirous of obtaining a standard work on Gynæcology."

The Chicago Medical Journal and Examiner says: "The chapter on puberty should be carefully studied by every physician, teacher, and mother in the land. . . . Its style is clear, but concise, and always practical, and shows the author to be, as we all know, an experienced teacher. The work as a whole is most valuable, both to the student and practitioner."

Gaillard's Medical Journal says: "It is replete with good judgment, broad and practical views. . . . The illustrations are excellent."

FOWLER'S DICTIONARY OF PRACTICAL MEDICINE.

The Medical News says: "For those who do not wish to purchase the much larger book of Quain, or who wish comparatively recent information concerning medical subjects in a somewhat narrow space, the book will certainly prove of value, and we heartily recommend it as one which will give a full return for the money invested in the purchase."

The London Lancet says: "What the writers know they tell simply and plainly, and generally manage to put it in a short compass, and, what is more, the treatment that is recommended is clearly and sufficientiy set forth. . . . We can heartily congratulate the editor and his colleagues on having admirably fulfilled their purpose, viz., to produce a first-rate dictionary of medicine, at once scientific and practical, which well deserve the success we have no doubt it will meet with."

JACOBSON'S OPERATIONS OF SURGERY.

The Medical and Surgical Reporter says: "This handsome book is one of the most admirable works on operative surgery which we have seen for a long time. The author has brought to its preparation a large observation and experience, and a very thorough acquaintance with the methods of other surgeons. His book is comprehensive and his directions are clear and reliable. It is gratifying to an American reader to find that full justice is done to the work of American surgeons by Mr. Jacobson, and that his book bears no marks of the distance which stretches between his land and ours. This is as it should be, and is no less an element in the excellence of the technical worth of his book than it is an evidence of the cosmopolitan character of good scientific work."

CAZEAUX & TARNIER'S MIDWIFERY. With Appendix by MUNDÉ.

The Memphis Medical Monthly says: "Cazeaux's Obstetrics was authority during our student life, and has been generally recognized as authority from the publication of the first edition to the present. We cannot do more than to fully endorse the following from the pen of T. Gallard Thomas, M. D.; 'I have examined the last edition of Cazeaux & Tarnier's Theory and Practice of Obstetrics, and pronounce it practical, and just what is needed by every practitioner. I highly recommend the work. This work should be prominent in every library.'"

Dr. Wm. L. Lusk says: "Cazeaux's Midwifery will always remain an inexhaustible mine of information, and I rejoice to see it once more accessible to the profession in a new and attractive dress."

Dr. Wm. Goodell says: "I deem Cazeaux & Tarnier's Obstetrics the best yet published."

The Denver Medical Times says; "It is needless to say anything in praise of this work. Cazeaux's Obstetrics is a classical work, and Tarnier is one of the best known French writers on Obstetrics. The whole has been brought up to date by the appendix of Prof. Mundé, and altogether it makes a very complete and practical treatise on the subject, unsurpassed if not unequalled by any work with which we are acquainted. Especially valuable are the signs of delivery in the dead body and of live and still-births. The chapter on antisepsis and on puerperal septicemia are also worthy of mention."

THOMAS'S MEDICAL DICTIONARY.

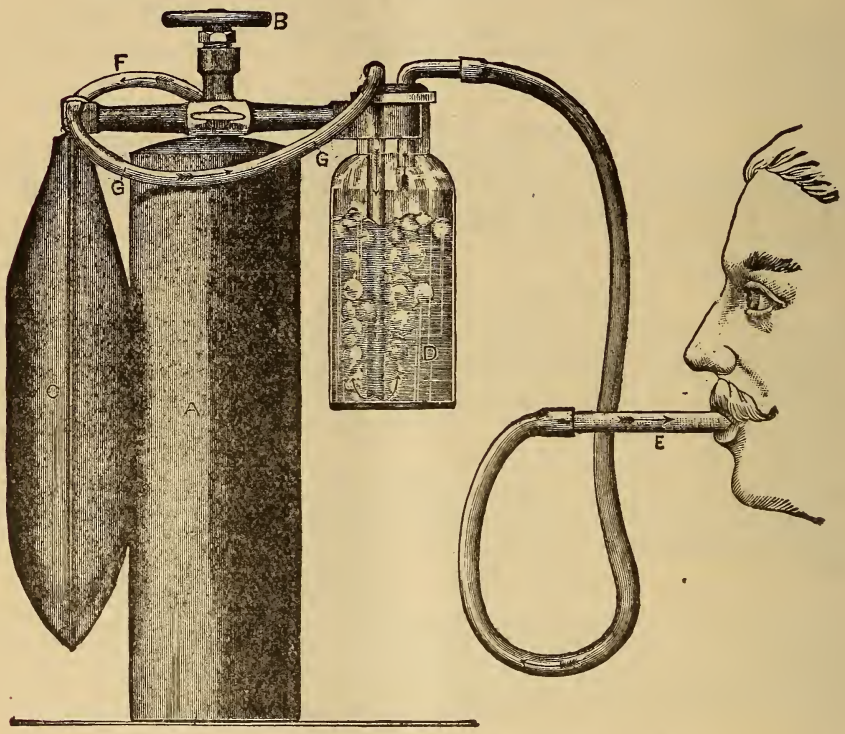
Prof. A. F. Patton, College of Physicians and Surgeons, Boston, Mass., says: "It is just the book for a medical or any other student, and it should be in the office of every physician. This dictionary supplies a place that has never been filled. I have looked it through and find all the new words that I have sought."

The St. Joseph Medical Herald says: "No better testimonial to the value of the work can be given than the following from Dr. J. Gibbon Hunt, the distinguished microscopist: 'To me the work is invaluable. I am astonished at its fullness of all recent words which the modern advance of medical science has introduced. Of course, I cannot conceive the learning and great labor which could edit such a complete, thorough, and admirable volume.' We can add nothing further save that the book should be in the hands of every physician and every student in the land."

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

FRENCH'S COMPRESSED PILLS OR TABLETS.

ARE MADE ONLY FROM THE PUREST MATERIALS.

Smooth and elegant in appearance—Uniform in size—Regular in weight—Prompt and reliable in action—Readily soluble—Easily swallowed.

COMPRESSED ANTISEPTIC TABLETS.

Each Tablet contains:

Hydrarg. Bichlor. . . . . 7.3 grains.
Ammon. Chlor. . . . . 7.7 grains.

One Tablet dissolved in one pint of water will make a 1 to 1,000 solution, containing one part of Corrosive Sublimate in 1,000 parts of water.

IN SCREW-CAP BOTTLES CONTAINING 25 PER BOTTLE.
IN SCREW-CAP BOTTLES CONTAINING 100 PER BOTTLE.

COMPRESSED SULPHUR and CREAM TARTAR TABLETS

Each Tablet contains 5 grains of Washed Sulphur (Sulphur Lotum U. S. P.) and 15 grains of medicinally pure Cream Tartar.

IN SCREW-CAP BOTTLES, EACH CONTAINING 35 TABLETS.

COMPRESSED ANTISEPTIC PASTILLES.

DR. CARL SEILER'S FORMULÆ.

For making Antiseptic Sprays, Nasal Wash, Mouth Wash, etc. One Tablet dissolved in four tablespoonfuls of warm water makes a solution which can be used as a spray or wash.

PUT UP IN SCREW-CAPPED BOTTLES, CONTAINING 50 PASTILLES EACH.

Our laboratory is in charge of Professor F. G. RYAN, of the Philadelphia College of Pharmacy, who has able assistants. Send for our new price-list with formulæ for Compressed Pills, Lozenges, Hypodermic Tablets, Tablet Triturates, etc.

FRENCH, RICHARDS & CO., PHILADELPHIA.

To PHYSICIANS.

THE STANDARD COCOA OF THE WORLD, A SUBSTITUTE FOR TEA AND COFFEE.

VAN HOUTEN'S "Best and Goes Farthest."

Physicians will do well in recommending, as their European colleagues do, VAN HOUTEN'S COCOA for daily family use. Now that the profession is deprecating the habitual use of alcoholic liquors, and as even tea and coffee are found too exciting for many temperaments—to say nothing of the growing number of cases of nervous disorder in this age of hot haste and feverish anxiety—the question of what beverage may be recommended, as at once refreshing and innocuous, is assuming the highest importance.

VAN HOUTEN'S Most Appetizing. Easily Digested.

Cocoa has long been known as a useful article of diet, and its claims are steadily winning recognition. Unlike tea or coffee, it is not only a stimulant but a nourisher; and it has the great advantage of leaving none of their narcotic effects on the system. For this reason it is adapted to general use. The strong may take it with pleasure, and the weak with impunity.

VAN HOUTEN'S The Original—Most Soluble.

"Pure soluble cocoa" is an invention of Mr. C. J. Van Houten, who patented this invention in Holland. Thus all other "pure soluble cocoas" are imitations. The process of manufacturing Van Houten's cocoa is still, to-day, a secret of C. J. Van Houten & Zoon. Chemists and medical men of the highest standing say, universally, that their observation shows that the Van Houtens do exactly what science would suggest for the conversion of raw cocoa into a satisfactory article of food. They simply remove some of the originally contained fat, which is apt to disagree with the system, and in some ingenious manner, increase the solubility of flesh-forming constituents.

VAN HOUTEN'S "Once Tried, Always Used."

To remove excess of fat is always desirable. Some manufacturers do this by largely diluting the ground cocoa with starch. A cupful of thick beverage may thus be made, which no doubt contains a diminished amount of fat, but of course also contains a diminished amount of every other constituent of the cocoa. For persons who desire a thick, starch-like beverage, such a mixture, miscalled "soluble" cocoa, may be unobjectionable, though the cocoa in it is less easy of digestion than Van Houten's preparation. A far better method, however, is to extract, as the Van Houtens do, one part of the fat from four of cocoa, and, as a consequence, render each of the valuable constituents remaining, one-third more effective than before. Instead of being weakened by starch, Van Houten's cocoa is thus made one-third stronger in every one of its valuable properties.

VAN HOUTEN'S "Largest Sale in the World."

Mellin's Food

FOR INFANTS AND INVALIDS.

A SOLUBLE DRY EXTRACT, prepared from Malted Barley and Wheat, consisting of Dextrin, Maltose, Albuminates, and Salts.

The SUGAR in MELLIN'S FOOD is MALTOSE. MALTOSE is the PROPER SUGAR for use in connection with cow's milk.

The sugar formed by the action of the Ptyalin of the Saliva and the Amylopsin of the Pancreas upon starch is MALTOSE. In the digestive tract MALTOSE is absorbed UNCHANGED.

—*Landois and Sterling.*

MALTOSE is a saccharose, not a glucose, and is a form of sugar which does not ferment.

—*Materia Medica and Therapeutics, Dr. Mitchell Bruce.*

"I have never seen any signs of fermentation which I could attribute to the influence of MALTOSE."

—*Eustace Smith, M.D., F.R.C.S.*

MELLIN'S FOOD, prepared according to the directions, is a true LIEBIG'S FOOD and the BEST SUBSTITUTE for Mother's Milk yet produced.

IT REQUIRES NO COOKING.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—
BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

FRAUD.

Unscrupulous parties are selling an inferior Wine, calling it Royal Tokay, thus profiting by the numberless Medical Editorials written about our genuine product. The Wine cannot be used as a substitute for ours, and many physicians have unjustly blamed us for damage done, imagining they were securing our Wine, which they had already tested with complete satisfaction. Your patients will not secure the Wine you prescribe unless you specify CALVICO TOKAY, by which name it will hereafter be known.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One Teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Where Women have miscarried during previous pregnancies, or in any case where miscarriage is feared, ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used,

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

The above preparations are prepared exclusively for Physicians' Prescriptions, and a sample of each or all of them will be sent to any Physician who wishes to test them, if he will pay the Express Charges.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ.

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{30}$ gr.), Atropiæ Sulph. ($\frac{1}{3000}$ gr.), Codeia ($\frac{1}{60}$ gr.), Antimony Tart. $\frac{1}{25}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis, fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{60}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen, lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice, MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

CHEMIST,

WALNUT & THIRTEENTH STREETS,

PHILADELPHIA.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.--

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M. D., SECRETARY.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

SESSIONS 1890-91.

The Autumn and Winter Sessions of the Post-Graduate Medical School opened on September 15. The Hospital is fully utilized for clinical purposes. There are ninety beds, including thirty for babies in the adjacent building. No Post-Graduate Medical School in this country can offer such opportunities for seeing important surgical and gynæcological operations under its own roof as does this institution. Besides, regular clinics, medical and surgical, are held by professors and instructors in those general and special hospitals with which they are connected, which comprises nearly all the great hospitals of the city. The dispensary of the school and other large dispensaries furnish ample means of instruction in every class of walking cases.

Instruction is given in every branch of medicine and surgery. The laboratory is large and well equipped. Surgical anatomy and operative surgery are thoroughly taught. The instruction is personal, the practitioner being brought in direct contact with the patient. No other courses in any department will be required if those to be had in the Post-Graduate School are taken. The faculty were the first in the United States to organize private courses for practitioners of medicine, and they pledge themselves to leave nothing undone to make graduates in medicine profit by the unrivalled clinical advantages of the City of New York.

For catalogue and schedule, address

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE.

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, "**With Iron, No. 1**;" while the same preparation, **Without Iron,** is designated on the label as "**No. 2.**"

In prescribing this preparation, physicians should be particular to mention "*COLDEN'S*," viz., "*Ext. Carnis Fl. Comp. (Colden.)*" A Sample of **COLDEN'S BEEF TONIC** will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

PLATT'S CHLORIDES

A liquid disinfectant, powerful, prompt and cheap.
A deodorizer, without odor or objectionable feature.
A germicide, at once active and thoroughly reliable.
An antiseptic of tried and proven efficiency.

Supplied in Quart Bottles only, by Druggists everywhere. Price, 50cts.

To any physician, who for any reason may be still unfamiliar with the practical value of Platt's Chlorides, a sample will be sent, by express, prepaid, on request. Address, giving both Post and Express offices,

HENRY B. PLATT,

36 PLATT STREET, NEW YORK.

FELLOWS'
HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

77 PINE STREET, NEW YORK.

CH. MARCHAND'S

Peroxide of Hydrogen,

MEDICINAL (ABSOLUTELY HARMLESS)

H_2O_2

is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a nostrum.

Experiments of Prof. Pasteur, Dr. Koch, and many other scientific authorities, prove beyond doubt that Germs, Bacteria, or Microbes cause and develop: **NOSE, THROAT, AND LUNG DISEASES—Diphtheria, Croup, Sore Throat, Catarrh of the Nose, Hay Fever, Bronchitis, Laryngitis, Pharyngitis, Whooping Cough, Consumption and other Chronic Affections, specific or not.**

GERMS, BACTERIA, OR MICROBES are instantaneously annihilated when brought into contact with **Ch. Marchand's Peroxide of Hydrogen.** This wonderful bactericide acts both chemically and mechanically upon all excretions and secretions, so as to thoroughly change their character and reactions instantly. By destroying the microbian element this remedy removes the cause of the disease.

CAUTION.—I would earnestly impress upon the profession the very great importance of prescribing only my **Peroxide of Hydrogen (Medicinal)**, from which all hurtful chemicals have been eliminated.

By specifying in your prescriptions "**Ch. Marchand's Peroxide of Hydrogen (Medicinal)**," which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon.

Prepared only by

Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of **Ch. Marchand's Peroxide of Hydrogen (Medicinal)**, with opinions of the profession, will be mailed to physicians free of charge on application.

¼ lb. bottle, retail, 35 cents; ½ lb. bottle, retail, 50 cents; 1 lb. bottle, retail, 75 cents.

SOLD BY LEADING DRUGGISTS.

Laboratory, 10 West Fourth Street, New York.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

NEW YORK

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

Price, $2.00 per bottle.

Send for copy of our Hand-Book of Pharmacy and Therapeutics. Useful for reference and contains much valuable information.

PIL. APHRODISIACA

(LILLY.)

Phosphorus and **Nux Vomica,** as is well known to the profession, act as powerful tonics to the nervous system, especially the spinal cord, and can be relied upon as possessing real aphrodisiac power The **Damiana** used is the genuine **Turnera Aphrodisiaca.** By our process for the manufacture of **Phosphorus Pills,** a thorough subdivision of phosphorus in the mass is obtained, and, with a coating perfectly **protecting** it from **oxidation,** there is nothing to be desired. It is necessary that the administration of this pill be continued from **three to four weeks,** or until the **system is thoroughly under the influence of the remedy.** It is indicated in **mental overwork, sexual debility, impotency.** It is decidedly beneficial in cases of **nocturnal emissions,** the result of excesses, **mental apathy,** or indifference, and in an **enfeebled condition of the general system,** with **weakness or dull pain in the lumbo sacral region.** In diseases of the **reproductive organs** of the female, and especially of the uterus, it is one of our most valuable agents, acting as a **uterine tonic,** and gradually removing abnormal conditions, while at the same time, it imparts tone and vigor; hence, it is of value in **Leucorrhea, Amenorrhea, Dysmenorrhea,** and to remove the tendency to repeated miscarriages.

Obtainonly in original package. Oval pink pills.

One Hundred Mailed on Receipt of $1.00.

IN GYNÆCOLOGICAL PRACTICE

For Sub-Involution, Congestive Dysmenorrhœa, Chronic Metritis, &c.

AS AN INJECTION

For Hemorrhoids, Relaxation of Sphincter, Prolapsus of Rectum, &c.

AS A LOCAL APPLICATION

For Congestion of Mucous Membranes as in Conjunctivitis, Cervicitis, Pharyngitis, Gonorrhœa, &c.

HYPODERMICALLY

Or by the mouth, for Aneurisms, Dilatation of Heart, Acute and Chronic Dysentery, Hæmoptysis, Hæmaturia and other Hemorrhages; Chronic Arteritis, Incontinence, Spermatorrhœa, Varicocele, Varicose Veins, Diabetes Insipidus; with the Bromides for Spinal Meningitis, Acute Myelitis and Congestion of Meninges and Cord, and in obstetric practice, especially when Post-Partum Hemorrhage is threatened,

ERGOTOLE S.&D.'s

has been most successfully employed. When given hypodermically, more prompt action and the best results are usually obtained.

Ergotole is a new preparation of Ergot of Rye. It is specially made for hypodermic use by a new process; representing all the active principles of Ergot in a very concentrated form, and entirely freed from all inert and irritating constituents.

It causes neither pain nor abscess, and **keeps perfectly without precipitation for any length of time.** It has been extensively tried in hospital and private practice, hypodermically and administered by the mouth, proving uniformly efficacious, and it has been pronounced

THE MOST EFFICIENT PREPARATION OF ERGOT IN USE

One minim representing the full therapeutic strength of about 2½ grains of the best Spanish Ergot. Administered by the mouth, it will prove itself divested of all irritating and nauseating properties, which are so objectionable in the officinal fluid extract.

An eminent physician of Baltimore states that he has had uniform and satisfactory results in over fifty cases of various diseases from a supply of our Ergotole, which was prepared over two years ago, and kept in a cork-stopped bottle partially filled.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

Sole Agents for the United States for the above Preparations.

LITTELL'S LIVING AGE.

IN 1891 **THE LIVING AGE** enters upon its forty-eighth year. It has met with constant commendation and success.

A **WEEKLY MAGAZINE,** it gives fifty-two numbers of sixty-four pages each, or more than **Three and a Quarter Thousand** double-column octavo pages of reading-matter yearly. It presents in an inexpensive form, considering its great amount of matter, with freshness, owing to its weekly issue, and with a completeness nowhere else attempted,

The best Essays, Reviews, Criticisms, Tales, Sketches of Travel and Discovery, Poetry, Scientific, Biographical, Historical, and Political Information, from the entire body of Foreign Periodical Literature, and from the pens of

The Foremost Living Writers.

The ablest and most cultivated intellects, in every department of Literature, Science, Politics, and Art, find expression in the Periodical Literature of Europe, and especially of Great Britain.

The Living Age, forming four large volumes a year, furnishes from the great and generally inaccessible mass of this literature the only compilation that, while within the reach of all, is satisfactory in the COMPLETENESS with which it embraces whatever is of immediate interest, or of solid, permanent value.

It is therefore indispensable to every one who wishes to keep pace with the events or intellectual progress of the time, or to cultivate in himself or his family general intelligence and literary taste.

OPINIONS.

"It is nearly half a century since the first volume of this sterling publication came from the press, and to-day it stands the most perfect publication of its kind in the world. . There is but one LIVING AGE, though many have essayed imitations. While their intent has no doubt been worthy, they have lacked that rare discriminating judgment, that fineness of acumen, and that keen appreciation of what constitutes true excellence, which make LITTELL'S LIVING AGE the incomparable publication that it is. No one who has once become acquainted with its educating and uplifting qualities will ever be induced to dispense with its visitations."— *Christian at Work, New York.*

"It is indispensable to intelligent people in this busy day."— *New-York Evangelist.*

"Many other and deservedly popular favorites have entered the periodical field, but none of them have diminished the importance of THE LIVING AGE. . With its aid it is possible for the busy reader to know something of universal literature. Indeed it may well be doubted whether there exists any more essential aid to cultivation of the mind among English-speaking people; and its importance increases with the ever-growing rush and hurry of modern times. . No one knows its value so well as the busy man who without it might well despair of keeping in any way posted as to the trend of modern thought in this day of immense activity."—*Episcopal Recorder, Philadelphia.*

"This periodical fills a place that no other occupies. . Biography, fiction, science, criticism, history, poetry, travels, whatever men are interested in, all are found here."— *The Watchman, Boston.*

"It contains nearly all the good literature of the time."— *The Churchman, New York.*

"Like wine, it only improves with age. . The same amount of valuable reading cannot be found elsewhere for so small a sum."—*Christian Intelligencer, New York.*

"It would be cheap at almost any price."— *California Christian Advocate, San Francisco.*

"It stands unrivalled."— *The Presbyterian, Phila.*

"No man will be behind the literature of the times who reads THE LIVING AGE."—*Zion's Herald, Boston.*

"It is incomparably the finest literary production of modern times. In its own peculiar sphere it has no peer. It embraces within its scope the matured thoughts, on all subjects, of the greatest authors and ripest scholars in Europe."— *Herald and Presbyter, Cincinnati.*

"There may be some things better than THE LIVING AGE, but if so we have not seen them. . For the man who tries to be truly conversant with the very best literature of this and other countries, it is indispensable."— *Central Baptist, St. Louis.*

"It retains the characteristics of breadth, catholicity and good taste which have always marked its editing. The fields of fiction, biography, travel, science, poetry, criticism, and social and religious discussion all come within its domain and all are well represented. . The readers miss very little that is important in the periodical domain."—*Boston Journal.*

"It may be truthfully and cordially said that it never offers a dry or valueless page."—*New-York Tribune.*

"No better outlay of money can be made than in subscribing for THE LIVING AGE."—*Hartford Courant.*

"One who keeps up with THE LIVING AGE keeps up with the thought of the day."— *Albany Times.*

"To read it is itself an education in the course of modern thought and literature."—*Buffalo Commercial Advertiser.*

"Coming weekly, it has a great advantage over the monthly magazines and reviews."— *San Francisco Chronicle.*

"It is one of the invaluables to those whose time is limited."— *Houston (Tex.) Post.*

"In it the reader finds all that is worth knowing in the realm of current literature."— *Canada Presbyterian, Toronto.*

"It enables its readers to keep fully abreast of the best thought and literature of civilization."—*Christian Advocate, Pittsburgh.*

"He who subscribes for a few years to it gathers a choice library, even though he may have no other books."— *New-York Observer.*

PUBLISHED WEEKLY at $8.00 a year, *free of postage.*

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

PREVENTING CONSUMPTION.

That Consumption is a contagious disease may be disputed; but, that it is in a very great degree infectious must be admitted, as according to statistics gleaned by the most competent authorities "one-seventh of the people who die from tuberculosis acquire the disease from breathing the air tainted with contagion by a person already affected."

It follows, therefore, by way of prevention of the disease, the most practical results must be looked for in the prompt destruction or disinfection of the materials thrown off by the Consumptive. The sputa expectorations and nasal discharges are offensive, poisonous, and dangerous, and through them the dread disease is passed along.

The liberal use of a reliable inodorous and inexpensive disinfectant about the sick-room is always an aid toward recovery for the patient, and a blessing as well as a protection to the attendants and friends, and this is equally true in cases of Consumption and ailments tending that way.

The practical advice of an experienced and most successful physician in this relation we sum up as follows: "Give your patient every chance. Keep the room pleasant, the air sweet and pure. Always have a bottle of Platt's Chlorides handy in the room. Put a mixture of one part chlorides to six or eight of water in the vessels before using, and keep a solution of this strength constantly in the cuspidor, or spittoon. This popular disinfectant has no smell, so your patient will not be annoyed; neither is it dangerous to use, as it contains no mercury.

"Should the patient be confined to the bed relieve the atmosphere of the room by occasionally shaking a towel wet with a mixture of one part chlorides to ten of water, and then leave the moistened towel hanging to the gas-bracket or any convenient hook. It is astonishing how quickly and thoroughly the air is changed and sweetened by this simple process, and how gratefully the patient will appreciate it."

To use this disinfectant frequently and liberally costs but a little, as a quart bottle is supplied by the apothecary at 50 cents, and this quantity is sufficient to prepare two to three gallons of disinfecting liquid of ample strength for general household and sick-room purposes.

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure. They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

For descriptive circulars, and term for gas outfits, address

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S

SOLUBLE HYPODERMIC TABLETS.

Are prepared in the same manner as our Tablet Triturates. Are not compressed. Are, therefore, more soluble. Are carefully prepared, and each Tablet contains the exact quantity of medicament indicated on the label. A reliable solution of any required strength can be made, when desired, by dissolving in a definite quantity of water. Will keep indefinitely in any climate. Very friable, and, therefore, put up in tubes, each containing 25 tablets. Four tubes in a box.

FRENCH'S TABLET TRITURATES.

RECOMMENDED FOR PORTABILITY AND CONVENIENCE.

Made from the purest materials and in the most careful manner. The material is thoroughly subdivided, and each tablet contains exactly the amount of medicament indicated on the label. Made firm enough to retain their form, but sufficiently friable to yield to the slightest pressure. Can be administered in powder form, if desired.

Put up in bottles of 100 and 500.

Our laboratory is in charge of PROFESSOR F. G. RYAN, of the Philadelphia College of Pharmacy, who has able assistants.

Send for our new price-list with formulæ for Compressed Pills, Lozenges, Hypodermic Tablets, Tablet Triturates, etc.

FRENCH, RICHARDS & CO., PHILADELPHIA.

A MENSTRUUM.

HORSFORD'S ACID PHOSPHATE.

THIS preparation has been found especially serviceable as a menstruum for the administration of such alkaloids as morphine, quinine, and other organic bases which are usually exhibited in acid combination.

The admixture with pepsin has been introduced with advantage when indicated.

The Acid Phosphate does not disarrange the stomach, but, on the contrary, promotes in a marked degree the process of digestion.

Dr. R. S. MILES, Glencoe, Minn., says: "I use it in a great many cases as a menstruum for quinine, when an acid is necessary."

Send for descriptive circular. Physicians who wish to test it will be furnished a bottle on application, without expense, except express charges.

Prepared under the direction of Prof. E. N. HORSFORD, by the

Rumford Chemical Works, Providence, R. I.

BEWARE OF SUBSTITUTES AND IMITATIONS.

CAUTION:—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ.

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{10}$ gr.), Atropiæ Sulph. ($\frac{1}{500}$ gr.), Codeia ($\frac{1}{10}$ gr.), Antimony Tart. ($\frac{1}{25}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis, fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{50}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen, lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice, MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

I. O. WOODRUFF & CO.,

MANUFACTURERS OF PHYSICIANS' SPECIALTIES,

88 Maiden Lane, **New York City.**

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST. as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

GLYCOZONE

Is used as an internal remedy, or for local dressings. It is absolutely harmless; and Ozone is its healing agent.

GLYCOZONE, by its wonderful antiseptic and healing properties, not only prevents the fermentation of the food in the stomach, but it quickly cures the inflammation or irritation of the mucous membrane. It is a specific for disorders of the stomach: **Dyspepsia, Catarrh of the Stomach, or Gastritis, Ulcer of the Stomach, Heart-Burn.** Sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing CHAS. MARCHAND'S label and signature.

Prepared only by Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One Teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Where Women have miscarried during previous pregnancies, or in any case where miscarriage is feared, ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used,

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

The above preparations are prepared exclusively for Physicians' Prescriptions, and a sample of each or all of them will be sent to any Physician who wishes to test them, if he will pay the Express Charges.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

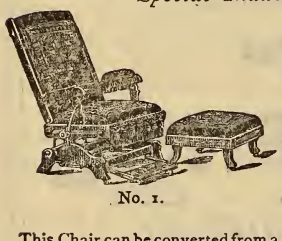
THE RIP VAN WINKLE RECLINING ROCKER.

OFFICE AND GYNÆCOLOGICAL CHAIR COMBINED.

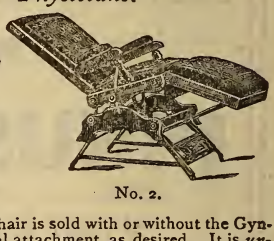
Special Inducements and Extra Discount Given to Physicians.



No. 1.

It is the most wonderful Chair in the world. You can sit in the Chair with your feet on the foot-rest and rock yourself, and it is impossible for a beholder to tell what makes the Chair rock. It is the finest Invalid's Chair in the world.

As an **Invalid's Chair**, a person can recline the back by quarter-inches until he lies straight or horizontally, and without taking his weight from the back of the chair in the least, and CAN ROCK AS WELL LYING DOWN AS SITTING UP. Upholstered in Plush, Leather or Wilton Rugs. This Chair has over 200 changes of position, and sells for $25.00.

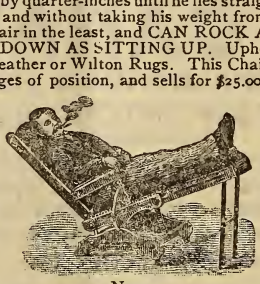


No. 2.

This Chair can be converted from a splendid Office Chair (see cuts Nos. 1 and 3) into one of the most complete Gynæcological Chairs in a half minnte, (see cuts 2, 4, and 5).

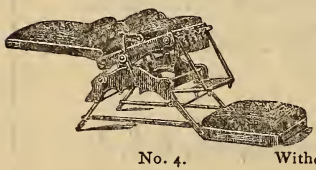
As a Gynæcological Chair it will take all the positions of the high-priced chairs costing two and three times what this one does.

The Rip Van Winkle Chair has over 200 changes of position. Every chair fully warranted.



No. 3.

This Chair is sold with or without the Gynæcological attachment, as desired. It is *unquestionably* the most complete and comfortable Reclining or Lounging Chair ever made. I make a special price to physicians, and also give them a handsome commission on all orders I receive through them for Chairs for their patients. No Chair in the world is so well adapted to ladies suffering from female weakness, and the commission I give on your orders will soon pay for your own Chair.

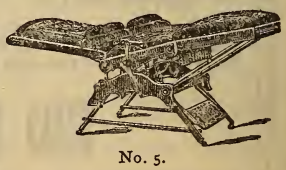


No. 4.

The Chair makes 5 pieces of Furniture.

I have attachments by which it can be converted into an Invalid's Rolling Chair in one minute. Parties can get these attachments from factory at any time. Send for full particulars, price-list, and illustrated catalogue showing the principal positions and changes. The Catalogue contains the "Legend of Rip Van Winkle."

Without the Gynæcological Attachment these Chairs



No. 5.

Make an Elegant Wedding or Holiday Present.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. MCKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

A HANDSOME BINDER FOR THE REPORTER

WILL BE SENT FOR 50 CENTS.

SEND MONEY WITH ORDER.

Address,
MEDICAL AND SURGICAL REPORTER,
P. O. Box 843, Philadelphia.

DR. MASSEY'S PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,
Physician in Charge.

Mellin's Food

FOR INFANTS AND INVALIDS.

A SOLUBLE DRY EXTRACT, prepared from Malted Barley and Wheat, consisting of Dextrin, Maltose, Albuminates, and Salts.

The SUGAR in MELLIN'S FOOD is MALTOSE. MALTOSE is the PROPER SUGAR for use in connection with cow's milk.

The sugar formed by the action of the Ptyalin of the Saliva and the Amylopsin of the Pancreas upon starch is MALTOSE. In the digestive tract MALTOSE is absorbed UNCHANGED.

—*Landois and Sterling.*

MALTOSE is a saccharose, not a glucose, and is a form of sugar which does not ferment.

—*Materia Medica and Therapeutics, Dr. Mitchell Bruce.*

"I have never seen any signs of fermentation which I could attribute to the influence of MALTOSE."

—*Eustace Smith, M.D., F.R.C.S.*

MELLIN'S FOOD, prepared according to the directions, is a true LIEBIG'S FOOD and the BEST SUBSTITUTE for Mother's Milk yet produced.

IT REQUIRES NO COOKING.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,

SOLOMON SOLIS-COHEN, M.D., SECRETARY.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

SESSIONS 1890-91.

The Autumn and Winter Sessions of the Post-Graduate Medical School opened on September 15. The Hospital is fully utilized for clinical purposes. There are ninety beds, including thirty for babies in the adjacent building. No Post-Graduate Medical School in this country can offer such opportunities for seeing important surgical and gynæcological operations under its own roof as does this institution. Besides, regular clinics, medical and surgical, are held by professors and instructors in those general and special hospitals with which they are connected which comprises nearly all the great hospitals of the city. The dispensary of the school and other large dispensaries furnish ample means of instruction in every class of walking cases.

Instruction is given in every branch of medicine and surgery. The laboratory is large and well equipped. Surgical anatomy and operative surgery are thoroughly taught. The instruction is personal, the practitioner being brought in direct contact with the patient. No other courses in any department will be required if those to be had in the Post-Graduate School are taken. The faculty were the first in the United States to organize private courses for practitioners of medicine, and they pledge themselves to leave nothing undone to make graduates in medicine profit by the unrivalled clinical advantages of the City of New York.

For catalogue and schedule, address

FAIRCHILD'S
ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND
OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED
IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges. Please mention this journal.

HENRY LEFFMAN, M. D.,

Analytical Chemist and Expert,

715 Walnut Street,

PHILADELPHIA, October 26, 1889.

MESSRS. EISNER & MENDELSON:

SIRS:—In response to inquiries made concerning the relative merits of the Johann Hoff's Malt Extract, and that sold under the name of Tarrant's Hoff's Extract, I may state as follows:

"That I have, during the past eighteen months, made a number of examinations of the principal forms of Malt Extract in the market, and have, among other matters, satisfied myself that the Johann Hoff's Malt Extract, as imported by you, is a Genuine Extract of Malt."

The judgment of the value of a liquid preparation of Malt will be largely based on the percentage of Alcohol, and the presence of any preservative, especially Salicylic Acid. It may be justly said that the less Alcohol found the better, provided its place is not taken by some more objectionable substance. Under such considerations, the Johann Hoff's Malt Extract possesses decided advantages over the preparation sold under the name of Tarrant's Hoff's Extract, in the fact that the former contains three and one-half per cent. of Alcohol, while the latter has yielded, in two samples, four and three-quarters and five per cent. respectively.

Further, I have noted in a number of examinations of the latter article—Tarrant's Extract—the presence of Salicylic Acid, while I have never, in repeated examinations of the Eisner & Mendelson Johann Hoff's Extract, found any trace of such preservative. The effects of Salicylic Acid have been extensively studied, and the unanimous opinion of sanitary chemists is, that it is very objectionable as an addition to any form of food or drink, and especially objectionable in Malt Extract. From some observations made in my own laboratory, and published in the *Polyclinic* in May, 1888, it appears that not only does Salicylic Acid wholly suspend the action of Diastase, to which Malt owes its starch-converting power, but that the starch-digesting power of the pancreatic secretion is also wholly suspended by it. It thus appears the addition of this body is to render the Extract not only inactive so far as its own function is concerned, but it introduces into the system an injurious substance, and one which interferes with an important function. Sanitary authorities, in various parts of Europe, have given from time to time much attention to the now indiscriminate use of this acid, and have all, so far as I am aware, condemned its employment in any article of food or drink. For this reason, among others as above noted, I am of the opinion that the Genuine Johann Hoff's Malt Extract, as imported by Eisner & Mendelson, is to be preferred. I may say that all the examinations were made on samples obtained in the open market, and in the bottles as originally imported. Yours,

HENRY LEFFMAN, M. D.,

Professor Chemistry Woman's Medical College, and Penna. College Dental Surgery; Food Inspector, Pennsylvania Board of Agriculture.

Doctor:

You now find that your consumptive patients, with lowered vitality and exhausted tissues, are unable to bear the cold weather. With impaired appetite and weakened digestion, they cannot take and assimilate sufficient food to create the normal bodily heat.

Hence you notice them instinctively seeking the sunny side of the street, or hovering over the fire, shivering. They are now losing ground more rapidly than ever, on account of the devitalizing effects of the cold. The fear expressed by their acquaintances, that "the poor fellow will never see spring again," you find justified by the cough, the increased sputa and the rapid increase in the pulmonary lesions.

The cold, which is a tonic to those in good health, proves permanently depressing to them, because their tissues lack sufficient tone to produce the necessary reaction.

What are you to do? Give up the case of those in moderate circumstances, and send the rich ones to some warm, malarious climate?

No, Doctor; keep them with you, under your own watchful supervision.

Home comforts where they are will more than compensate for balmy air, with hotel inconveniences, in a strange land. Meet the accidents and emergencies of the case according to their indications as they arise, but place the patients at once and permanently on McArthur's Syrup, containing the Hypophosphites of lime and soda in their chemical purity. This will so build up all the tissues and impart tone and elasticity to the entire system, that a new life will spring up in the patient, with a power of resistance fully equal to the normal. This will be of permanent value, as it is not produced by temporary irritant stimulation, but by supplying the tissues with new food and adding cells faster than they are exhausted by the disease.

By so continuing you can keep them on the upward grade, while others are constantly losing, and, although the progress may be slow, yet you will find that your perseverance will be amply rewarded. Such a course means all the difference between the early death and the final recovery of a patient whose life may be very valuable to the family, friends and society.

The promise is surely worth the effort, and in consideration of the number of successes recorded from such treatment, you could hardly be justified in a continued neglect of its benefits.

A sample bottle will be sent free if you will enclose your professional card and agree to pay express charges.

A valuable treatise, "The Curability and Treatment of Consumption," free.

ARISTOL.

ARISTOL, a combination of iodine and thymol, manufactured by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, Germany, is a valuable, inodorous and non-toxic antiseptic remedy, said to be superior to Iodoform, Iodole and Sozo-Iodole.

ARISTOL is insoluble in water and glycerine, and very sparingly in alcohol, but is very easily soluble in ether and chloroform. The ether solution is precipitated by the addition of alcohol. ARISTOL is very freely soluble in fatty oils. The solution must be made in the cold, by stirring, as the use of heat causes a decomposition. For the same reason it is necessary to protect the body from light and keep it in opaque bottles. It very readily adheres to the skin, and can thus be used as a powder strewn over wounds and burns.

In cases of mycosis it also acts well, and more quickly than any other known remedy, and does not cause irritation, like so many drugs.

The effective use of ARISTOL in psoriasis is of great interest, as our Materia Medica has hitherto supplied us with no non-poisonous drug, save only chrysarobin, the use of which is associated with a deep skin coloration and conjunctivitis—drawbacks from which ARISTOL is absolutely free.

In cases of lupus it is said to surpass even the best known remedies.

The value of ARISTOL can scarcely be over-estimated, as we have in it a drug possessing the good properties of Iodoform, but free from its toxic qualities. Its freedom, too, from any suspicious odor will be at once appreciated, both by the physician and his patient.

ARISTOL, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces.

SULFONAL-BAYER.

The value of Sulfonal in children's diseases.—Dr. William C. Wile sent a paper with this title to the American Medical Association, in which he stated that Sulfonal was the ideal hypnotic. It was without the bad effects of opium and the uncertainty of the bromides. It could be given in ten-grain doses. It quieted reflex irritability. It did not constipate nor disturb the stomach. In one case in which a drachm was taken accidentally in ten-grain doses, there was a deep slumber lasting twenty-four hours, slight fever, but a normal pulse and respiration.—*Medical Record*, New York.

Dr. Henry M. Field, in a paper presented to the American Medical Association, says:—"Clinically observed, we recognize in Sulfonal a mild calmative, *a slowly, but progressively acting hypnotic;* it has no other action, and its operation is attended by no complications, near or remote. It is therefore a pure hypnotic, and, we submit, it is the only pure hypnotic we possess, up to date."—*New England Medical Monthly.*

Sulfonal-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and in the form of Tablets of 5, 10 and 15 grains, put up in bottles of 10 and 100 tablets each.

We also offer Sulfonal-Bayer in the form of our soluble pills, containing 5 grains each.

PHENACETINE-BAYER.

Phenacetine in Insomnia.—Dr. F. Peyre Porcher, of Charleston, S. C., writes: "I desire to call special attention to the extreme value of Phenacetine as a remedy for insomnia. Given at night in a little water it is tasteless, innocuous, and induces sleep. I am confident, also, after repeated trials, that it is the best and most unobjectionable substitute for morphia. It causes sleep when, of course, pain is in abeyance, unless the pain be more than ordinary, and morphia hypodermically may then be required. The remedy may be repeated and the dose increased to seven or ten grains.

"Suffering from chronic rheumatism of the forearm, I have tested it repeatedly in my own person, and have given it to many who have suffered from insomnia, or inability to sleep from any transient cause, fatigue, nervousness, excitement, etc., in either sex." * * * * *—*Medical Record*, New York.

Phenacetine-Bayer, prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, is supplied by us in ounces and also in the form of our soluble pills and compressed tablets, containing two, four and five grains each. Either form may be obtained of any reputable apothecary.

It gratifies us to be able to announce that PHENACETINE, SULFONAL and SALOL have been incorporated into the new German Pharmacopœia just issued, and have been proposed by the General Medical Council of Great Britain for introduction into the forthcoming Addendum to the British Pharmacopœia. This action confirms and endorses our judgment in introducing these valuable remedies to the medical profession of the United States, and is a natural sequence of the favorable results experienced in their employment, and of the brilliant and conclusive testimony thereof, which had been so freely furnished by the most talented of the profession both in Europe and in the United States.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ.

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{60}$ gr.), Atropiæ Sulph. ($\frac{1}{1000}$ gr.), Codeia ($\frac{1}{10}$ gr.), Antimony Tart. $\frac{1}{25}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis, fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{60}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen, lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice, MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

LAPACTIC PILLS, S.&D.'s.

(PILULÆ LAPACTICÆ.)

Aloin	1-4 gr.
Strychnine	1-60 gr.
Ext. Belladonna	1-8 gr.
Ipecac	1-16 gr.

An elegant and most efficient combination **introduced by us** and found in practice to possess superior advantages over similar formulæ for the relief of

HABITUAL CONSTIPATION, ATONIC DYSPEPSIA, BILIARY ENGORGEMENT AND MANY GASTRIC DISORDERS.

☞ **Since we introduced our Lapactic Pills**—some four years ago—a number of manufacturers have adopted the same formula and have furnished these pills under the same name. Should Physicians fail to obtain satisfactory results from Lapactic Pills not of our make (and we have received a large number of such complaints), we shall be glad to furnish a sample of our Lapactic Pills on application. We feel confident that they will fully substantiate our claims.

Please use the term **"Lapactic Pills, S. & D.'s"** when prescribing these pills.
Dose: One to two pills when going to bed.

PAN-PEPTIC TABLETS, S.&D.'s.

A TONIC DIGESTIVE.

Pure Pepsin	1 gr.
Pure Pancreatin	1 gr.
Pure Caffeine	¼ gr.
Acid Lacto-Phosphate of Calcium.	
Celery.	

The **Pepsin** and **Pancreatin** used in these tablets possess highest digestive power, and cannot fail to promptly start and accomplish

THE DIGESTION OF FOOD.

Whilst the **Caffeine,** by its stimulant tonic action on stomach and bowels, assists and quickens the normal digestion and assimilation of food, the **Acid Lacto-Phosphate of Calcium** contributes to the tonic action of the tablets, and aids to build up the general system, and a small quantity of that refreshing aromatic nerve stimulant, **Celery,** imparts a pleasant flavor and acts as an appetizer.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

AND BY ALL DRUGGISTS.

CAPSULES MATHEY-CAYLUS

WITH THIN ENVELOPE OF GLUTEN.

CONTAINING COPAIBA AND ESSENCE OF SANTAL; COPAIBA, CUBEBS, AND THE ESSENCE OF SANTAL; COPAIBA, IRON, AND THE ESSENCE OF SANTAL.

"**The Mathey-Caylus Capsules,** of the *Essence of* "*Santal*, associated with the Balsams, possess an incontesta- "ble efficaciousness, and are employed with the greatest "success for the rapid cure of old or recent *Discharges*, "*Gonorrhœa, Blenorrhœa, Leucorrhœa, Cystitis of the Neck*, "*Urethritis, Catarrh*, and other *diseases of the bladder*, together "with all affections of the *Urinary Passages*."

"Thanks to their thin envelope of *Gluten*, which is essen- "tially assimilable, the *Mathey-Caylus Capsules* are digested "by the most delicate persons, and never weary the stomach."

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris; is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing, etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address,

DRS. S. S. & S. E. STRONG.

A GOOD PRICE WILL BE PAID FOR the Board and Care of a nervous lady. A physician's family preferred.

Books for our Subscribers.

WHAT IS THOUGHT OF THEM.

HEATH'S DICTIONARY OF PRACTICAL SURGERY.

C. B. Porter, M. D., Boston, Mass., says: "A most excellent book for the library of the surgeon, and especially for the country practitioner; as a book of reference it is so concise and at the same time so complete."

N. Senn, M. D., College of Physicians and Surgeons, Milwaukee, says: "As a means of ready reference for the student and busy practitioner this book stands unexcelled."

Prof. E. H. Gregory, St. Louis Medical College, St. Louis, says: "I have examined the book, and find it a most valuable addition to my library. I am sure it will meet the favor of the surgical profession."

LEIDY'S HUMAN ANATOMY.

The Lancet-Clinic, Cincinnati, O., says: "Professor Leidy again presents to medical practitioners and students a treatise on human anatomy that at once commands the attention and admiration of all who are at all familiar with the subject. Most of the plates are original, and in common with the text are very beautiful to behold. The work is a complete illustration of the method of teaching anatomy adopted by a leading scientist, and one of America's best known professors of anatomy. This is one of the books that should be in the library of every practitioner of medicine and surgery."

The Medical Advance, Ann Arbor, Mich., says: "The student can master and retain a practical knowledge of anatomy in a shorter time and with less hard work from this text-book than from any other work extant, and it has been our privilege to teach anatomy for several years."

BYFORD'S DISEASES OF WOMEN.

The Boston Medical and Surgical Journal says: "It is a satisfaction to observe the discussion of certain topics which are often neglected by writers, notably of the sympathetic symptoms of organs apparently disconnected with the uterus, for which he will receive the thanks of the younger members of the profession. Another topic very widely treated is that of Constipation in its relation to uterine diseases. All the other topics which should have a place in a work of this kind have been fully and properly treated."

The Cincinnati Lancet-Clinic says: "The book is eminently practical and instructive. Its suggestions for treatment are well up with the times, mostly judicious, conservative, and valuable, and the whole amply repays for thorough perusal."

The St. Louis Courier of Medicine says: "The work of a representative Western practitioner and professor, and is a thoroughly practical work."

The Virginia Medical Monthly says: "We take pleasure in recommending it to every student and physician desirous of obtaining a standard work on Gynæcology."

The Chicago Medical Journal and Examiner says: "The chapter on puberty should be carefully studied by every physician, teacher, and mother in the land. . . . Its style is clear, but concise, and always practical, and shows the author to be, as we all know, an experienced teacher. The work as a whole is most valuable, both to the student and practitioner."

Gaillard's Medical Journal says: "It is replete with good judgment, broad and practical views. . . . The illustrations are excellent."

FOWLER'S DICTIONARY OF PRACTICAL MEDICINE.

The Medical News says: "For those who do not wish to purchase the much larger book of Quain, or who wish comparatively recent information concerning medical subjects in a somewhat narrow space, the book will certainly prove of value, and we heartily recommend it as one which will give a full return for the money invested in the purchase."

The London Lancet says: "What the writers know they tell simply and plainly, and generally manage to put it in a short compass, and, what is more, the treatment that is recommended is clearly and sufficientiy set forth. . . . We can heartily congratulate the editor and his colleagues on having admirably fulfilled their purpose, viz., to produce a first-rate dictionary of medicine, at once scientific and practical, which well deserve the success we have no doubt it will meet with."

JACOBSON'S OPERATIONS OF SURGERY.

The Medical and Surgical Reporter says: "This handsome book is one of the most admirable works on operative surgery which we have seen for a long time. The author has brought to its preparation a large observation and experience, and a very thorough acquaintance with the methods of other surgeons. His book is comprehensive and his directions are clear and reliable. It is gratifying to an American reader to find that full justice is done to the work of American surgeons by Mr. Jacobson, and that his book bears no marks of the distance which stretches between his land and ours. This is as it should be, and is no less an element in the excellence of the technical worth of his book than it is an evidence of the cosmopolitan character of good scientific work."

CAZEAUX & TARNIER'S MIDWIFERY. With Appendix by MUNDÉ.

The Memphis Medical Monthly says: "Cazeaux's Obstetrics was authority during our student life, and has been generally recognized as authority from the publication of the first edition to the present. We cannot do more than to fully endorse the following from the pen of T. Gallard Thomas, M. D.; 'I have examined the last edition of Cazeaux & Tarnier's Theory and Practice of Obstetrics, and pronounce it practical, and just what is needed by every practitioner. I highly recommend the work. This work should be prominent in every library.'"

Dr. Wm. L. Lusk says: "Cazeaux's Midwifery will always remain an inexhaustible mine of information, and I rejoice to see it once more accessible to the profession in a new and attractive dress."

Dr. Wm. Goodell says: "I deem Cazeaux & Tarnier's Obstetrics the best yet published."

The Denver Medical Times says; "It is needless to say anything in praise of this work. Cazeaux's Obstetrics is a classical work, and Tarnier is one of the best known French writers on Obstetrics. The whole has been brought up to date by the appendix of Prof. Mundé, and altogether it makes a very complete and practical treatise on the subject, unsurpassed if not unequalled by any work with which we are acquainted. Especially valuable are the signs of delivery in the dead body and of live and still-births. The chapter on antisepsis and on puerperal septicemia are also worthy of mention."

THOMAS'S MEDICAL DICTIONARY.

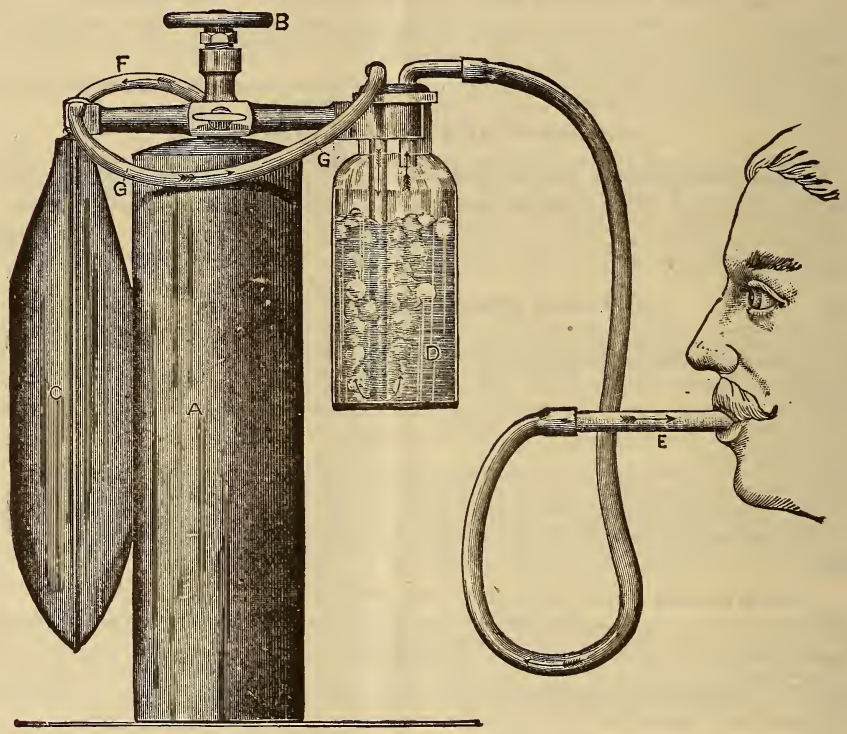
Prof. A. F. Patton, College of Physicians and Surgeons, Boston, Mass., says: "It is just the book for a medical or any other student, and it should be in the office of every physician. This dictionary supplies a place that has never been filled. I have looked it through and find all the new words that I have sought."

The St. Joseph Medical Herald says: "No better testimonial to the value of the work can be given than the following from Dr. J. Gibbon Hunt, the distinguished microscopist: 'To me the work is invaluable. I am astonished at its fullness of all recent words which the modern advance of medical science has introduced. Of course, I cannot conceive the learning and great labor which could edit such a complete, thorough, and admirable volume.' We can add nothing further save that the book should be in the hands of every physician and every student in the land."

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

FRENCH, RICHARDS & CO., PHILADELPHIA.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others. I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion."—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **G. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years.
Pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

SOLE AGENTS IN THE UNITED STATES AND CANADA.

FAIRCHILD'S
PANCREATIC TABLETS.

Afford a convenient, effective, and elegant means of administering the ferments of the pancreas.

These tablets can be given at any interval prior or subsequent to the ingestion of food, at the discretion of the physician, without entailing inconvenience to the patient.

In cases of intestinal indigestion, what can be a more rational practice than the introduction of the pancreatic ferments at the time when the gastric digestion is spent, and no obstacle is offered to their passage into the intestinal tract?

Pancreatic ferments bear no dependence upon an alkaline reaction. They are exceedingly active in neutral solutions and are not rendered inert by a merely acid reaction. It is, therefore, only at the height of *normal* gastric acidity that the pancreatic ferments may be theoretically held to be inoperative in the stomach. The ferments of the pancreas—known to digest rapidly every form of food, starches, fats, beef, milk, fibrin, etc., have proven useful as remedies, *per se*, notwithstanding the prejudice of theoretical views and conclusions based upon experiments under conditions purely artificial and differing in important respects from those in which their employment is indicated.

FAIRCHILD BRO'S & FOSTER,
82 and 84 Fulton Street, New York.

"THIS IS AN AGE OF APOLLINARIS WATER."
—WALTER BESANT.

Apollinaris

"THE QUEEN OF TABLE WATERS."

The filling at the Apollinaris Spring (Rhenish Prussia), amounted to

11,894,000 BOTTLES IN **1887,**
12,720,000 BOTTLES IN **1888** AND
15,822,000 BOTTLES IN **1889.**

"The annual consumption of this favorite beverage affords a striking proof of the widespread demand which exists for table water of absolute purity, and it is satisfactory to find that, wherever one travels, in either hemisphere, it is to be met with; it is ubiquitous, and should be known as the cosmopolitan table water. 'Quod ab omnibus, quod ubique.'"—BRITISH MEDICAL JOURNAL.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

FRAUD.

Unscrupulous parties are selling an inferior Wine, calling it Royal Tokay, thus profiting by the numberless Medical Editorials written about our genuine product. The Wine cannot be used as a substitute for ours, and many physicians have unjustly blamed us for damage done, imagining they were securing our Wine, which they had already tested with complete satisfaction. Your patients will not secure the Wine you prescribe unless you specify CALVICO TOKAY, by which name it will hereafter be known.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One Teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Where Women have miscarried during previous pregnancies, or in any case where miscarriage is feared, ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used,

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

The above preparations are prepared exclusively for Physicians' Prescriptions, and a sample of each or all of them will be sent to any Physician who wishes to test them, if he will pay the Express Charges.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

DR. MASSEY'S
PRIVATE SANITARIUM
212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,
Physician in Charge.

WESTERN PENNSYLVANIA MEDICAL COLLEGE
CITY OF PITTSBURGH.

SESSIONS OF 1890–91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

WALNUT LODGE HOSPITAL,
HARTFORD, CONN.

Organized in 1880 for the special medical treatment of
ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

MEDICO-CHIRURGICAL COLLEGE
OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,
SOLOMON SOLIS-COHEN, M. D., SECRETARY.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

SESSIONS 1890-91.

The Autumn and Winter Sessions of the Post-Graduate Medical School opened on September 15. The Hospital is fully utilized for clinical purposes. There are ninety beds, including thirty for babies in the adjacent building. No Post-Graduate Medical School in this country can offer such opportunities for seeing important surgical and gynæcological operations under its own roof as does this institution. Besides, regular clinics, medical and surgical, are held by professors and instructors in those general and special hospitals with which they are connected, which comprises nearly all the great hospitals of the city. The dispensary of the school and other large dispensaries furnish ample means of instruction in every class of walking cases.

Instruction is given in every branch of medicine and surgery. The laboratory is large and well equipped. Surgical anatomy and operative surgery are thoroughly taught. The instruction is personal, the practitioner being brought in direct contact with the patient. No other courses in any department will be required if those to be had in the Post-Graduate School are taken. The faculty were the first in the United States to organize private courses for practitioners of medicine, and they pledge themselves to leave nothing undone to make graduates in medicine profit by the unrivalled clinical advantages of the City of New York.

For catalogue and schedule, address

CLARENCE C. RICE, M. D., Secretary,

D. B. ST. JOHN ROOSA, M. D., LL.D., PRESIDENT. **226 East 20th St., New York City.**

HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.
SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.
THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address
W. H. DUNLAP, M. D., Registrar, SYRACUSE, N. Y.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

W. H. SCHIEFFELIN & CO., Sole Wholesale Agents, New York.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)		Soda.....1-3 Grains.	
Distilled Water.....35 "		Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.		Hyocholic Acid.....1-20 "	

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which HYDROLEINE is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable,-supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. **115 FULTON STREET, N. Y.**

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

CHEMIST,

WALNUT & THIRTEENTH STREETS,

PHILADELPHIA.

THE GENUINE IMPORTED NATURAL

CARLSBAD SPRUDEL SALT

AND

CARLSBAD MINERAL WATERS

Are Highly Recommended for

1. **Diseases of the Stomach**—Chronic catarrh of the stomach, cardialgia, ulcer of the stomach.

2. **Diseases of the Intestines**—Chronic constipation, chronic diarrhœa.

3. **Diseases of the Spleen**—Chronic hyperæmia of the spleen, tumors of the spleen, arising after intermittent fever, typhus, etc., and the effects of a residence in marshy districts or hot climates.

The genuine imported Carlsbad Sprudel Salt is put up in round bottles like the above cut. Each bottle comes in a paper cartoon with the seal of the City of Carlsbad, and signature of "Eisner & Mendelson Co.," sole Agents, on the neck of every bottle and on the outside cartoon.

4. **Liver Diseases**—Hyperæmia of the liver, resulting from agglomeration of the blood in the veins, if it does not originate in organic defects; fat liver, jaundice, produced by catarrh of the passages of the bile, or by liver complaint in consequence of violent emotions; gallstones.

5. **Diseases of the Kidneys and Bladder**—Gravel, nephritic stones, sand, stone in the bladder—chronic catarrh of the kidneys and bladder—albuminuria.

6. **Diseases of the Prostate**—Chronic hyperæmia of the prostate, resulting from interrupted circulation in the bowels, constipation, hemorrhoids, etc.

7. **Chronic Catarrh of the Womb**, produced by menstrual disturbances, hemorrhoids, and the different consequences of interrupted circulation in the bowels.

8. **Gout**, especially in the early stages.

9. **Diabetes Mellitus**—By the use of the Carlsbad Thermal Waters, not only the clinical phenomena of this disease (the tormenting thirst, violent hunger, dryness of the skin) disappear in a very short time, but it also considerably diminishes the secretion of sugar in the urine, and frequently causes it to disappear altogether.

Diseases of the stomach are best treated with the Carlsbad Water, whereas the Carlsbad Sprudel Salt (powder form) is to be preferred in diseases of the viscera, such as intestinal canal, spleen, kidneys, inadiposis, etc.

PAMPHLETS MAILED ON APPLICATION.

EISNER & MENDELSON CO.,

SOLE AGENTS,

6 BARCLAY STREET, **NEW YORK.**

It is Important

For the Physician to watch the character and quality of the remedies used in his prescriptions. Responsibility *does not cease* when the patient leaves the office; for impure, stale, or inferior preparations may be used without his knowledge. Personal examination of remedies prescribed—is the best check upon substitution.

FERRO-SALICYLATA

LIQUID.

MERRELL.

An eligible combination of Methyl Salicylate and Tinct. Citro-Chloride Iron, in a pleasant and permanent form.

EACH FLUID DRACHM CONTAINS

True Salicylic Acid—from Oil Wintergreen (Methyl Salicylate), - - - - 5 grs.
Tinct. Citro-Chloride Iron, 5 minims.

Not Sold in Bulk.

ELIXIR

Pinus Compositus.

MERRELL.

Each Fluid Drachm Contains

White Pine—fresh bark,	2½ grs.
Balm Gilead Buds,	2 grs.
Spikenard,	2 grs.
Cherry Bark,	1¾ grs.
Ipecac,	1–4 gr.
Sanguinarina Nitrate,	1–64 gr.
Morphine Acetate,	1–16 gr.
Ammonium Chloride,	1–2 gr.
Chloroform,	1–2 minim.

Not Sold in Bulk.

FERRO-SALICYLATA.—*Merrell.*

Ferro-Salicylata is especially valuable in that shade of disease peculiar in anæmic, delicate, poorly nourished or brŏken-down patients—usually aged people—children or youth—but met with in all ages. In adults, and often in children when the disease is not plainly chronic, there will be a long series of recurrences with intervals of doubtful health. It may also be employed in acute articular rheumatism, and in some cases of acute tonsillitis, especially where the diagnosis is at first in doubt between rheumatic angina and diphtheria; also, in acute rheumatism and rheumatic affections generally.

Ferro-Salicylata may be used in combination with the Iodides and Bromides of Potassium and Sodium. Associated with the former, it will prove an admirable alterative and tonic in second syphilis attended by a debilitated condition of the general system. It also combines well with Chlorate Potassium, the Hypophosphites, with Fowler's Solution, the vegetable bitter tonics, either in Fluid Extract or Tincture Form.

Ferro-Salicylata and all other preparations of this Company reach the laity through professional channels only. We therefore avoid entering into the minute details of their application, leaving the physician to make such practical use of our therapeutic notes as in his judgment may be bestsuited to individual cases.

Ferro-Salicylata may be obtained of wholesale druggists throughout the United States, of our Eastern Office, 96 Maiden Lane, New York City, or direct from the Laboratory.

Please designate "Ferro-Salicylata—*Merrell.*"

ELIXIR PINUS COMPOSITUS.—*Merrell.*

An admirable combination of well known and highly approved medicinal agents; recommended in acute, chronic, and capillary bronchitis—in ordinary coughs and colds, and wherever a "routine" expectorant is suggested. In the troublesome cough following the recent epidemic "La Grippe," it proved invaluable—many of our correspondents looking upon it as a "specific" in this stage of the disease.

CAUTION.—Physicians are reminded that the Elixir Pinus Compositus of this manufacturer is wholly unlike the many syrups, etc., under similar names, and the difference will be readily appreciated when tried. In testing the physical properties of the Elixir Pinus, note especially its delicate taste and perfect freedom from the odor of rank syrup, the drastic, harsh, and repulsive characteristics of the crude blood-root, and other coarser ingredients characteristic of competing preparations.

"Merrell Co.'s" "Green Drug," Fluid Extracts, True Salicylic Acid, Salts of Hydrastis, Fluid Hydrastis, and Specialties may be obtained of wholesale druggists throughout the United States, at the Home Office at Cincinnati, or the New York Office, 96 Maiden Lane, New York City, Richards Drug Co., San Francisco, Agents for Pacific Coast. Prices-current and printed matter cheerfully supplied.

Address, MEDICAL AND SURGICAL REPORTER, P. O. Box 843, Philadelphia.

MESSRS. SNOW, CHURCH & CO.,

LAW AND COLLECTION OFFICES,

608 & 610 Chestnut Street,

PHILADELPHIA.

GENTLEMEN:—Your management of the collections of the MEDICAL AND SURGICAL REPORTER during the past year has been so admirable and so much more successful than that of any agency with which I have dealt heretofore, that I renew my contract with you for the coming year with great pleasure.

The Publisher of the Medical and Surgical Reporter.

Philadelphia,
September 25, 1890.

MEDICO-CHIRURGICAL COLLEGE

OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

☞ **For full information regarding our Soluble Pills we refer to our formula books and price-lists, which we shall be happy to furnish upon application.**

170 and 172 William Street,

NEW YORK.

The Genuine Imported

Johann Hoff's Malt Extract

is put up in this style only.

FAC-SIMILE OF BOTTLE.
(One half of actual size.)

Please Specify
"JOHANN HOFF'S" MALT EXTRACT,
Imported by "EISNER,"
When ordering the Genuine Article.

This has been the first Malt Extract introduced to the *Medical Profession* (1847). No preparation of Malt has been so long and extensively employed as a Medical

Food Nutrient and Tonic.

The following is an abstract from the work on the Pulmonary Diseases published by Prof. PROSPER DE PIETRA SANTA, *at Paris:*

"As a large number of patients lack the necessary power to digest solid food, and would through the use of stimulants be merely excited and weakened, therefore I regard it of immense value to the practitioner to bring to his aid a nutritious tonic and remedy like the *Johann Hoff's* Malt Extract, which will act not only as a tonic, but as a nutrient as well, and which is less exciting than wine as a stimulant."

"I have, during the past eighteen months, made a number of examinations of the principal forms of Malt Extract in the market, and have satisfied myself that the *Johann Hoff's* Malt Extract, imported by Eisner & Mendelson Co., is a genuine Malt Extract, FREE FROM Salicylic Acid or other objectionable substances."

HENRY LEFFMANN, M.D., Phila.

CAUTION: A preparation bottled in New York is being sold as "Hoff's" Malt Extract. To obtain the genuine, original article, please specify "JOHANN HOFF'S MALT EXTRACT, imported by Eisner," which will prevent substitution.

The Genuine has the signature of "Johann Hoff" and "Moritz Eisner" on the neck of every bottle.

EISNER & MENDELSON CO., Sole Agents for the U. S.,
6 Barclay Street, New York.

BOOKS FOR OUR SUBSCRIBERS

Books for our Subscribers.

WHAT IS THOUGHT OF THEM.

HEATH'S DICTIONARY OF PRACTICAL SURGERY.

C. B. Porter, M. D., Boston, Mass., says: "A most excellent book for the library of the surgeon, and especially for the country practitioner; as a book of reference it is so concise and at the same time so complete."

N. Senn, M. D., College of Physicians and Surgeons, Milwaukee, says; "As a means of ready reference for the student and busy practitioner this book stands unexcelled."

Prof. E. H. Gregory, St. Louis Medical College, St. Louis, says: "I have examined the book, and find it a most valuable addition to my library. I am sure it will meet the favor of the surgical profession."

LEIDY'S HUMAN ANATOMY.

The Lancet-Clinic, Cincinnati, O., says: "Professor Leidy again presents to medical practitioners and students a treatise on human anatomy that at once commands the attention and admiration of all who are at all familiar with the subject. Most of the plates are original, and in common with the text are very beautiful to behold. The work is a complete illustration of the method of teaching anatomy adopted by a leading scientist, and one of America's best known professors of anatomy. This is one of the books that should be in the library of every practitioner of medicine and surgery."

The Medical Advance, Ann Arbor, Mich., says: "The student can master and retain a practical knowledge of anatomy in a shorter time and with less hard work from this text-book than from any other work extant, and it has been our privilege to teach anatomy for several years."

BYFORD'S DISEASES OF WOMEN.

The Boston Medical and Surgical Journal says: "It is a satisfaction to observe the discussion of certain topics which are often neglected by writers, notably of the sympathetic symptoms of organs apparently disconnected with the uterus, for which he will receive the thanks of the younger members of the profession. Another topic very widely treated is that of Constipation in its relation to uterine diseases. All the other topics which should have a place in a work of this kind have been fully and properly treated."

The Cincinnati Lancet-Clinic says: "The book is eminently practical and instructive. Its suggestions for treatment are well up with the times, mostly judicious, conservative, and valuable, and the whole amply repays for thorough perusal."

The St. Louis Courier of Medicine says: "The work of a representative Western practitioner and professor, and is a thoroughly practical work."

The Virginia Medical Monthly says: "We take pleasure in recommending it to every student and physician desirous of obtaining a standard work on Gynæcology."

The Chicago Medical Journal and Examiner says: "The chapter on puberty should be carefully studied by every physician, teacher, and mother in the land. . . . Its style is clear, but concise, and always practical, and shows the author to be, as we all know, an experienced teacher. The work as a whole is most valuable, both to the student and practitioner."

Gaillard's Medical Journal says: "It is replete with good judgment, broad and practical views. . . . The illustrations are excellent."

FOWLER'S DICTIONARY OF PRACTICAL MEDICINE.

The Medical News says: "For those who do not wish to purchase the much larger book of Quain, or who wish comparatively recent information concerning medical subjects in a somewhat narrow space, the book will certainly prove of value, and we heartily recommend it as one which will give a full return for the money invested in the purchase."

The London Lancet says: "What the writers know they tell simply and plainly, and generally manage to put it in a short compass, and, what is more, the treatment that is recommended is clearly and sufficientiy set forth. . . . We can heartily congratulate the editor and his colleagues on having admirably fulfilled their purpose, viz., to produce a first-rate dictionary of medicine, at once scientific and practical, which well deserve the success we have no doubt it will meet with."

JACOBSON'S OPERATIONS OF SURGERY.

The Medical and Surgical Reporter says: "This handsome book is one of the most admirable works on operative surgery which we have seen for a long time. The author has brought to its preparation a large observation and experience, and a very thorough acquaintance with the methods of other surgeons. His book is comprehensive and his directions are clear and reliable. It is gratifying to an American reader to find that full justice is done to the work of American surgeons by Mr. Jacobson, and that his book bears no marks of the distance which stretches between his land and ours. This is as it should be, and is no less an element in the excellence of the technical worth of his book than it is an evidence of the cosmopolitan character of good scientific work."

CAZEAUX & TARNIER'S MIDWIFERY. With Appendix by MUNDÉ.

The Memphis Medical Monthly says: "Cazeaux's Obstetrics was authority during our student life, and has been generally recognized as authority from the publication of the first edition to the present. We cannot do more than to fully endorse the following from the pen of T. Gallard Thomas, M. D; 'I have examined the last edition of Cazeaux & Tarnier's Theory and Practice of Obstetrics, and pronounce it practical, and just what is needed by every practitioner. I highly recommend the work. This work should be prominent in every library.'"

Dr. Wm. L. Lusk says: "Cazeaux's Midwifery will always remain an inexhaustible mine of information, and I rejoice to see it once more accessible to the profession in a new and attractive dress.'

Dr. Wm. Goodell says: "I deem Cazeaux & Tarnier's Obstetrics the best yet published."

The Denver Medical Times says; "It is needless to say anything in praise of this work. Cazeaux's Obstetrics is a classical work, and Tarnier is one of the best known French writers on Obstetrics. The whole has been brought up to date by the appendix of Prof. Mundé, and altogether it makes a very complete and practical treatise on the subject, unsurpassed if not unequalled by any work with which we are acquainted. Especially valuable are the signs of delivery in the dead body and of live and still-births. The chapter on antisepsis and on puerperal septicemia are a so worthy of mention."

THOMAS'S MEDICAL DICTIONARY.

Prof. A. F. Patton, College of Physicians and Surgeons, Boston, Mass., says: "It is just the book for a medical or any other student, and it should be in the office of every physician. This dictionary supplies a place that has never been filled. I have looked it through and find all the new words that I have sought."

The St. Joseph Medical Herald says: "No better testimonial to the value of the work can be given than the following from Dr. J. Gibbon Hunt, the distinguished microscopist: 'To me the work is invaluable. I am astonished at its fullness of all recent words which the modern advance of medical science has introduced. Of course, I cannot conceive the learning and great labor which could edit such a complete, thorough, and admirable volume.' We can add nothing further save that the book should be in the hands of every physician and every student in the land."

A BRIEF SUMMARY
OF
HYPODERMIC MEDICATION.

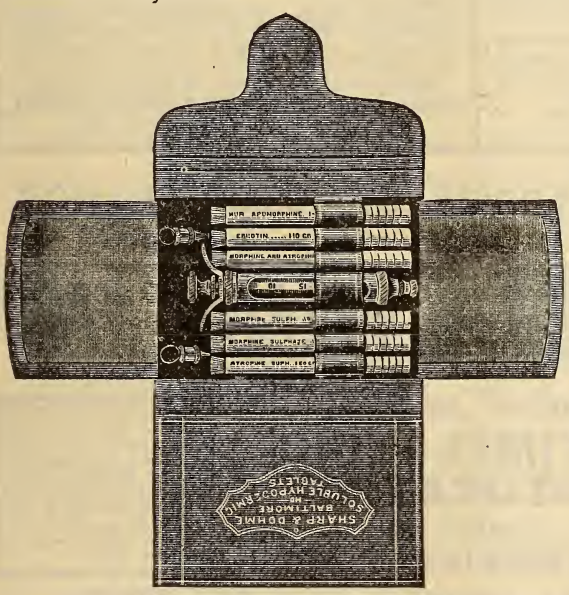
will be sent, with our compliments, when application is made and the name of this journal is mentioned. It quotes Profs. Dujardin-Beaumetz, Bartholow, Anstie, Erb, Echeverria, Mays and others. It contains important and the most recent suggestions on the technique of hypodermic medication, and gives the composition, properties, doses, etc., of our

SOLUBLE HYPODERMIC TABLETS, S. & D.'s.

which are quickly and perfectly soluble in cold or warm water, combining accuracy of dose with perfect preservation of the active ingredient, and the base of which is perfectly harmless and unobjectionable. They will cause no abscesses and will not become insoluble by age. They may also be administered by the mouth, and are

ALWAYS READY FOR INSTANT USE.

We respectfully solicit a trial of these tablets, and will mail samples of them free to readers of this journal.



That the several objections to hypodermic medication might be obviated, we have had manufactured expressly for us a line of

HYPODERMIC SYRINGES, S. & D.'s,

which have all the latest improvements, are most accurately made of the best materials and so constructed as to allow the

MAKING OF A SOLUTION IN THE SYRINGE.

They are sent to any address at the following prices:

Syringe, in leathered-covered case, two tubes of tablets . . . . . net, $2.50
" " metal case, latest improved style, two tubes of tablets . . . . . " 2.50
" " " " four tubes of tablets . . . . . " 3.50
" " flexible leather case, as shown by cut 3.50

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious Elixir, **QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

DANDRUFF AND BALDNESS

LASSAR'S TREATMENT*

includes Shampooing the head thoroughly for ten minutes every day with **Packers' Tar Soap.**—f.f.

Mellin's Food

FOR INFANTS AND INVALIDS.

A SOLUBLE DRY EXTRACT, prepared from Malted Barley and Wheat, consisting of Dextrin, Maltose, Albuminates, and Salts.

The SUGAR in MELLIN'S FOOD is MALTOSE. MALTOSE is the PROPER SUGAR for use in connection with cow's milk.

The sugar formed by the action of the Ptyalin of the Saliva and the Amylopsin of the Pancreas upon starch is MALTOSE. In the digestive tract MALTOSE is absorbed UNCHANGED.

—*Landois and Sterling.*

MALTOSE is a saccharose, not a glucose, and is a form of sugar which does not ferment.

—*Materia Medica and Therapeutics, Dr. Mitchell Bruce.*

"I have never seen any signs of fermentation which I could attribute to the influence of MALTOSE."

—*Eustace Smith, M.D., F.R.C.S.*

MELLIN'S FOOD, prepared according to the directions, is a true LIEBIG'S FOOD and the BEST SUBSTITUTE for Mother's Milk yet produced.

IT REQUIRES NO COOKING.

THE DOLIBER-GOODALE CO.,

BOSTON, MASS.

TERTIARY SYPHILIS.

"Your preparation, **IODIA**, is an excellent alterative, and is the most agreeable of any preparation of Iod. Potas., as it does not cause the cramps in stomach, which are often intolerable.

"I have employed **IODIA** in two cases of Tertiary Syphilis, in which, after five weeks' treatment, the manifestations disappeared.

"In a case of Syphiltic Eczema it was also successful. —Dr. Sam Petiteau, Garches, France, Nov. 10, 1890.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

DR. MASSEY'S
PRIVATE SANITARIUM
212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,

Physician in Charge.

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

THE JEFFERSON MEDICAL COLLEGE

OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

PREVENTING CONSUMPTION.

That Consumption is a contagious disease may be disputed; but, that it is in a very great degree infectious must be admitted, as according to statistics gleaned by the most competent authorities "one-seventh of the people who die from tuberculosis acquire the disease from breathing the air tainted with contagion by a person already affected."

It follows, therefore, by way of prevention of the disease, the most practical results must be looked for in the prompt destruction or disinfection of the materials thrown off by the Consumptive. The sputa expectorations and nasal discharges are offensive, poisonous, and dangerous, and through them the dread disease is passed along.

The liberal use of a reliable inodorous and inexpensive disinfectant about the sick-room is always an aid toward recovery for the patient, and a blessing as well as a protection to the attendants and friends, and this is equally true in cases of Consumption and ailments tending that way.

The practical advice of an experienced and most successful physician in this relation we sum up as follows: "Give your patient every chance. Keep the room pleasant, the air sweet and pure. Always have a bottle of Platt's Chlorides handy in the room. Put a mixture of one part chlorides to six or eight of water in the vessels before using, and keep a solution of this strength constantly in the cuspidor, or spittoon. This popular disinfectant has no smell, so your patient will not be annoyed; neither is it dangerous to use, as it contains no mercury.

"Should the patient be confined to the bed relieve the atmosphere of the room by occasionally shaking a towel wet with a mixture of one part chlorides to ten of water, and then leave the moistened towel hanging to the gas-bracket or any convenient hook. It is astonishing how quickly and thoroughly the air is changed and sweetened by this simple process, and how gratefully the patient will appreciate it."

To use this disinfectant frequently and liberally costs but a little, as a quart bottle is supplied by the apothecary at 50 cents, and this quantity is sufficient to prepare two to three gallons of disinfecting liquid of ample strength for general household and sick-room purposes.

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure. They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S COMPRESSED PILLS OR TABLETS.

ARE MADE ONLY FROM THE PUREST MATERIALS.

Smooth and elegant in appearance—Uniform in size—Regular in weight—Prompt and reliable in action—Readily soluble—Easily swallowed.

COMPRESSED ANTISEPTIC TABLETS.

Each Tablet contains:

Hydrarg. Bichlor. . . . . 7.3 grains.
Ammon. Chlor. . . . . 7.7 grains.

One Tablet dissolved in one pint of water will make a 1 to 1,000 solution, containing one part of Corrosive Sublimate in 1,000 parts of water.

IN SCREW-CAP BOTTLES CONTAINING 25 PER BOTTLE.
IN SCREW-CAP BOTTLES CONTAINING 100 PER BOTTLE.

COMPRESSED SULPHUR and CREAM TARTAR TABLETS

Each Tablet contains 5 grains of Washed Sulphur (Sulphur Lotum U. S. P.) and 15 grains of medicinally pure Cream Tartar.

IN SCREW-CAP BOTTLES, EACH CONTAINING 35 TABLETS.

COMPRESSED ANTISEPTIC PASTILLES.

DR. CARL SEILER'S FORMULÆ.

For making Antiseptic Sprays, Nasal Wash, Mouth Wash, etc. One Tablet dissolved in four tablespoonfuls of warm water makes a solution which can be used as a spray or wash.

PUT UP IN SCREW-CAPPED BOTTLES, CONTAINING 50 PASTILLES EACH.

Our laboratory is in charge of Professor F. G. RYAN, of the Philadelphia College of Pharmacy, who has able assistants. Send for our new price-list with formulæ for Compressed Pills, Lozenges, Hypodermic Tablets, Tablet Triturates, etc.

FRENCH, RICHARDS & CO., PHILADELPHIA.

FOR THE CURE OF

NERVOUS HEADACHES

SEDATIVE EFFERVESCENT

BROMO (WARNER & CO.) SODA

℞ Caffein 1 grain, Brom. Soda 30 grains in each heaping teaspoonful.

Useful in Nervous Headache, Sleeplessness, Excessive Study, Migraine, Nervous Debility, Mania, as a Remedy in Seasickness and Epilepsy.

Dose and Composition.—A heaping teaspoonful, containing Bromo-Soda 30 grs., and Caffein 1 gr., in half a glass of water, to be repeated once after an interval of thirty minutes if necessary.

☞ The composition of the above effervescent salts is such as physicians can use with confidence, and you will please specify **Bromo-Soda** or **Bromo-Potash, Warner & Co.,** when ordering or prescribing to avoid the substitution of other "Bromos." Prepared only by

EFFERVESCENT ANODYNE

BROMO (WARNER & CO.) POTASH

℞ Caffein 1 grain, Bromide Potash 20 grains in each heaping teaspoonful.

Useful in Nervous Headache, Sleeplessness, Excessive Study, Migraine, Nervous Debility, Mania, as a Remedy in Seasickness and Epilepsy.

☞ **Physicians** desiring the Potash Salt can obtain the same by ordering or prescribing **Bromo-Potash (Warner & Co.)**, the composition of which is: Brom. Potash 20 grs., Caffein 1 gr.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

CH. MARCHAND'S

PEROXIDE OF HYDROGEN

(MEDICINAL) H_2O_2 (ABSOLUTELY HARMLESS.)

Is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a Nostrum.

A REMEDY FOR DIPHTHERIA; CROUP; SORE THROAT, AND ALL INFLAMMATORY DISEASES OF THE THROAT.

OPINION OF THE PROFESSION.

Dr. Geo. B. Hope, Surgeon Metropolitan Throat Hospital, Professor Diseases of Throat, University of Vermont, writes in an article headed, "Some Clinical Features of Diphtheria, and the treatment by Peroxide of Hydrogen" (*N. Y. Medical Record*, October 15, 1888). Extract:

". . . On account of their poisonous or irritant nature the active germicides have a utility limited particularly to surface or open wound applications, and their free use in reaching diphtheritic formations in the mouth or throat, particularly in children, is, unfortunately, not within the range of systematic treatment. In Peroxide of Hydrogen, however, it is confidently believed will be found, if not a specific, at least the most efficient topical agent in destroying the contagious element and limiting the spread of its formation, and at the same time a remedy which may be employed in the most thorough manner without dread of producing any vicious constitutional effect. . .

"Inasmuch as the efficacy depends upon the ozonized oxygen in solution, it has seemed desirable to rely on the full strength of the officinal preparation of fifteen volumes, especially when used in the fauces, where any slight irritation from its acidity is not apparent. In all the cases treated (at the Metropolitan Throat Hospital), a fresh, standard Marchand preparation of fifteen volumes was that on which the experience of the writer has been based. . .

"An equally important element is in making the application in such a manner as to produce the most determined effect on the diseased tissues with as little local disturbance as possible. . . . A steady, coarse spray, with an air pressure of twenty pounds or more, will, in a few moments' time, produce a more positive action than prolonged efforts to reach the fauces by means of cotton applicators. . . . How frequently the treatment is to be followed up depends to a considerable extent on the density, as well as the area, of the surface involved. . "

CAUTION.—By specifying in your prescriptions "**Ch. Marchand's Peroxide of Hydrogen (Medicinal),**" which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon. Never sold in bulk.

PREPARED ONLY BY

Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" (France).

A book containing full explanations concerning the therapeutical applications of both CH. MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) and GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application. ☞ Mention this publication.

SOLD BY LEADING DRUGGISTS.

Laboratory, 10 West Fourth Street, New York.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency. Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One Teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Where Women have miscarried during previous pregnancies, or in any case where miscarriage is feared, ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used,

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

The above preparations are prepared exclusively for Physicians' Prescriptions, and a sample of each or all of them will be sent to any Physician who wishes to test them, if he will pay the Express Charges.

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f3i to f3ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

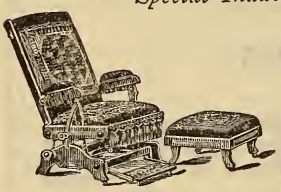
THE RIP VAN WINKLE RECLINING ROCKER.

OFFICE AND GYNÆCOLOGICAL CHAIR COMBINED.

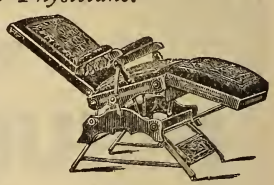
Special Inducements and Extra Discount Given to Physicians.



No. 1.

It is the most wonderful Chair in the world. You can sit in the Chair with your feet on the foot-rest and rock yourself, and it is impossible for a beholder to tell what makes the Chair rock. It is the finest invalid's Chair in the world.

As an **Invalid's Chair**, a person can recline the back by quarter-inches until he lies straight or horizontally, and without taking his weight from the back of the chair in the least, and CAN ROCK AS WELL LYING DOWN AS SITTING UP. Upholstered in Plush, Leather or Wilton Rugs. This Chair has over 200 changes of position, and sells for $25.00.



No. 2.

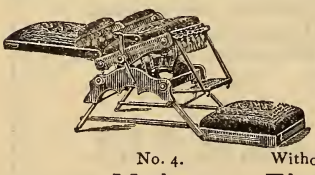
This Chair can be converted from a splendid Office Chair (see cuts Nos. 1 and 3) into one of the most complete Gynæcological Chairs in a half minnte, (see cuts 2, 4, and 5).

As a Gynæcological Chair it will take all the positions of the high-priced chairs costing two and three times what this one does.

The Rip Van Winkle Chair has over 200 changes of position. Every chair fully warranted.

No. 3.

This Chair is sold with or without the Gynæcological attachment, as desired. It is *unquestionably* the most complete and comfortable Reclining or Lounging Chair ever made. I make a special price to physicians, and also give them a handsome commission on all orders I receive through them for Chairs for their patients. No Chair in the world is so well adapted to ladies suffering from female weakness, and the commission I give on your orders will soon pay for your own Chair.



No. 4.

The Chair makes 5 pieces of Furniture.

I have attachments by which it can be converted into an Invalid's Rolling Chair in one minute. Parties can get these attachments from factory at any time. Send for full particulars, price-list, and illustrated catalogue showing the principal positions and changes. The Catalogue contains the "Legend of Rip Van Winkle." Without the Gynæcological Attachment these Chairs

No. 5.

LITTELL'S LIVING AGE.

IN 1891 **THE LIVING AGE** enters upon its forty-eighth year. It has met with constant commendation and success.

A WEEKLY MAGAZINE, it gives fifty-two numbers of sixty-four pages each, or more than **Three and a Quarter Thousand** double-column octavo pages of reading-matter yearly. It presents in an inexpensive form, considering its great amount of matter, with freshness, owing to its weekly issue, and with a completeness nowhere else attempted,

The best Essays, Reviews, Criticisms, Tales, Sketches of Travel and Discovery, Poetry, Scientific, Biographical, Historical, and Political Information, from the entire body of Foreign Periodical Literature, and from the pens of

The Foremost Living Writers.

The ablest and most cultivated intellects, in every department of Literature, Science, Politics, and Art, find expression in the Periodical Literature of Europe, and especially of Great Britain.

The Living Age, forming four large volumes a year, furnishes from the great and generally inaccessible mass of this literature the only compilation that, while within the reach of all, is satisfactory in the COMPLETENESS with which it embraces whatever is of immediate interest, or of solid, permanent value.

It is therefore indispensable to every one who wishes to keep pace with the events or intellectual progress of the time, or to cultivate in himself or his family general intelligence and literary taste.

OPINIONS.

"It is nearly half a century since the first volume of this sterling publication came from the press, and to-day it stands the most perfect publication of its kind in the world. . There is but one LIVING AGE, though many have essayed imitations. While their intent has no doubt been worthy, they have lacked that rare discriminating judgment, that fineness of acumen, and that keen appreciation of what constitutes true excellence, which make LITTELL'S LIVING AGE the incomparable publication that it is. No one who has once become acquainted with its educating and uplifting qualities will ever be induced to dispense with its visitations."—*Christian at Work, New York.*

"It is indispensable to intelligent people in this busy day."—*New-York Evangelist.*

"Many other and deservedly popular favorites have entered the periodical field, but none of them have diminished the importance of THE LIVING AGE. . With its aid it is possible for the busy reader to know something of universal literature. Indeed it may well be doubted whether there exists any more essential aid to cultivation of the mind among English-speaking people; and its importance increases with the ever-growing rush and hurry of modern times. . No one knows its value so well as the busy man who without it might well despair of keeping in any way posted as to the trend of modern thought in this day of immense activity."—*Episcopal Recorder, Philadelphia.*

"This periodical fills a place that no other occupies. . Biography, fiction, science, criticism, history, poetry, travels, whatever men are interested in, all are found here."—*The Watchman, Boston.*

"It contains nearly all the good literature of the time."—*The Churchman, New York.*

"Like wine, it only improves with age. . The same amount of valuable reading cannot be found elsewhere for so small a sum."—*Christian Intelligencer, New York.*

"It would be cheap at almost any price."—*California Christian Advocate, San Francisco.*

"It stands unrivalled."—*The Presbyterian, Phila.*

"No man will be behind the literature of the times who reads THE LIVING AGE."—*Zion's Herald, Boston.*

"It is incomparably the finest literary production of modern times. In its own peculiar sphere it has no peer. It embraces within its scope the matured thoughts, on all subjects, of the greatest authors and ripest scholars in Europe."—*Herald and Presbyter, Cincinnati.*

"There may be some things better than THE LIVING AGE, but if so we have not seen them. . For the man who tries to be truly conversant with the very best literature of this and other countries, it is indispensable."—*Central Baptist, St. Louis.*

"It retains the characteristics of breadth, catholicity and good taste which have always marked its editing. The fields of fiction, biography, travel, science, poetry, criticism, and social and religious discussion all come within its domain and all are well represented. . The readers miss very little that is important in the periodical domain."—*Boston Journal.*

"It may be truthfully and cordially said that it never offers a dry or valueless page."—*New-York Tribune.*

"No better outlay of money can be made than in subscribing for THE LIVING AGE."—*Hartford Courant.*

"One who keeps up with THE LIVING AGE keeps up with the thought of the day."—*Albany Times.*

"To read it is itself an education in the course of modern thought and literature."—*Buffalo Commercial Advertiser.*

"Coming weekly, it has a great advantage over the monthly magazines and reviews."—*San Francisco Chronicle.*

"It is one of the invaluables to those whose time is limited."—*Houston (Tex.) Post.*

"In it the reader finds all that is worth knowing in the realm of current literature."—*Canada Presbyterian, Toronto.*

"It enables its readers to keep fully abreast of the best thought and literature of civilization."—*Christian Advocate, Pittsburgh.*

"He who subscribes for a few years to it gathers a choice library, even though he may have no other books."—*New-York Observer.*

PUBLISHED WEEKLY at $8.00 a year, *free of postage.*

☞ **TO NEW SUBSCRIBERS for the year 1891,** remitting before Jan. 1, the weekly numbers of 1890 issued after the receipt of their subscriptions, will be sent *gratis.*

CLUB PRICES FOR THE BEST HOME AND FOREIGN LITERATURE.

["Possessed of LITTELL'S LIVING AGE, and of one or other of our vivacious American monthlies, a subscriber will find himself *in command of the whole situation.*"—*Philadelphia Evening Bulletin.*]

For $10.50, THE LIVING AGE and any one of the *four-dollar* monthly magazines (or *Harper's Weekly* or *Bazar*) will be sent for a year, *postpaid;* or, for $9.50, THE LIVING AGE and *Scribner's Magazine,* or *Lippincott's Magazine,* or the *St. Nicholas.*

Rates for clubbing more than one other periodical with one copy of THE LIVING AGE will be sent on application.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,
SOLOMON SOLIS-COHEN, M. D., SECRETARY.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

SESSIONS 1890-91.

The Autumn and Winter Sessions of the Post-Graduate Medical School opened on September 15. The Hospital is fully utilized for clinical purposes. There are ninety beds, including thirty for babies in the adjacent building. No Post-Graduate Medical School in this country can offer such opportunities for seeing important surgical and gynæcological operations under its own roof as does this institution. Besides, regular clinics, medical and surgical, are held by professors and instructors in those general and special hospitals with which they are connected, which comprises nearly all the great hospitals of the city. The dispensary of the school and other large dispensaries furnish ample means of instruction in every class of walking cases.

Instruction is given in every branch of medicine and surgery. The laboratory is large and well equipped. Surgical anatomy and operative surgery are thoroughly taught. The instruction is personal, the practitioner being brought in direct contact with the patient. No other courses in any department will be required if those to be had in the Post-Graduate School are taken. The faculty were the first in the United States to organize private courses for practitioners of medicine, and they pledge themselves to leave nothing undone to make graduates in medicine profit by the unrivalled clinical advantages of the City of New York.

For catalogue and schedule, address

FAIRCHILD'S
ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges.
Please mention this journal.

Wyeth's Beef Juice

A Liquid Preparation of the Choicest Beef, containing the Nutritious Albuminous Principles in an unaltered and soluble form.

Physicians have, for a long time, had their attention called to the fact that beef extracts, made by the LIEBIG process, are utterly devoid of the valuable and nutritious albuminous constituents of meat, as these are coagulated and filtered out in the process of manufacture. In consequence, the most advanced class of medical practitioners to-day, merely use the commercial extracts of meat as stimulants, and not for any nutritious properties they may possess. Realizing this fact, we have, after continued and exhaustive experiments, succeeded in preparing the article which we offer as WYETH'S BEEF JUICE, and for which we make the following claims:

FIRST.—That it contains all of the albuminous principles of beef in an active and soluble form. This may be proven by mixing a small portion of Beef Juice with an equal part of water in a test-tube or any convenient vessel, and gradually heating to the boiling point, when the albuminous principles will be coagulated.

SECOND.—That it contains the Hæmoglobin of the meat unaltered, as is evidenced by the bright arterial color of the preparation, and by the fact that it loses this color upon boiling, as the Hæmoglobin is precipitated with the albumen.

THIRD.—That it will be found upon trial to possess the nutritive properties of the choicest beef to a higher degree than any extract of meat yet offered to the profession.

Physicians will find WYETH'S BEEF JUICE of great value as a strengthening diet in cases of convalescence, consumption, nervous prostration, and similar diseases; also, in typhoid fever, debility, etc. Beef Tea prepared from it, contains more nourishment than any other liquid preparation of meat, and, when properly seasoned, is more grateful and appetizing to the patient. Professional men who are suffering from over-work, mental anxiety, etc., will find that one-half teaspoonful in about half a glass of iced water, taken at intervals during the day, and upon retiring, will relieve fatigue,—both of mind and body.

DIRECTIONS.—In cases of debility, nervous prostration, convalescence, etc., one-half to one teaspoonful in a half tumblerful of iced or luke-warm water.

CAUTION.—As the valuable albuminous elements are rendered insoluble by extreme heat, this preparation should only be mixed with iced or LUKE-WARM water, and never with water at the boiling point.

MANUFACTURED BY

JOHN WYETH & BROTHER,

PHILADELPHIA, PA.

Doctor:

You have often noticed that many patients, after a course of typhoid fever, erysipelas, diphtheria, and kindred diseases, undergo a long, tedious convalescence. For many weary weeks they sit around the house or drag their emaciated bodies feebly along. Their flame of life is so dim that it is easily puffed out by any slight indisposition or intercurrent malady that may chance to attack them, and hence we see so many *cured* cases become easy victims by the predisposition which their debility constitutes.

Now, what is the true condition in such a case as this?

Why, simply that in the febrile process immense hosts of the tissue cells have been consumed or carried away, and most of those remaining are worn out and only await a vigorous circulation to remove them and deposit healthy cells in their places.

In addition to the emaciation you notice that the tissues still left are flabby and apparently lifeless. The nutritive organs are so weakened that they are barely sufficient to maintain life without furnishing the required new material to carry on the process of repair. Thus the individual remains an easy prey to pathogenic influences which one in robust health can successfully resist.

Can anything be done for such cases?

Certainly.

But you would better leave them to the unassisted reparative powers of nature than to dose them with the irritant alleged "tonics" now so much in vogue. The organs of nutrition only want to be supplied with true cell and tissue food in an assimilable form.

This you will find in McArthur's Compound Syrup of the Hypophosphites of Lime and Soda. This is a CHEMICALLY PURE preparation, a quality so rare in Hypophosphite preparations. It is prepared in such a manner that the important ingredients go entirely to the rapid rebuilding of the tissues.

Give this to your convalescent patient and you will see a remarkable increase in flesh, strength and buoyancy of spirits. The convalescence will be greatly shortened, and in every way the Hypophosphites will prove to them to be a true Elixir of Life.

You can also make an enviable reputation for yourself by prescribing it in Phthisis and all Tubercular affections, Scrofula, Throat and Bronchial diseases, Nervous disorders and degenerations, and Fibroid Tumors.

Send for our pamphlet on "The Curability and Treatment of Consumption," (free), and a full size bottle of McArthur's Syrup, free, if you will agree to pay express charges.

McARTHUR HYPOPHOSPHITE CO.,

BOSTON, MASS.

IN GYNÆCOLOGICAL PRACTICE

For Sub-Involution, Congestive Dysmenorrhœa, Chronic Metritis, &c.

AS AN INJECTION

For Hemorrhoids, Relaxation of Sphincter, Prolapsus of Rectum, &c.

AS A LOCAL APPLICATION

For Congestion of Mucous Membranes as in Conjunctivitis, Cervicitis, Pharyngitis, Gonorrhœa, &c.

HYPODERMICALLY

Or by the mouth, for Aneurisms, Dilatation of Heart, Acute and Chronic Dysentery, Hæmoptysis, Hæmaturia and other Hemorrhages; Chronic Arteritis, Incontinence, Spermatorrhœa, Varicocele, Varicose Veins, Diabetes Insipidus; with the Bromides for Spinal Meningitis, Acute Myelitis and Congestion of Meninges and Cord, and in obstetric practice, especially when Post-Partum Hemorrhage is threatened,

ERGOTOLE S.&D.'s

has been most successfully employed. When given hypodermically, more prompt action and the best results are usually obtained.

Ergotole is a new preparation of Ergot of Rye. It is specially made for hypodermic use by a new process; representing all the active principles of Ergot in a very concentrated form, and entirely freed from all inert and irritating constituents.

It causes neither pain nor abscess, and **keeps perfectly without precipitation for any length of time.** It has been extensively tried in hospital and private practice, hypodermically and administered by the mouth, proving uniformly efficacious, and it has been pronounced

THE MOST EFFICIENT PREPARATION OF ERGOT IN USE

One minim representing the full therapeutic strength of about 2½ grains of the best Spanish Ergot. Administered by the mouth, it will prove itself divested of all irritating and nauseating properties, which are so objectionable in the officinal fluid extract.

An eminent physician of Baltimore states that he has had uniform and satisfactory results in over fifty cases of various diseases from a supply of our Ergotole, which was prepared over two years ago, and kept in a cork-stopped bottle partially filled.

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

NEURALGIAS

PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections*."

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

DOSE—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious Elixir, **QUINA-LAROCHE**, is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous Elixir contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

ESTABLISHED 1855.

DRS. STRONG'S SANITARIUM,

SARATOGA SPRINGS, NEW YORK,

Receives persons recommended to it by their home physicians for Treatment, Change, Rest or Recreation, and places them under well-regulated hygienic conditions so helpful in the treatment of chronic invalids or the overtaxed.

For Treatment: In addition to the ordinary remedial agents, it employs Turkish, Russian, Roman, Sulphur, Electro-Thermal, the French Douche (Charcot's), and all Hydropathic Baths; Vacuum Treatment, Swedish Movements Massage, Pneumatic Cabinet, Inhalations of Medicated, Compressed, and Rarefied Air, Electricity in various forms, Thermo-Cautery, Calisthenics, and Saratoga Waters, under the direction of a staff of educated physicians.

For Change: This Institution is located in a phenomenally dry, tonic, and quiet atmosphere, in the lower arc of the Adirondack Zone, and within the "Snow Belt."

For Rest: The Institution offers a well-regulated, quiet home, heated by steam and thoroughly ventilated, with cheering influences and avoiding the depressing atmosphere of invalidism.

For Recreation: To prevent introspection, are household sports at all seasons of the year, and in Winter, tobogganning, elegant sleighing etc.; in Summer, croquet, lawn-tennis, etc.

Private professional references furnished upon application. Physicians are invited to inspect the Institution at their convenience. A liberal discount to physicians and their families.

For further information, address,

WALNUT LODGE HOSPITAL,

HARTFORD, CONN.

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

Books for our Subscribers.

WHAT IS THOUGHT OF THEM.

HEATH'S DICTIONARY OF PRACTICAL SURGERY.

C. B. Porter, M. D., Boston, Mass., says: "A most excellent book for the library of the surgeon, and especially for the country practitioner; as a book of reference it is so concise and at the same time so complete."

N. Senn, M. D., College of Physicians and Surgeons, Milwaukee, says; "As a means of ready reference for the student and busy practitioner this book stands unexcelled."

Prof. E. H. Gregory, St. Louis Medical College, St. Louis, says: "I have examined the book, and find it a most valuable addition to my library. I am sure it will meet the favor of the surgical profession."

LEIDY'S HUMAN ANATOMY.

The Lancet-Clinic, Cincinnati, O., says: "Professor Leidy again presents to medical practitioners and students a treatise on human anatomy that at once commands the attention and admiration of all who are at all familiar with the subject. Most of the plates are original, and in common with the text are very beautiful to behold. The work is a complete illustration of the method of teaching anatomy adopted by a leading scientist, and one of America's best known professors of anatomy. This is one of the books that should be in the library of every practitioner of medicine and surgery."

The Medical Advance, Ann Arbor, Mich., says: "The student can master and retain a practical knowledge of anatomy in a shorter time and with less hard work from this text-book than from any other work extant, and it has been our privilege to teach anatomy for several years."

BYFORD'S DISEASES OF WOMEN.

The Boston Medical and Surgical Journal says: "It is a satisfaction to observe the discussion of certain topics which are often neglected by writers, notably of the sympathetic symptoms of organs apparently disconnected with the uterus, for which he will receive the thanks of the younger members of the profession. Another topic very widely treated is that of Constipation in its relation to uterine diseases. All the other topics which should have a place in a work of this kind have been fully and properly treated."

The Cincinnati Lancet-Clinic says: "The book is eminently practical and instructive. Its suggestions for treatment are well up with the times, mostly judicious, conservative, and valuable, and the whole amply repays for thorough perusal."

The St. Louis Courier of Medicine says: "The work of a representative Western practitioner and professor, and is a thoroughly practical work."

The Virginia Medical Monthly says: "We take pleasure in recommending it to every student and physician desirous of obtaining a standard work on Gynæcology."

The Chicago Medical Journal and Examiner says: "The chapter on puberty should be carefully studied by every physician, teacher, and mother in the land. . . . Its style is clear, but concise, and always practical, and shows the author to be, as we all know, an experienced teacher. The work as a whole is most valuable, both to the student and practitioner."

Gaillard's Medical Journal says: "It is replete with good judgment, broad and practical views. . . . The illustrations are excellent."

FOWLER'S DICTIONARY OF PRACTICAL MEDICINE.

The Medical News says: "For those who do not wish to purchase the much larger book of Quain, or who wish comparatively recent information concerning medical subjects in a somewhat narrow space, the book will certainly prove of value, and we heartily recommend it as one which will give a full return for the money invested in the purchase."

The London Lancet says: "What the writers know they tell simply and plainly, and generally manage to put it in a short compass, and, what is more, the treatment that is recommended is clearly and sufficientiy set forth. . . . We can heartily congratulate the editor and his colleagues on having admirably fulfilled their purpose, viz., to produce a first-rate dictionary of medicine, at once scientific and practical, which well deserve the success we have no doubt it will meet with."

JACOBSON'S OPERATIONS OF SURGERY.

The Medical and Surgical Reporter says: "This handsome book is one of the most admirable works on operative surgery which we have seen for a long time. The author has brought to its preparation a large observation and experience, and a very thorough acquaintance with the methods of other surgeons. His book is comprehensive and his directions are clear and reliable. It is gratifying to an American reader to find that full justice is done to the work of American surgeons by Mr. Jacobson, and that his book bears no marks of the distance which stretches between his land and ours. This is as it should be, and is no less an element in the excellence of the technical worth of his book than it is an evidence of the cosmopolitan character of good scientific work."

CAZEAUX & TARNIER'S MIDWIFERY. With Appendix by MUNDÉ.

The Memphis Medical Monthly says: "Cazeaux's Obstetrics was authority during our student life, and has been generally recognized as authority from the publication of the first edition to the present. We cannot do more than to fully endorse the following from the pen of T. Gallard Thomas, M. D; 'I have examined the last edition of Cazeaux & Tarnier's Theory and Practice of Obstetrics, and pronounce it practical, and just what is needed by every practitioner. I highly recommend the work. This work should be prominent in every library.'"

Dr. Wm. L. Lusk says: "Cazeaux's Midwifery will always remain an inexhaustible mine of information, and I rejoice to see it once more accessible to the profession in a new and attractive dress."

Dr. Wm. Goodell says: "I deem Cazeaux & Tarnier's Obstetrics the best yet published."

The Denver Medical Times says; "It is needless to say anything in praise of this work. Cazeaux's Obstetrics is a classical work, and Tarnier is one of the best known French writers on Obstetrics. The whole has been brought up to date by the appendix of Prof. Mundé, and altogether it makes a very complete and practical treatise on the subject, unsurpassed if not unequalled by any work with which we are acquainted. Especially valuable are the signs of delivery in the dead body and of live and still-births. The chapter on antisepsis and on puerperal septicemia are also worthy of mention."

THOMAS'S MEDICAL DICTIONARY.

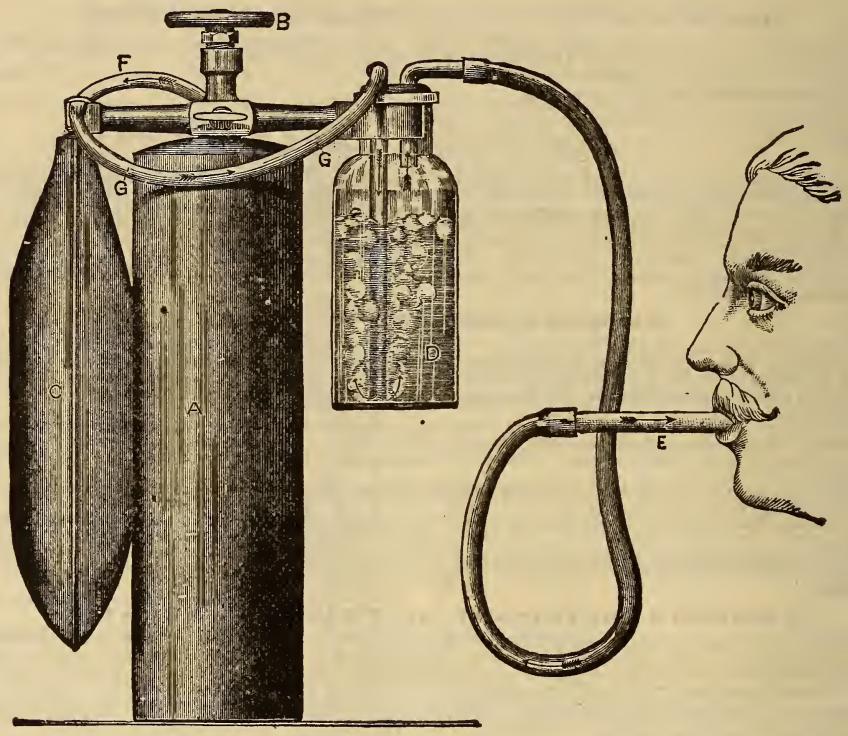
Prof. A. F. Patton, College of Physicians and Surgeons, Boston, Mass., says: "It is just the book for a medical or any other student, and it should be in the office of every physician. This dictionary supplies a place that has never been filled. I have looked it through and find all the new words that I have sought."

The St. Joseph Medical Herald says: "No better testimonial to the value of the work can be given than the following from Dr. J. Gibbon Hunt, the distinguished microscopist: 'To me the work is invaluable. I am astonished at its fullness of all recent words which the modern advance of medical science has introduced. Of course, I cannot conceive the learning and great labor which could edit such a complete, thorough, and admirable volume.' We can add nothing further save that the book should be in the hands of every physician and every student in the land."

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE BEST ANTISEPTIC

FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S

SOLUBLE HYPODERMIC TABLETS.

Are prepared in the same manner as our Tablet Triturates. Are not compressed. Are, therefore, more soluble. Are carefully prepared, and each Tablet contains the exact quantity of medicament indicated on the label. A reliable solution of any required strength can be made, when desired, by dissolving in a definite quantity of water. Will keep indefinitely in any climate. Very friable, and, therefore, put up in tubes, each containing 25 tablets. Four tubes in a box.

FRENCH'S TABLET TRITURATES.

RECOMMENDED FOR PORTABILITY AND CONVENIENCE.

Made from the purest materials and in the most careful manner. The material is thoroughly subdivided, and each tablet contains exactly the amount of medicament indicated on the label. Made firm enough to retain their form, but sufficiently friable to yield to the slightest pressure. Can be administered in powder form, if desired.

Put up in bottles of 100 and 500.

Our laboratory is in charge of PROFESSOR F. G. RYAN, of the Philadelphia College of Pharmacy, who has able assistants.

Send for our new price-list with formulæ for Compressed Pills, Lozenges, Hypodermic Tablets, Tablet Triturates, etc.

FRENCH, RICHARDS & CO., PHILADELPHIA.

AN ENTERING WEDGE.

THE STANDARD COCOA OF THE WORLD.

The Messrs. VAN HOUTEN have put an entering wedge into unhealthy domestic economy, by advertising a pure, soluble cocoa, as a substitute for tea and coffee. As inventors and original patentees of cocoa, the VAN HOUTEN's have introduced it so thoroughly all over Europe that "VAN HOUTEN's COCOA" has become a household word. The end of the wedge which has been inserted here is fast making way for the "LEADING Cocoa of America."

"This is an Age of Apollinaris Water."—Walter Besant.

Apollinaris

"THE QUEEN OF TABLE WATERS."

"Familiar in millions of mouths as any household word.

"The popularity of Apollinaris Water is chiefly due to its irreproachable character.

"More wholesome than any aerated water which art can supply."—THE TIMES, LONDON.

"Of late years the Queen, by the advice of Sir William Jenner, has usually taken Apollinaris Water."—THE WORLD, LONDON.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

FRAUD.

Unscrupulous parties are selling an inferior Wine, calling it Royal Tokay, thus profiting by the numberless Medical Editorials written about our genuine product. The Wine cannot be used as a substitute for ours, and many physicians have unjustly blamed us for damage done, imagining they were securing our Wine, which they had already tested with complete satisfaction. Your patients will not secure the Wine you prescribe unless you specify CALVICO TOKAY, by which name it will hereafter be known.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One Teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Where Women have miscarried during previous pregnancies, or in any case where miscarriage is feared, ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used,

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

The above preparations are prepared exclusively for Physicians' Prescriptions, and a sample of each or all of them will be sent to any Physician who wishes to test them, if he will pay the Express Charges.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ.

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{60}$ gr.), Atropiæ Sulph. ($\frac{1}{600}$ gr.), Codeia ($\frac{1}{10}$ gr.), Antimony Tart. $\frac{1}{25}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis, fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{60}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen, lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice, MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

LIQUOR SANTAL FLAV.

CUM

BUCHU ET CUBEBA.

(ORIGINAL FORMULA.)

This elegant preparation has been very successfully used in the treatment of long-standing Gonorrhœa and chronic Gleet.

If given in the early stages of Gonorrhœa, it will usually arrest the progress of the disease.

It is especially effective in all inflammations of genito-urinary mucous membranes.

It is perfectly miscible in water. Dose, f℥i to f℥ij, three times a day in water or milk. When prescribing, please specify Liq. Santal Flav. cum Buchu et Cubeba (Ogden's).

JOHN OGDEN,

CHEMIST,

WALNUT & THIRTEENTH STREETS,

PHILADELPHIA.

TERTIARY SYPHILIS.

"Your preparation, **IODIA**, is an excellent alterative, and is the most agreeable of any preparation of Iod. Potas., as it does not cause the cramps in stomach, which are often intolerable.

"I have employed **IODIA** in two cases of Tertiary Syphilis, in which, after five weeks' treatment, the manifestations disappeared.

"In a case of Syphiltic Eczema it was also successful. —Dr. Sam Petiteau, Garches, France, Nov. 10, 1890.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH.

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,
SOLOMON SOLIS-COHEN, M.D., SECRETARY.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

SESSIONS 1890-91.

The Autumn and Winter Sessions of the Post-Graduate Medical School opened on September 15. The Hospital is fully utilized for clinical purposes. There are ninety beds, including thirty for babies in the adjacent building. No Post-Graduate Medical School in this country can offer such opportunities for seeing important surgical and gynæcological operations under its own roof as does this institution. Besides, regular clinics, medical and surgical, are held by professors and instructors in those general and special hospitals with which they are connected, which comprises nearly all the great hospitals of the city. The dispensary of the school and other large dispensaries furnish ample means of instruction in every class of walking cases.

Instruction is given in every branch of medicine and surgery. The laboratory is large and well equipped. Surgical anatomy and operative surgery are thoroughly taught. The instruction is personal, the practitioner being brought in direct contact with the patient. No other courses in any department will be required if those to be had in the Post-Graduate School are taken. The faculty were the first in the United States to organize private courses for practitioners of medicine, and they pledge themselves to leave nothing undone to make graduates in medicine profit by the unrivalled clinical advantages of the City of New York.

For catalogue and schedule, address

GARDNER'S

SYRUP OF HYDRIODIC ACID,

Introduced in 1878 by R. W. GARDNER.

The Reputation which Hydriodic Acid has Attained During the past Eleven Years was Won by this Preparation.

Numerous Imitations prepared differently, and weaker in Iodine, are offered, from the use of which the same therapeutic effects cannot be obtained.

Caution.—Use no Syrup of Hydriodic Acid which has turned red. This shows decomposition and free Iodine. In this state it acts as an irritant and fails to produce desirable results.

Unprincipled apothecaries substitute imitations when Gardner's Syrup is prescribed, and physicians, failing to get desirable and promised results, attribute the fault, unjustly, to Gardner's Syrup.

THERAPEUTIC INDICATIONS.

Hay Fever; Rose Cold; Poisoning by Lead, Mercury or Arsenic; Acute and Chronic Rheumatism; Asthma; Chronic Bronchitis; Catarrh; Congestion of Lungs in Children; Adenitis; Eczema; Lupus; Chronic Malarial Poisoning; Lumbago; Acute Pneumonia; Psoriasis; Scrofulous Diseases; Goitre; Enlarged Glands; Cold Abscesses; Indolent Sores; Excessive Fat; Fatty Degeneration of the Heart; to absorb non-malignant Tumors; and in the latter stages of Syphilis; Syphilitic Phthisis.

Details of treatment furnished physicians upon application to undersigned without charge.

Gardner's Chemically Pure Syrups of Hypophosphites.

Embracing the separate Syrups of Lime, of Soda, of Iron, of Potassa, of Manganese, and an Elixir of the Quinia Salt; enabling physicians to accurately follow Dr. Churchill's method, by which thousands of authenticated cases of Phthisis have been cured. The only salts, however, used by Churchill in Phthisis are those of Lime, of Soda, and of Quinia, and always separately according to indications,—never combined.

The reason for the use of single Salts is because of antagonistic action of the different bases, injurious and pathological action of Iron, Potassa, Manganese, etc., in this disease.

These facts have been demonstrated by thirty years' clinical experience in the treatment of this disease exclusively, by Dr. Churchill, who was the first to apply these remedies in Medical practice. Modified doses are also required in this disease; seven grains during twenty-four hours being the maximum dose in cases of Phthisis, because of increased susceptibility of the patient to their action, the danger of producing toxic symptoms (as hemorrhage, rapid softening of tubercular deposit, etc.), and the necessity that time be allowed the various functions to recuperate simultaneously; over-stimulation, by pushing the remedy, resulting in crisis and disaster.

A pamphlet of sixty-four pages, devoted to a full explanation of these details and others, such as contra-indicated remedies, indications for the use of each hypophosphite, reasons for the use of absolutely pure Salts, protected in Syrup from oxidation, etc., mailed to physicians without charge upon application to

R. W. GARDNER, 158 William St., N. Y. City.

ESTABLISHED 16 YEARS. BEWARE OF IMITATIONS.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE.

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, "**With Iron, No. 1;**" while the same preparation, **Without Iron,** is designated on the label as "**No. 2.**"

In prescribing this preparation, physicians should be particular to mention "*COLDEN'S,*" viz., "*Ext. Carnis Fl. Comp. (Colden).*" A Sample of **COLDEN'S BEEF TONIC** will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

FELLOWS'
HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

CH. MARCHAND'S

PEROXIDE OF HYDROGEN

(MEDICINAL) H_2O_2 (Absolutely Harmless.)

Is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a Nostrum.

A REMEDY FOR DIPHTHERIA; CROUP; SORE THROAT,
AND ALL INFLAMMATORY DISEASES OF THE THROAT.

OPINION OF THE PROFESSION.

Dr. E. R. Squibb, of Brooklyn, writes as follows in an article headed "On the Medical Uses of Hydrogen Peroxide (*Gaillard's Medical Journal*, March, 1889, p. 267), read before the Kings County Medical Association, February 5, 1889:

"Throughout the discussion upon diphtheria very little has been said of the use of the Peroxide of Hydrogen, or hydrogen dioxide; yet it is perhaps the most powerful of all disinfectants and antiseptics, acting both chemically and mechanically upon all excretions and secretions, so as to thoroughly change their character and reactions instantly. The few physicians who have used it in such diseases as diphtheria, scarlatina, small-pox, and upon all diseased surfaces, whether of skin or mucous membrane, have uniformly spoken well of it so far as this writer knows, and perhaps the reason why it is not more used is that it is so little known and its nature and action so little understood. . . . Now, if diphtheria be at first a local disease, and be auto-infectious; that is, if it be propagated to the general organism by a contagious virus located about the tonsils, and if this virus be, as it really is, an albuminoid substance, it may and will be destroyed by this agent upon a sufficient and a sufficiently repeated contact. . . . A child's nostrils, pharynx and mouth may be flooded every two or three hours, or oftener, from a proper spray apparatus with a two volume solution without force, and with very little discomfort; and any solution which finds its way into the larynx or stomach is beneficial rather than harmful, and thus the effect of corrosive sublimate is obtained without its risks or dangers. . . ."

Further on Dr. Squibb mentions that CHARLES MARCHAND is one of the oldest and best makers of Peroxide of Hydrogen, and one who supplies it to all parts of the country.

CAUTION.—By specifying in your prescriptions "**Ch. Marchand's Peroxide of Hydrogen (Medicinal),**" which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon. Never sold in bulk.

PREPARED ONLY BY

Charles Marchand

Chemist and Graduate of the "Ecole Centrale des Arts et Manufactures de Paris" France.

A book containing full explanations concerning the therapeutical applications of both CH. MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) and GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application. ☞ Mention this publication.

New Remedies and New Combinations.

Pil. Phenacetine et Caffeiæ Citrat., W. H. S. & Co.

Phenacetine-Bayer,	3 grs.
Caffeiæ Citrat.,	1½ grs.

Recommended in cases of Migraine and Nervous Headaches.

Pil. Phenacetine et Salol, 5 grs., W. H. S. & Co.

Phenacetine-Bayer,	2½ grs.
Salol,	2½ grs.

Suggested by Dr. M. F. Price as an anti-rheumatic and analgesic. He says: "I have lately used Phenacetine largely, and have not been disappointed in its action, particularly as an analgesic. I have used it in nearly all cases of pains, especially neuralgic. I have learned to so thoroughly trust it to relieve pain that I often prescribe it without a searching inquiry into the character of the pain. A patient says, 'I have headache,' and I order Phenacetine with confidence, and always with a report of relief."

"It will be observed that in some of these cases I have combined Salol with Phenacetine. I did this on the principle of the well-known effect of Salicylic Acid in Rheumatism, but I rely on the Phenacetine for the relief of the pain, and in this way, perhaps, the cure of the disease causing it."—*Southern California Practitioner.*

Pil. Phencetine et Salol, W. H. S. & Co., ½ strength.

Phenacetine-Bayer,	1¼ grs.
Salol,	1¼ grs.

Pil. Arsenici Sulphidi, 1-100 gr., W. H. S. & Co.

Dr. McLaughlin (Am. Med. Ass'n) finds Sulphide of Arsenic to be tolerated by the stomach better than arsenic in other forms. He gives it in the crude form (Realgar, As 2S2) in granules of 1-100 grain (0.0006 gramme) "ordered from Schieffelin & Co., of New York." In one patient who had suffered from psoriasis more or less for twenty years it was of great service. The eruption was on the arms, back, head, and forehead; his hands were covered with fissures, which bled when the fingers were extended; the nails were black and roughened. One granule increased to 8 granules, t. i. d., in mouth caused the fissures to heal. The face and hands were practically well. The drug was stopped for one week, when the eruption spread very rapidly. The granules were again given and improvement followed in a few days. The general health improved rapidly. In acne and eczema he has obtained satisfactory results. In every case the patient was unaware that arsenic was being administered.—*Journal Am. Med. Ass'n.*

Tablets Sulfonal et Phenacetine, 15 grs., W. H. S. & Co.

Sulfonal-Bayer,	10 grs.
Phenacetine-Bayer,	5 grs.

Tablets Sulfonal et Phenacetine, 7½ grs., W. H. S. & Co.

Sulfonal-Bayer,	5 grs.
Phenacetine-Bayer,	2½ grs.

170 and 172 William Street,

NEW YORK.

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

Price, $2.00 per bottle.

Send for copy of our Hand-Book of Pharmacy and Therapeutics. Useful for reference and contains much valuable information.

PIL. APHRODISIACA

(LILLY.)

Phosphorus and **Nux Vomica**, as is well known to the profession, act as powerful tonics to the nervous system, especially the spinal cord, and can be relied upon as possessing real aphrodisiac power The **Damiana** used is the genuine **Turnera Aphrodisiaca.** By our process for the manufacture of **Phosphorus Pills**, a thorough subdivision of phosphorus in the mass is obtained, and, with a coating perfectly **protecting** it from **oxidation**, there is nothing to be desired. It is necessary that the administration of this pill be continued from **three to four weeks**, or until the **system is thoroughly under the influence of the remedy.** It is indicated in **mental overwork, sexual debility, impotency.** It is decidedly beneficial in cases of **nocturnal emissions**, the result of excesses, **mental apathy**, or indifference, and in an **enfeebled condition of the general system**, with **weakness or dull pain in the lumbo sacral region.** In diseases of the **reproductive organs** of the female, and especially of the uterus, it is one of our most valuable agents, acting as a **uterine tonic**, and gradually removing abnormal conditions, while at the same time, it imparts tone and vigor; hence, it is of value in **Leucorrhea, Amenorrhea, Dysmenorrhea,** and to remove the tendency to repeated miscarriages.

Obtain only in original package. Oval pink pills.

One Hundred Mailed on Receipt of $1.00.

LAPACTIC PILLS, S. & D.'s.

(PILULÆ LAPACTICÆ.)

Aloin	1-4 gr.
Strychnine	1-60 gr.
Ext. Belladonna	1-8 gr.
Ipecac	1-16 gr.

An elegant and most efficient combination **introduced by us** and found in practice to possess superior advantages over similar formulæ for the relief of

HABITUAL CONSTIPATION, ATONIC DYSPEPSIA, BILIARY ENGORGEMENT AND MANY GASTRIC DISORDERS.

☞ **Since we introduced our Lapactic Pills**—some four years ago—a number of manufacturers have adopted the same formula and have furnished these pills under the same name. Should Physicians fail to obtain satisfactory results from Lapactic Pills not of our make (and we have received a large number of such complaints), we shall be glad to furnish a sample of our Lapactic Pills on application. We feel confident that they will fully substantiate our claims.

Please use the term **"Lapactic Pills, S. & D.'s"** when prescribing these pills.
Dose: One to two pills when going to bed.

PAN-PEPTIC TABLETS, S. & D.'s.

A TONIC DIGESTIVE.

Pure Pepsin	1 gr.
Pure Pancreatin	1 gr.
Pure Caffeine	¼ gr.
Acid Lacto-Phosphate of Calcium.	
Celery.	

The **Pepsin** and **Pancreatin** used in these tablets possess highest digestive power, and cannot fail to promptly start and accomplish

THE DIGESTION OF FOOD.

Whilst the **Caffeine,** by its stimulant tonic action on stomach and bowels, assists and quickens the normal digestion and assimilation of food, the **Acid Lacto-Phosphate of Calcium** contributes to the tonic action of the tablets, and aids to build up the general system, and a small quantity of that refreshing aromatic nerve stimulant, **Celery,** imparts a pleasant flavor and acts as an appetizer.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the three Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

TERTIARY SYPHILIS.

"Your preparation, **IODIA**, is an excellent alterative, and is the most agreeable of any preparation of Iod. Potas., as it does not cause the cramps in stomach, which are often intolerable.

"I have employed **IODIA** in two cases of Tertiary Syphilis, in which, after five weeks' treatment, the manifestations disappeared.

"In a case of Syphiltic Eczema it was also successful. —Dr. Sam Petiteau, Garches, France, Nov. 10, 1890.

Books for our Subscribers.

WHAT IS THOUGHT OF THEM.

HEATH'S DICTIONARY OF PRACTICAL SURGERY.

C. B. Porter, M. D., Boston, Mass., says; "A most excellent book for the library of the surgeon, and especially for the country practitioner; as a book of reference it is so concise and at the same time so complete."

N. Senn, M. D., College of Physicians and Surgeons, Milwaukee, says; "As a means of ready reference for the student and busy practitioner this book stands unexcelled."

Prof. E. tr. Gregory, St. Louis Medical College, St. Louis, says: "I have examined the book, and find it a most valuable addition to my library. I am sure it will meet the favor of the surgical profession."

LEIDY'S HUMAN ANATOMY.

The Lancet-Clinic, Cincinnati, O., says: "Professor Leidy again presents to medical practitioners and students a treatise on human anatomy that at once commands the attention and admiration of all who are at all familiar with the subject. Most of the plates are original, and in common with the text are very beautiful to behold. The work is a complete illustration of the method of teaching anatomy adopted by a leading scientist, and one of America's best known professors of anatomy. This is one of the books that should be in the library of every practitioner of medicine and surgery."

The Medical Advance, Ann Arbor, Mich., says: "The student can master and retain a practical knowledge of anatomy in a shorter time and with less hard work from this text-book than from any other work extant, and it has been our privilege to teach anatomy for several years."

BYFORD'S DISEASES OF WOMEN.

The Boston Medical and Surgical Journal says: "It is a satisfaction to observe the discussion of certain topics which are often neglected by writers, notably of the sympathetic symptoms of organs apparently disconnected with the uterus, for which he will receive the thanks of the younger members of the profession. Another topic very widely treated is that of Constipation in its relation to uterine diseases. All the other topics which should have a place in a work of this kind have been fully and properly treated."

The Cincinnati Lancet-Clinic says: "The book is eminently practical and instructive. Its suggestions for treatment are well up with the times, mostly judicious, conservative, and valuable, and the whole amply repays for thorough perusal."

The St. Louis Courier of Medicine says: "The work of a representative Western practitioner and professor, and is a thoroughly practical work."

The Virginia Medical Monthly says: "We take pleasure in recommending it to every student and physician desirous of obtaining a standard work on Gynæcology."

The Chicago Medical Journal and Examiner says: "The chapter on puberty should be carefully studied by every physician, teacher, and mother in the land. . . . Its style is clear, but concise, and always practical, and shows the author to be, as we all know, an experienced teacher. The work as a whole is most valuable, both to the student and practitioner."

Gaillard's Medical Journal says: "It is replete with good judgment, broad and practical views. . . . The illustrations are excellent."

FOWLER'S DICTIONARY OF PRACTICAL MEDICINE.

The Medical News says: "For those who do not wish to purchase the much larger book of Quain, or who wish comparatively recent information concerning medical subjects in a somewhat narrow space, the book will certainly prove of value, and we heartily recommend it as one which will give a full return for the money invested in the purchase."

The London Lancet says: "What the writers know they tell simply and plainly, and generally manage to put it in a short compass, and, what is more, the treatment that is recommended is clearly and sufficientiy set forth. . . . We can heartily congratulate the editor and his colleagues on having admirably fulfilled their purpose, viz., to produce a first-rate dictionary of medicine, at once scientific and practical, which well deserve the success we have no doubt it will meet with."

JACOBSON'S OPERATIONS OF SURGERY.

The Medical and Surgical Reporter says: "This handsome book is one of the most admirable works on operative surgery which we have seen for a long time. The author has brought to its preparation a large observation and experience, and a very thorough acquaintance with the methods of other surgeons. His book is comprehensive and his directions are clear and reliable. It is gratifying to an American reader to find that full justice is done to the work of American surgeons by Mr. Jacobson, and that his book bears no marks of the distance which stretches between his land and ours. This is as it should be, and is no less an element in the excellence of the technical worth of his book than it is an evidence of the cosmopolitan character of good scientific work."

CAZEAUX & TARNIER'S MIDWIFERY. With Appendix by MUNDÉ.

The Memphis Medical Monthly says: 'Cazeaux's Obstetrics was authority during our student life, and has been generally recognized as authority from the publication of the first edition to the present. We cannot do more than to fully endorse the following from the pen of T. Gallard Thomas, M. D; 'I have examined the last edition of Cazeaux & Tarnier's Theory and Practice of Obstetrics, and pronounce it practical, and just what is needed by every practitioner. I highly recommend the work. This work should be prominent in every library.'"

Dr. Wm. L. Lusk says: "Cazeaux's Midwifery will always remain an inexhaustible mine of information, and I rejoice to see it once more accessible to the profession in a new and attractive dress.'

Dr. Wm. Goodell says: "I deem Cazeaux & Tarnier's Obstetrics the best yet published."

The Denver Medical Times says; "It is needless to say anything in praise of this work. Cazeaux's Obstetrics is a classical work, and Tarnier is one of the best known French writers on Obstetrics. The whole has been brought up to date by the appendix of Prof. Mundé, and altogether it makes a very complete and practical treatise on the subject, unsurpassed if not unequalled by any work with which we are acquainted. Especially valuable are the signs of delivery in the dead body and of live and still-births. The chapter on antisepsis and on puerperal septicemia are also worthy of mention."

THOMAS'S MEDICAL DICTIONARY.

Prof. A. F. Patton, College of Physicians and Surgeons, Boston, Mass., says: "It is just the book for a medical or any other student, and it should be in the office of every physician. This dictionary supplies a place that has never been filled. I have looked it through and find all the new words that I have sought."

The St. Joseph Medical Herald says: "No better testimonial to the value of the work can be given than the following from Dr. J. Gibbon Hunt, the distinguished microscopist: 'To me the work is invaluable. I am astonished at its fullness of all recent words which the modern advance of medical science has introduced. Of course, I cannot conceive the learning and great labor which could edit such a complete, thorough, and admirable volume.' We can add nothing further save that the book should be in the hands of every physician and every student in the land."

ABOUT GAS TREATMENT.

We make and sell oxygen and nitrogen monoxide for therapeutic use, and we guarantee them pure. They are put up in compact form. (A cylinder containing 100 gallons of nitrogen monoxide or 40 gallons of oxygen measures 12 inches in length, has a diameter of 3½ inches, and weighs 10½ lbs. A cylinder containing 450 gallons of nitrogen monoxide or 100 gallons of oxygen measures 25 inches in length, has a diameter of 4½ inches, and weighs 34 lbs.)

INSOMNIA. Dr. Allan McLane Hamilton states that nitrogen monoxide, N_2O (nitrous oxide of the old nomenclature) has no equal in the treatment of this difficulty.

MELANCHOLIA. A short course of nitrogen monoxide is said to change the face of nature for such patients.

ANÆMIA. Where iron is not tolerated or proves inefficient, the addition of oxygen or a combination of oxygen and nitrogen monoxide has proven very beneficial.

For those who should, but cannot, go from home for rest or a change of air, or for those who, from any cause fail to get air enough into their lungs, the inhalation of one or other of these gases, or both in combination, promises great benefit. The testimony is that in cases of

ASTHMA, more than fifty per cent. of the cases yield to oxygen treatment, others are very greatly relieved, and a very small per cent. are not improved.

INDIGESTION and CONSTIPATION are said to be greatly relieved and very often conquered by continued treatment.

A highly esteemed New York physician has used more than twenty thousand gallons of nitrogen monoxide in his private practice. The letters received from his patients, largely from those who were afflicted with nervous disorders, are enthusiastic in their testimony as to the benefit received.

Regular practitioners who are using gas treatment testify that when *pure* oxygen and *pure* nitrogen monoxide, or a mixture of these, is used, no therapeutic agents are more uniformly successful when intelligently prescribed.

For descriptive circulars, and term for gas outfits, address

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC. PROPHYLACTIC. DEODORANT.

LISTERINE

NON-TOXIC. NON-IRRITANT. NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S
LITHIATED HYDRANGEA
KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

FRENCH'S FLUID EXTRACTS

Are prepared from carefully selected crude drugs, ground in mills on our own premises. The most scientific and recent methods are used. Careful consideration is given as to the best menstruum for each drug. Each fluid ounce of our fluid extracts represents one troy ounce of the drug, minim for grain. Strength, dose, and formula given on the label.

FRENCH'S COMPRESSED MEDICINAL LOZENGES.

OFFICINAL LOZENGES OF THE U. S. PHARMACOPŒIA, 1880

FORMULÆ SUGGESTED BY DR. MORELL MACKENZIE.

(Made with black and red currant paste.)

FRENCH'S COMPRESSED UNOFFICINAL LOZENGES.

FRENCH'S COMPRESSED MEDICATED LOZENGES.

(SPECIAL FORMULÆ.)

Our laboratory is in charge of Professor F. G. RYAN, of the Philadelphia College of Pharmacy, who has able assistants.

Send for our new price-list with formulæ for Compressed Pills, Lozenges, Hypodermic Tablets, Tablet Triturates, etc.

FRENCH, RICHARDS & CO., PHILADELPHIA.

A MENSTRUUM.

HORSFORD'S ACID PHOSPHATE.

THIS preparation has been found especially serviceable as a menstruum for the administration of such alkaloids as morphine, quinine, and other organic bases which are usually exhibited in acid combination.

The admixture with pepsin has been introduced with advantage when indicated.

The Acid Phosphate does not disarrange the stomach, but, on the contrary, promotes in a marked degree the process of digestion.

Dr. R. S. MILES, Glencoe, Minn., says: "I use it in a great many cases as a menstruum for quinine, when an acid is necessary."

Send for descriptive circular. Physicians who wish to test it will be furnished a bottle on application, without expense, except express charges.

Prepared under the direction of Prof. E. N. HORSFORD, by the

Rumford Chemical Works, Providence, R. I.

BEWARE OF SUBSTITUTES AND IMITATIONS.

CAUTION:—Be sure the word "Horsford's" is printed on the label. All others are spurious. Never sold in bulk.

FRELIGH'S TABLETS,

(Cough and Constituent),

FOR THE PREVENTION AND CURE OF

PULMONARY PHTHISIS.

FORMULÆ.

Cough Tablets.

EACH TABLET CONTAINS.

Morph. Sulph. ($\frac{1}{50}$ gr.), Atropiæ Sulph. ($\frac{1}{500}$ gr.), Codeia ($\frac{1}{10}$ gr.), Antimony Tart $\frac{1}{25}$ gr.), Ipecac, Aconite, Pulsatilla, Dulcamara, Causticum, Graphite, Rhus-tox, and Lachesis, fractionally so arranged as to accomplish every indication in any form of cough.

Constituent Tablets.

EACH TABLET CONTAINS.

Arsenicum ($\frac{1}{10}$ gr.), Precipitate Carb. of Iron, Phos. Lime, Carb. Lime, Silica, and the other ultimate constituents, according to physiological chemistry (normally) in the human organism, together with Caraccas. Cocoa and Sugar.

PRICE, THREE DOLLARS PER DOUBLE BOX.

Containing sufficient Tablets of each kind to last from one to three months according to the condition of the patient.

SPECIAL OFFER.

While the above formulæ have been in use, in private practice, over 30 years, and we could give testimonials from well-known clergymen lawyers and business men, we prefer to leave them to the unbiased judgment of the profession with the following offer: On receipt of 50 cents, and card, letter-head, bill-head, or other proof that the applicant is a physician in active practice, we will send, delivered, charges prepaid, one of the regular (double) boxes (retail price, Three Dollars), containing sufficient of each kind of Tablets to test them three months (in the majority of cases) in some one case. Card, letter-head, or some proof that the applicant is a physician in active practice. MUST accompany each application. Pamphlet, with full particulars, price-list, etc., on request.

As we furnish no samples through the trade, wholesale or retail, for samples, directions, price-list, etc., address,

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonar Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York.

Sole Agents for the above Preparations.

Constipation.

Pavara Pills are prepared especially for the treatment of Constipation. They are tasteless, harmless, and *produce natural movements of the bowels, without pain, nausea, or any inconvenience whatever.*

Physicians are requested to test these pills in those cases which they think to be incurable, also, in cases of **constipation during pregnancy.** Thousands of physicians now use and prescribe them.

Physicians will see by the **formula** (on the outside label) that each medicinal ingredient is **absolutely harmless.**

A large bottle, for trial, will be **mailed free to any practising physician.**

Prepared at TOPLIFF'S BOTANIC LABORATORY, New York. Depot, 115 Fulton Street.

Please mention this Journal.

CH. MARCHAND'S

PEROXIDE OF HYDROGEN

(MEDICINAL) H_2O_2 (ABSOLUTELY HARMLESS.)

Is rapidly growing in favor with the medical profession. It is the most powerful antiseptic known, almost tasteless, and odorless. Can be taken internally or applied externally with perfect safety. Its curative properties are positive, and its strength and purity can always be relied upon. This remedy is not a Nostrum.

A REMEDY FOR DIPHTHERIA; CROUP; SORE THROAT,
AND ALL INFLAMMATORY DISEASES OF THE THROAT.

OPINION OF THE PROFESSION.

Dr. Geo. B. Hope, Surgeon Metropolitan Throat Hospital, Professor Diseases of Throat, University of Vermont, writes in an article headed, "Some Clinical Features of Diphtheria, and the treatment by Peroxide of Hydrogen" (*N. Y. Medical Record*, October 13, 1888). Extract:

". . . On account of their poisonous or irritant nature the active germicides have a utility limited particularly to surface or open wound applications, and their free use in reaching diphtheritic formations in the mouth or throat, particularly in children, is, unfortunately, not within the range of systematic treatment. In Peroxide of Hydrogen, however, it is confidently believed will be found, if not a specific, at least the most efficient topical agent in destroying the contagious element and limiting the spread of its formation, and at the same time a remedy which may be employed in the most thorough manner without dread of producing any vicious constitutional effect. . . .

"Inasmuch as the efficacy depends upon the ozonized oxygen in solution, it has seemed desirable to rely on the full strength of the officinal preparation of fifteen volumes, especially when used in the fauces, where any slight irritation from its acidity is not apparent. In all the cases treated (at the Metropolitan Throat Hospital), a fresh, standard Marchand preparation of fifteen volumes was that on which the experience of the writer has been based. . .

"An equally important element is in making the application in such a manner as to produce the most determined effect on the diseased tissues with as little local disturbance as possible. . . . A steady, coarse spray, with an air pressure of twenty pounds or more, will, in a few moments' time, produce a more positive action than prolonged efforts to reach the fauces by means of cotton applicators. . . . How frequently the treatment is to be followed up depends to a considerable extent on the density, as well as the area, of the surface involved. . "

CAUTION.—By specifying in your prescriptions "Ch. Marchand's Peroxide of Hydrogen (Medicinal)," which is sold only in ¼-lb., ½-lb., and 1-lb. bottles, bearing my label and signature, you will never be imposed upon. Never sold in bulk.

PREPARED ONLY BY

A book containing full explanations concerning the therapeutical applications of both CH. MARCHAND'S PEROXIDE OF HYDROGEN (Medicinal) and GLYCOZONE, with opinions of the profession, will be mailed to physicians free of charge on application. ☞ Mention this publication.

Laboratory, 10 West Fourth Street, New York.

A CASE WITH A LESSON IN IT.

We have frequently referred to the necessity of keeping the pregnant woman supplied with those chemical substances which she must give to the child in the formation of its little frame, and the dire effects which may result from a deficiency of those substances. The headaches, neuralgias, spinal tenderness, and some of the many disorders of digestion, and even mental failure, may be all prevented or relieved by supplying to the mother the chemical food her system demands.

We have noticed a few cases where the most serious results have occurred to the mother by such a deficiency, one of which is well worth relating. Mrs. M., aged 30, pregnant with her third child, suffered from the second to the fifth month of her pregnant term with gradually failing strength and health, and nervous irritability. She was very restless nights for three or four days, the peculiar restlessness of complete nervous exhaustion, and was irrational for more than a week.

At this time I advised that she have a teaspoonful of Murdock's Liquid Food every hour in milk, and a little wine every four hours. The third night she had fifteen drops of hydrobromic acid dil. every three or four hours, which was continued for a week. The liquid food after a week every two hours, and all other medicines were discontinued. Her bowels were moved with a mild laxative at first, and afterward became regular. Her tongue cleaned quickly and her skin assumed a more natural appearance.

At this writing, less than three weeks from our first visit, the patient is able to sit up an hour at a time, is quite rational and cheerful, has a good appetite, the bowels are quite regular, there is no headache, and but little spinal tenderness. She sleeps reasonably well if fed frequently. She is allowed to suit her taste in her diet. The child is quite active, and the mother is progressing so nicely that it is hoped that she will pass safely through her confinement, which is nearly at hand. She will be kept on the liquid food and the phosphates until her confinement after which, the condition will suggest the treatment. This is the most marked case of a starved nervous system we have ever seen, and the benefit derived from the treatment proves the theory as to the cause of the trouble.

Apropos with the above, comes the question of the selection of nutritious foods for those many cases which demand strong and immediate nourishment. The food used in the above case has produced marvelous results for us in some of those extreme cases in which we have used it.

In one case of nervous exhaustion the insomnia was absolutely painful. When the exhaustion forced the patient to sleep there was an immediate sense of falling or approaching death, or there were hallucinations which were appalling, rendering the nights unbearable. One teaspoonful of Murdock's Liquid Food so nourished the system the first night it was given that the patient sank into a quiet, refreshing sleep which lasted, with a single awakening, until morning, and the improvement the patient obtained was most striking.

One case of mitral regurgitation with leucocythemia and nervous exhaustion improved more rapidly on this food than on all other measures combined. In cases of nervous exhaustion and brain tire, its effects are most marked, as we have experienced many times in the past five years in the frequent personal use of the agent. It contains the principles of pure, healthy blood and nerve tissue ready for immediate assimilation. Fourteen per cent. of the entire quantity is uncoagulated albumen, as we have demonstrated by actual analysis.

We have tided babies over critical periods often with a few drops in its usual diet. We have given it to dipsomaniacs with or without non-alcoholic stimulants with superb results. The sole objection our patients have to it is its odor. Its taste is not disagreeable; it has the odor and appearance of blood. All objections are soon forgotten, however, in the results of its action upon the nutrition of the system, and the patient soon learns to like it, and often craves for it, drinking it from the bottle or a glass readily, like any beverage. It ought to be the food par-excellence for rapid appropriation in all conditions of exhaustion.

P. S.—Phosphates act well with the Liquid Food.

Editorial of the Chicago *Medical Times*, June, 1890.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in thetreatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine,* Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

BLAUD

MEDICO-CHIRURGICAL COLLEGE
OF PHILADELPHIA.

WINTER SESSION will begin Wednesday, October 1st, and continue until April 16th. PRELIMINARY SESSION begins September 8th. SPRING TERM, April 20th, 1891.

The curriculum is graded, and a preliminary examination and three Annual Winter Sessions are required. Laboratory instruction in Chemistry, Histology, Pathology, Hygiene, Physiology, with Bedside instruction in Medicine, Surgery and Gynecology, is a part of the regular course.

Fees: Matriculation $5.00. First and second years, each $75.00. Third year $100.00. Fourth year free to those in attendance three sessions; to all others $100.00.

For Announcement or information apply to

E. E. MONTGOMERY, M. D.,

1818 Arch Street, Philadelphia, Pa.

THE JEFFERSON MEDICAL COLLEGE
OF PHILADELPHIA.

The 66th Annual Session of the Jefferson Medical College begins October 1st and continues nearly 7 months. Preliminary Lectures will be held from 22d of September.

EACH student is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Histology and Experimental Physiology, Minor Surgery, Bandaging, Operations on the Cadaver, Pathology, Neurology, and Electro-Therapeutics.

Three annual regular sessions are required. Bedside instruction in Medicine, Gynæcology, Surgery and Obstetrics is a part of the third year course. No extra fee.

The **Annual Announcement** will be sent on application to **J. W. HOLLAND, M. D., Dean.**

SCOTT'S EMULSION

VERSUS

PLAIN COD LIVER OIL.

Plain Cod Liver Oil ***is indigestible, deranges the stomach, destroys the appetite is not assimilated,*** and in a majority of cases is detrimental to the patient.

SCOTT'S EMULSION

Can be ***digested in nearly all cases, is assimilated, does not derange the stomach, nor overtax the digestive functions,*** and can be taken for an indefinite period when the plain cod liver oil cannot be tolerated at all, and with most marked results in ***Anæmia, Consumption*** and all wasting conditions. It also contains the ***Hypophosphites of Lime and Soda with Glycerine,*** which are most desirable adjuncts.

WHEN PHYSICIANS TRY IT THEY INVARIABLY USE IT

in preference to the plain cod liver oil or other ***so-called Emulsions*** that invariably separate, and hence their integrity and value is destroyed. ***Scott's Emulsion is palatable and absolutely permanent*** hence its integrity is always preserved.

The formula for SCOTT'S EMULSION is 50 per cent. of the finest Norwegian Cod Liver Oil, 6 grains Hypophosphite of Lime and 3 grains Hypophosphite of Soda to the fluid ounce, Emulsified, or digested to the condition of assimilation with chemically pure Glycerine and Mucilage.

We also wish to call your attention to the following preparations:

CHERRY MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain aud nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula).

Prepared from carefully selected German Buckthorn Bark, Juglans Bark and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SCOTT & BOWNE, 132 South Fifth Avenue, NEW YORK.

THE ATMOSPHERIC TRACTOR.

THE MOST BENEFICENT INVENTION OF THE CENTURY.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One Teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

Where Women have miscarried during previous pregnancies, or in any case where miscarriage is feared, ALETRIS CORDIAL is Indicated, and should be continuously administered during entire gestation.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. **A NON-ALCOHOLIC LIQUID.** WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Conorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used,

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

The above preparations are prepared exclusively for Physicians' Prescriptions, and a sample of each or all of them will be sent to any Physician who wishes to test them, if he will pay the Express Charges.

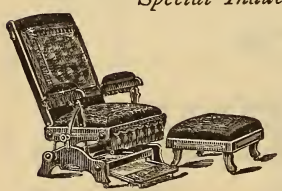
Every Physician in THE WORLD should Read This Advertisement.

THE RIP VAN WINKLE RECLINING ROCKER.

OFFICE AND GYNÆCOLOGICAL CHAIR COMBINED.

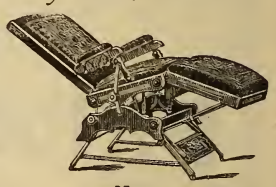
Special Inducements and Extra Discount Given to Physicians.



No. 1.

It is the most wonderful Chair in the world. You can sit in the Chair with your feet on the foot-rest and rock yourself, and it is impossible for a beholder to tell what makes the Chair rock. It is the finest invalid's Chair in the world.

As an **Invalid's Chair**, a person can recline the back by quarter-inches until he lies straight or horizontally, and without taking his weight from the back of the chair in the least, and CAN ROCK AS WELL LYING DOWN AS SITTING UP. Upholstered in Plush, Leather or Wilton Rugs. This Chair has over 200 changes of position, and sells for $25.00.

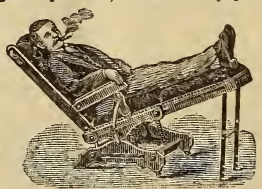


No. 2.

This Chair can be converted from a splendid Office Chair (see cuts Nos. 1 and 3) into one of the most complete Gynæcological Chairs in a half minnte, (see cuts 2, 4, and 5).

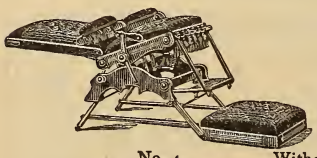
As a Gynæcological Chair it will take all the positions of the high-priced chairs costing two and three times what this one does.

The Rip Van Winkle Chair has over 200 changes of position. Every chair fully warranted.



No. 3.

This Chair is sold with or without the Gynæcological attachment, as desired. It is *unquestionably* the most complete and comfortable Reclining or Lounging Chair ever made. I make a special price to physicians, and also give them a handsome commission on all orders I receive through them for Chairs for their patients. No Chair in the world is so well adapted to ladies suffering from female weakness, and the commission I give on your orders will soon pay for your own Chair.



No. 4.

The Chair makes 5 pieces of Furniture.

I have attachments by which it can be converted into an Invalid's Rolling Chair in one minute. Parties can get these attachments from factory at any time. Send for full particulars, price-list, and illustrated catalogue showing the principal positions and changes. The Catalogue contains the "Legend of Rip Van Winkle."

Without the Gynæcological Attachment these Chairs

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1890—91.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, Prof. T. M. T. McKENNAN.

Business correspondence should be addressed to

Organized in 1880 for the special medical treatment of

ALCOHOL AND OPIUM INEBRIATES.

Elegantly situated in the suburbs of the city, with every appointment and appliance for the treatment of this class of cases, including Turkish, Russian, Roman, Saline and Medicated Baths. Each case comes under the direct personal care of the physician. Experience shows that a large per cent. of these cases are curable, and all are more or less benefited from the application of exact hygienic and scientific measures. This institution is founded on the well-recognized fact that INEBRIETY is a DISEASE, and CURABLE, and all these cases require rest, change of thought and living, in the best surroundings, together with every means known to science and experience to bring about this result. Applications and all inquiries should be addressed

T. D. CROTHERS, M.D.,
Sup't Walnut Lodge, Hartford, Conn.

DR. MASSEY'S
PRIVATE SANITARIUM

212 South Fifteenth Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY,
Physician in Charge.

Mellin's Food
FOR INFANTS AND INVALIDS.

A SOLUBLE DRY EXTRACT, prepared from Malted Barley and Wheat, consisting of Dextrin, Maltose, Albuminates, and Salts.

The SUGAR in MELLIN'S FOOD is MALTOSE. MALTOSE is the PROPER SUGAR for use in connection with cow's milk.

The sugar formed by the action of the Ptyalin of the Saliva and the Amylopsin of the Pancreas upon starch is MALTOSE. In the digestive tract MALTOSE is absorbed UNCHANGED.

—*Landois and Sterling.*

MALTOSE is a saccharose, not a glucose, and is a form of sugar which does not ferment.

—*Materia Medica and Therapeutics, Dr. Mitchell Bruce.*

"I have never seen any signs of fermentation which I could attribute to the influence of MALTOSE."

—*Eustace Smith, M.D., F.R.C.S.*

MELLIN'S FOOD, prepared according to the directions, is a true LIEBIG'S FOOD and the BEST SUBSTITUTE for Mother's Milk yet produced.

IT REQUIRES NO COOKING.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

THE POLYCLINIC HOSPITAL,

NORTHWEST CORNER BROAD AND LOMBARD STS.

REGULAR SESSIONS RECOMMENCE SEPT. 15TH

Pupils may begin at any time. Tickets good for Six Weeks' Daily Clinics from date of issue or One Clinic Weekly, for three months.

PRACTICAL, INDIVIDUAL INSTRUCTION, TO PHYSICIANS ONLY, IN ALL BRANCHES OF MEDICINE AND SURGERY.

FOR ANNOUNCEMENT, ADDRESS,
SOLOMON SOLIS-COHEN, M. D, SECRETARY.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

SESSIONS 1890-91.

The Autumn and Winter Sessions of the Post-Graduate Medical School opened on September 15. The Hospital is fully utilized for clinical purposes. There are ninety beds, including thirty for babies in the adjacent building. No Post-Graduate Medical School in this country can offer such opportunities for seeing important surgical and gynæcological operations under its own roof as does this institution. Besides, regular clinics, medical and surgical, are held by professors and instructors in those general and special hospitals with which they are connected, which comprises nearly all the great hospitals of the city. The dispensary of the school and other large dispensaries furnish ample means of instruction in every class of walking cases.

Instruction is given in every branch of medicine and surgery. The laboratory is large and well equipped. Surgical anatomy and operative surgery are thoroughly taught. The instruction is personal, the practitioner being brought in direct contact with the patient. No other courses in any department will be required if those to be had in the Post-Graduate School are taken. The faculty were the first in the United States to organize private courses for practitioners of medicine, and they pledge themselves to leave nothing undone to make graduates in medicine profit by the unrivalled clinical advantages of the City of New York.

For catalogue and schedule, address

CLARENCE C. RICE, M. D., Secretary.

D. B. ST. JOHN ROOSA, M. D., LL.D., PRESIDENT. **226 East 20th St., New York City.**
F. E. FARRELL, SUPERINTENDENT.

COLLEGE OF MEDICINE. SYRACUSE UNIVERSITY.

FACULTY.

JOHN VAN DUYN, M. D., Surgery.
HENRY D. DIDAMA, M. D., Practice and Clinical Medicine.
WILLIAM T. PLANT, M. D., Diseases of Children.
ALFRED MERCER, M. D., State Medicine.
WILLIAM MANLIUS SMITH, M. D., Chemistry.
DAVID M. TOTMAN, M. D., Clinical Surgery,
NATHAN JACOBSON, M. D., Clinical Surgery and Laryngology.
GAYLORD P. CLARK, M. D., Anatomy.
WILLIAM H. DUNLAP, M. D., Dermatology.
JOHN L. HEFFRON, M. D., Materia Medica and Therapeutics.
HENRY B. ALLEN, M. D., Obstetrics.
A. CLIFFORD MERCER, M. D., Pathology.
HENRY L. ELSNER, M. D., Clinical Medicine.
FRANK W. MARLOW, M. D., Ophthalmology.

Three Years' Graded Course. Year begins October 7th, 1890, ends in June, 1891.

FIRST YEAR: Anatomy, Physiology, Chemistry, Histology, Materia Medica.
SECOND YEAR: Anatomy, Physiology, Chemistry, Therapeutics, Pathology, Practice, Surgery, Clinical Medicine and Surgery.
THIRD YEAR: Therapeutics, Practice, Surgery, Children, Clinics, Obstetrics, Gynæcology, Forensic Medicine, Ophthalmology, Hygiene.

An experience of seventeen years has demonstrated that a three years' graded course is superior in every respect to an ungraded, unnatural, and cramming course of two winters.

Tuition, $80.00 for each Year. Perpetual Ticket, $200.00. Diploma, $25.00.

For circulars with full information, address
W. H. DUNLAP, M. D., Registrar, SYRACUSE, N. Y.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 125TH ANNUAL WINTER SESSION will begin Wednesday, October 1st, 1890, at 12 M., and will continue seven months. The PRELIMINARY SESSION begins September 22d, 1890, the Spring Term early in May, 1891.

The curriculum is graded and three annual winter sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D, LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D, Professor of Materia Medica, Pharmacy and General Therapeutics.
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof.of Ophthalmology
BARTON COOKE HIRST, M.D., Professor of Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

GRIFFITH & CO.'S

Compound Mixture of Guaiac, Stillingia, etc.

For Acute and Chronic Rheumatism, Gout, Lumbago, Neuralgia, and Kindred Complaints.

TO PHYSICIANS.—Gentlemen: We would respectfully draw your attention to our **COMPOUND MIXTURE OF GUAIAC, STILLINGIA, ETC.**

THIS **is not a new preparation,** but has been in constant use by many prominent practitioners of medicine for several years, and its beneficial results in the treatment of the diseases indicated, including Syphilitic troubles, have been fully established.

When ordering this Preparation, in order to avoid delay or misunderstanding, Physicians will please specify **"GRIFFITH & CO.'S,"** or Physicians in the city can send their patients direct to our pharmacies, **at No. 67 Third Avenue, cor. 11th St., or 2241 Third Avenue, cor. 122d St., New York,** where, at any time, further information will be cheerfully furnished. Out of town Physicians can order through their druggists or direct from us.

WE have hundreds of testimonials from prominent physicians who have prescribed and personally used this mixture. It is manufactured for **PHYSICIANS' PRESCRIPTIONS** only. Always specify GRIFFITH & Co.'s. If you have an obstinate case of Rheumatism under treatment, inclose One Dollar and receive, by express, a regular size bottle, or we will send, upon request, a sample bottle providing you will pay express charges. Wholesale Price-List—8-ounce size, $10.50 per dozen; 16-ounce size, $20.00 per dozen. In lots of one dozen and upward, we prepay express charges to any point east of the Rocky Mountains. **(Do not overlook this offer, for you may be pleased and possibly surprised at the results.)**

P. S.—The advertising of this article is confined strictly to Medical Journals, and the general verdict of physicians is that if this mixture does not act on a case, it is a difficult matter to find something that will.

Very respectfully,

GRIFFITH & CO., Chemists and Pharmacists,

67 Third Ave., cor. 11th St., and 2241 Third Ave., cor. 122d St., NEW YORK.

Carried in stock by the principal Wholesale Druggists in the U. S.

SVAPNIA

OR

PURIFIED OPIUM

FOR PHYSICIANS USE ONLY.

Contains the Anodyne and Soporific Alkaloids, Codeia, Narceia and Morphia.

Excludes the Poisonous and Convulsive Alkaloids, Thebaine, Narcotine and Papaverine.

SVAPNIA has been in steadily increasing use for over twenty years, and whenever used has given great satisfaction.

To PHYSICIANS OF REPUTE, not already acquainted with its merits, samples will be mailed on application.

SVAPNIA is made to conform to a uniform standard of Opium of Ten per cent. Morphia strength.

JOHN FARR, Manufacturing Chemist, New York.

C. N. CRITTENTON, Gen'l Agent, 115 Fulton St., N. Y.

To whom all orders for samples must be addressed.

SVAPNIA IS FOR SALE BY DRUGGISTS GENERALLY.

St. Vincent Home Maternity Hospital,

70th Street and Woodland Avenue,

(PASCHALL STATION) PHILADELPHIA.

FAIRCHILD'S

ESSENCE OF PEPSINE

Contains the essential active principle of the gastric juice, obtained by direct extraction from the rennet.

It is by far the most active, reliable, and agreeable of all the preparations of pepsin.

This preparation has been ten years before the medical profession, and enjoys a high reputation and a very wide use.

There can be no doubt that the value of the digestive ferments is enhanced by skilful and judicious combination with aromatics, and this Essence of Pepsine is peculiarly grateful and stomachic.

It tends to promote the natural digestive functions, and has been found in practice to be especially suited to digestive disorders of infants, for the correction of flatulency, indigestion, etc.

It also finds practical use in the preparation of junket as an agreeable food for invalids, and in the preparation of whey as a temporary food for infants.

We respectfully request that physicians who prefer Fairchilds' preparation will kindly specify them in order to avoid the imitations which are now urged upon the market as "just as good as Fairchilds'." The substitution of these imitations can certainly be of no advantage whatever except to the maker of them and the one who foists them upon the consumer, as the same price is charged for these imitations as for the genuine article.

FAIRCHILD BRO'S & FOSTER,

82 and 84 Fulton Street, New York.

"What a boon it would be to the Medical Profession if some reliable Chemist would bring out an Extract of Malt in combination with a well-digested or peptonized Beef, giving us the elements of Beef and the stimulating and nutritious portions of Ale."—J. MILNER FOTHERGILL, M.D.

Ale & Beef

"PEPTONIZED"

(EXTRACT:—BOVIS CUM MALTO.)

Is the identical combination suggested by the late eminent Fothergill.

EACH BOTTLE REPRESENTS 1-4 POUND OF LEAN BEEF THOROUGHLY PEPTONIZED.

It is the only Mild Stimulant combined with a Perfect Food known. It is very palatable, aids digestion, is retained by the most delicate stomach, and the purity of its ingredients is guaranteed.

THE "PEPTONIZED" BEEF

is manufactured by Prof. Preston B. Rose, of Chicago, late of the faculty of the University of Michigan.

THE ALE USED IS THE PUREST AND BEST MADE IN AMERICA

Especially brewed for this purpose, and guaranteed to be equal to the best imported ales, as only the best Canada Malt and the choicest new hops are used in its manufacture.

IT IS A REAL FOOD; NOT A MERE STIMULANT,

as it contains all the albumen and fibrin of the beef as well as the nutritive qualities of the malted barley.

It is most useful during the period of Gestation, in allaying all vomiting, and invaluable to Nursing Mothers; also in Typhoid Fever and Dysentery.

Prof. G. A. Liebig says: "A careful chemical examination of the Peptonized Ale and Beef shows a much larger per cent. of nitrogenous blood and muscle-making matter over all other malt extracts, and that it is also rich in Diastase, giving it the power to digest Starch Foods."

PREPARED BY

The Ale and Beef Company,

DAYTON, OHIO, U. S. A.

Two full-sized bottles will be sent FREE to any physician who will pay express charges. Please mention this journal.

SIR MORELL MACKENZIE, in the *Journal of Laryngology*, published in London, says the following:

"Most of the German Saline Springs are situated on a range of the Taunus Hills. Of these, unquestionably one of *the very best* is

SODEN.

"Containing, as it does, some 23 springs, with a temperature varying between 12° to 18° C., the waters of which are charged with Chloride of Sodium in varying degrees up to 116 Grammes per litre, and some of which are further charged with Carbonic Acid, the Health Resort of Soden is unquestionably one of the very best places for the treatment of Pulmonary and Catarrhal complaints.

"COMPRESSED PASTILLES of the Soden Water are now an article of commerce, as well as the mineral waters. These are made from two of the well-waters, and containing a large amount of Chloride of Sodium, are particularly serviceable in pharyngeal catarrhs, and may even in some degree be used where it is desired to obtain the effect of the Soden treatment, in persons who are unable to make the necessary journey to the Spa itself. I have watched the effects of the Soden Waters for a considerable period, and regard them as extremely valuable in obstinate catarrhal affections of the throat. The small amount of iron which they contain renders them very useful in the stages of Throat Consumption, and they do good in nearly all cases of relaxation of the mucous membrane.

"The Pastilles offer a most convenient method of using the Waters; producing both a local and general effect. They are especially beneficial in catarrhal diseases of the air-passages; I have frequently found them of great service in the case of singers and public speakers.

(Signed) "MORELL MACKENZIE, M. D., LONDON."

DR. NORRIS WOLFENDEN, Senior Physician Throat Hospital, London, writes:

"SIR:—The Wells of Soden are known to possess most powerful medicinal virtues, and have been found of the utmost benefit in the treatment of Catarrhal conditions of the upper respiratory tract, such as Bronchitis and Emphysema, and even in Pulmonary Phthisis. Many chronic throat conditions are equally benefited. Possessing a large amount of Sodium Chloride in their composition, they have a character which is quite special, and the fact that the several Wells of Soden contain varying amounts of this important mineral constituent, renders it possible to treat many complaints of opposite nature on the same spot.

"I consider the 'Soden Mineral Pastilles,' which you have introduced to me, to be a most convenient and pleasant mode of obtaining the medicinal benefits of the Soden Wells. They form an agreeable and effective lozenge, and I feel certain will be of great service to patients afflicted with certain forms of chronic throat disease. Sprays of the same waters would, I am sure, be of much service. I hope your efforts to introduce the Soden Mineral Waters and Pastilles into this country will meet with success.

"I am, Sir, yours faithfully,

(Signed) "R. NORRIS WOLFENDEN, M.D. Cantab.,

"Senior Physician Throat Hospital, London; Editor of Journal of Laryngology."

SAMPLES AND PAMPHLETS MAILED UPON APPLICATION.

Soden Mineral Springs Co., Ld., Sole Agents,

P. O. BOX 3319, NEW YORK.

Doctor:

You have often noticed that many patients, after a course of typhoid fever, erysipelas, diphtheria, and kindred diseases, undergo a long, tedious convalescence. For many weary weeks they sit around the house or drag their emaciated bodies feebly along. Their flame of life is so dim that it is easily puffed out by any slight indisposition or intercurrent malady, that may chance to attack them, and hence we see so many *cured* cases become easy victims by the predisposition which their debility constitutes.

Now, what is the true condition in such as case as this?

Why, simply that in the febrile process immense hosts of the tissue cells have been consumed or carried away, and most of those remaining are worn out and only await a vigorous circulation to remove them and deposit healthy cells in their places.

In addition to the emaciation you notice that the tissues still left are flabby and apparently lifeless. The nutritive organs are so weakened that they are barely sufficient to maintain life without furnishing the required new material to carry on the process of repair. Thus the individual remains an easy prey to pathogenic influences which one in robust health can successfully resist.

Can anything be done for such cases?

Certainly.

But you would better leave them to the unassisted reparative powers of nature than to dose them with the irritant alleged "tonics" now so much in vogue. The organs of nutrition only want to be supplied with true cell and tissue food in an assimilable form.

This you will find in McArthur's Compound Syrup of the Hypophosphites of Lime and Soda. This is a CHEMICALLY PURE preparation, a quality so rare in Hypophosphite preparations. It is prepared in such a manner that the important ingredients go entirely to the rapid rebuilding of the tissues.

Give this to your convalescent patient and you will see a remarkable increase in flesh, strength, and buoyancy of spirits. The convalescence will be greatly shortened, and in every way the Hypophosphites will prove to them to be a true Elixir of Life.

You can also make an enviable reputation for yourself by prescribing it in Phthisis and all Tubercular affections, Scrofula, Throat, and Bronchial diseases, Nervous disorders and degenerations, and Fibroid Tumors.

Send for our pamphlet on "The Curability and Treatment of Consumption" (free), and a full size bottle of McArthur's Syrup, free, if you will agree to pay express charges.
